

AS 61869.2:2021
(Incorporating Amendment No. 1)

STANDARDS
Australia

Instrument transformers

Part 2: Additional requirements for current transformers (IEC 61869-2:2012 (ED 1.0) MOD)

AS 61869.2:2021

This Australian Standard® was prepared by EL-013, Measurement And Protection Transformers. It was approved on behalf of the Council of Standards Australia on 22 February 2021.

This Standard was published on 5 March 2021.

The following are represented on Committee EL-013:

Australian Industry Group
Energy Networks Australia
Engineers Australia
National Measurement Institute
University of South Australia

This Standard was issued in draft form for comment as DR AS 61869.2:2020.

Preface

This Standard was prepared by the Standards Australia Committee EL-013, Measurement and Protection Transformers, to supersede AS 60044.1—2007, *Instrument transformers: Part 1: Current transformers (IEC 60044-1Ed.1.2 (2003) MOD)*.

A1 Amendment No. 1 to this Standard was prepared by the Standards Australia Committee EL-013, Measurement and Protection Transformers. **A1**

The objective of this document is to apply to newly manufactured inductive current transformers for use with electrical measuring instruments and/or electrical protective devices having rated frequencies from 15 Hz to 100 Hz.

A1 This document is an adoption with national modifications, and has been reproduced from, IEC 61869-2:2012, *Instrument transformers — Part 2: Additional requirements for current transformers* and its Interpretation Sheet No. 1 (2022) which has been added at the end of the source text. **A1**

The modifications are additional requirements and are set out in [Appendix ZZ](#), which has been added at the end of the source text.

[Appendix ZZ](#) lists the variation to IEC 61869-2:2012 for the application of this document in Australia.

As this document has been reproduced from an International Standard, the following applies:

- (a) In the source text “this part of 61869” should read “this document”.
- (b) A full point substitutes for a comma when referring to a decimal marker.

Australian or Australian/New Zealand Standards that are identical adoptions of international normative references may be used interchangeably. Refer to the online catalogue for information on specific Standards.

The terms “normative” and “informative” are used in Standards to define the application of the appendices or annexes to which they apply. A “normative” appendix or annex is an integral part of a Standard, whereas an “informative” appendix or annex is only for information and guidance.
