

Australian/New Zealand Standard™

## **Photovoltaic system performance**

### **Part 1: Monitoring (IEC 61724-1:2017, MOD)**

AS/NZS 61724.1:2020

This Joint Australian/New Zealand Standard™ was prepared by Joint Technical Committee EL-042, Renewable Energy Power Supply Systems and Equipment. It was approved on behalf of the Council of Standards Australia on 23 March 2020 and by the New Zealand Standards Approval Board on 4 March 2020.

This Standard was published on 3 April 2020.

The following are represented on Committee EL-042:

- Australasian Fire and Emergency Service Authorities Council
- Australian Energy Council
- Australian Energy Market Operator
- Australian Industry Group
- Australian PV Institute
- Clean Energy Council, Australia
- Clean Energy Regulator, Australia
- Communications, Electrical and Plumbing Union — Electrical Division, Australia
- Consumer Electronics Suppliers Association, Australia
- Consumers' Federation of Australia
- CSIRO
- Electrical Compliance Testing Association of Australia
- Electrical Regulatory Authorities Council, Australia
- Electrical Safety New Zealand
- Electricity Engineers Association of New Zealand
- Energy Efficiency and Conservation Authority, New Zealand
- Energy Networks Australia
- Engineers Australia
- Institute of Electrical and Electronics Engineers, Australia
- Institute of Electrical Inspectors, Australia
- Joint Accreditation System of Australia and New Zealand
- Master Electricians Australia
- National Electrical and Communications Association, Australia
- NSW FairTrading
- Office of the Technical Regulator, SA
- Smart Energy Council, Australia
- Solar Energy Industries Association, Australia
- Sustainable Electricity Association New Zealand
- Sustainable Energy Association of Australia
- University of New South Wales
- Wellington Electrical Association
- WorkSafe New Zealand

This Standard was issued in draft form for comment as DR AS/NZS IEC 61724.1:2019.

## Preface

This Standard was prepared by the Joint Standards Australia/Standards New Zealand Committee EL-042, Renewable Energy Power Supply Systems and Equipment.

The objective of this Standard is to outline equipment, methods, and terminology for performance monitoring and analysis of photovoltaic (PV) systems. This Standard addresses sensors, installation, and accuracy for monitoring equipment in addition to measured parameter data acquisition and quality checks, calculated parameters, and performance metrics. In addition, this Standard serves as a basis for other standards which rely upon the data collected.

This Standard is an adoption with national modifications, and has been reproduced from, IEC 61724-1:2017, *Photovoltaic system performance — Part 1: Monitoring*. The modifications are additional requirements and are set out in [Appendix ZZ](#), which has been added at the end of the source text.

[Appendix ZZ](#) lists the variations to IEC 61724-1:2017 for the application of this Standard in Australia and New Zealand.

As this document has been reproduced from an International Standard, the following applies:

- (a) In the source text “this part of IEC 61724” should read “this Australian/New Zealand Standard”.
- (b) A full point substitutes for a comma when referring to a decimal marker.

Australian or Australian/New Zealand Standards that are identical adoptions of international normative references may be used interchangeably. Refer to the online catalogue for information on specific Standards.

The terms “normative” and “informative” are used in Standards to define the application of the appendices or annexes to which they apply. A “normative” appendix or annex is an integral part of a Standard, whereas an “informative” appendix or annex is only for information and guidance.
