Australian Standard[®]

**Cast aluminium alloy enclosures for
gas-filled high-voltage switchgear and
controlgear**

This Australian Standard® was prepared by Committee EL-007, Power Switchgear. It was approved on behalf of the Council of Standards Australia on 4 November 2008. This Standard was published on 9 December 2008.

The following are represented on Committee EL-007:

- Australasian Railway Association
 - Australian British Chamber of Commerce
 - Australian Electrical and Electronic Manufacturers Association
 - Energy Networks Association
 - Engineers Australia
 - Testing interests (Australia)
-

This Standard was issued in draft form for comment as DR 08174.

Standards Australia wishes to acknowledge the participation of the expert individuals that contributed to the development of this Standard through their representation on the Committee and through the public comment period.

Keeping Standards up-to-date

Australian Standards® are living documents that reflect progress in science, technology and systems. To maintain their currency, all Standards are periodically reviewed, and new editions are published. Between editions, amendments may be issued.

Standards may also be withdrawn. It is important that readers assure themselves they are using a current Standard, which should include any amendments that may have been published since the Standard was published.

Detailed information about Australian Standards, drafts, amendments and new projects can be found by visiting **www.standards.org.au**

Standards Australia welcomes suggestions for improvements, and encourages readers to notify us immediately of any apparent inaccuracies or ambiguities. Contact us via email at **mail@standards.org.au**, or write to Standards Australia, GPO Box 476, Sydney, NSW 2001.

PREFACE

This Standard was prepared by the Standards Australia Committee EL-007, Power Switchgear.

The objective of this Standard is to specify the requirements for cast aluminium enclosures that are to be used in high-voltage switchgear and controlgear and associated gas-filled equipment.

The text of this Standard is identical with, and has been reproduced from, EN 50052:1986, *Cast aluminium alloy enclosures for gas-filled high-voltage switchgear and controlgear* (including its Amendments 1 and 2); however, the formatting has been updated to reflect current style.

As this Standard is reproduced from an International Standard, the following applies:

- (a) Its number does not appear on each page of text and its identity is shown only on the cover and title page.
- (b) In the source text 'EN 50052' should read 'AS EN 50052'.

The terms 'normative' and 'informative' are used to define the application of the annex to which they apply. A normative annex is an integral part of a Standard, whereas an informative annex is only for information and guidance.

CONTENTS

	<i>Page</i>
0 Introduction	1
1 Scope	1
2 Quality assurance	2
3 Definitions	2
4 Materials	5
4.1 Selection of material	5
4.2 Chemical analysis	5
5 Design	5
5.1 General	5
5.2 Corrosion allowance	6
5.3 Design stresses	6
5.4 Calculation methods	6
5.5 Manholes and inspection openings	7
6 Manufacture and workmanship	7
6.1 Manufacture	7
6.2 Consultation between manufacturer and founder	8
6.3 Foundry technique	8
6.4 Geometry and dimensions	8
6.5 Chemical composition and mechanical properties	8
6.6 Workmanship	9
7 Repair of casting defects	9
7.1 General	9
7.2 Repair by welding	9
7.3 Impregnation of castings	12
8 Heat treatment	12
8.1 Heat treatment procedure	12
8.2 Methods of heating	12
8.3 Quenching	12
8.4 Calibration of furnace temperature	12
8.5 Heat treatment charts	12
9 Inspection, testing and certification	13
9.1 Proof tests	13
9.2 Inspection and routine tests	14
9.3 Certification	15
10 Pressure relief devices	15
10.1 General	15
10.2 Bursting discs	16
10.3 Self-closing pressure relief valves	16
10.4 Non-self-closing pressure relief devices	16
Annex A Welder performance test	19
Annex B (informative) A-deviations	21
