Woodworking machines - Safety - Part 5: Dimension saws (ISO 19085-5:2017)

I.S. EN ISO 19085-5:2017

Incorporating amendments/corrigenda/National Annexes issued since publication:

The National Standards Authority of Ireland (NSAI) produces the following categories of formal documents:

I.S. xxx: Irish Standard — national specification based on the consensus of an expert panel and subject to public consultation.

S.R. xxx: Standard Recommendation — recommendation based on the consensus of an expert panel and subject to public consultation.

SWiFT xxx: A rapidly developed recommendatory document based on the consensus of the participants of an NSAI workshop.

This document replaces/revises/consolidates the NSAI adoption of the document(s) indicated on the CEN/CENELEC cover/Foreword and the following National document(s):

NOTE: The date of any NSAI previous adoption may not match the date of its original CEN/CENELEC document.

This document is based on:

National Foreword

I.S. EN ISO 19085-5:2017 is the adopted Irish version of the European Document EN ISO 19085-5:2017, Woodworking machines - Safety - Part 5: Dimension saws (ISO 19085-5:2017)

This document does not purport to include all the necessary provisions of a contract. Users are responsible for its correct application.

For relationships with other publications refer to the NSAI web store.

Compliance with this document does not of itself confer immunity from legal obligations.

In line with international standards practice the decimal point is shown as a comma (,) throughout this document.

This European Standard was approved by CEN on 11 September 2016.

CEN members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration. Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the CEN-CENELEC Management Centre or to any CEN member.

This European Standard exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CEN member into its own language and notified to the CEN-CENELEC Management Centre has the same status as the official versions.

CEN members are the national standards bodies of Austria, Belgium, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, Former Yugoslav Republic of Macedonia, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Romania, Serbia, Slovakia, Slovenia, Spain, Sweden, Switzerland, Turkey and United Kingdom.

European foreword

This document (EN ISO 19085-5:2017) has been prepared by Technical Committee ISO/TC 39 “Machine tools” in collaboration with Technical Committee CEN/TC 142 “Woodworking machines - Safety” the secretariat of which is held by UNI.

This European Standard shall be given the status of a national standard, either by publication of an identical text or by endorsement, at the latest by February 2018, and conflicting national standards shall be withdrawn at the latest by February 2018.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. CEN shall not be held responsible for identifying any or all such patent rights.

This document supersedes EN 1870-18:2013.

This document has been prepared under a mandate given to CEN by the European Commission and the European Free Trade Association, and supports essential requirements of EU Directive(s).

For relationship with EU Directive(s), see informative Annex ZA, which is an integral part of this document.

According to the CEN-CENELEC Internal Regulations, the national standards organizations of the following countries are bound to implement this European Standard: Austria, Belgium, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, Former Yugoslav Republic of Macedonia, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Romania, Serbia, Slovakia, Slovenia, Spain, Sweden, Switzerland, Turkey and the United Kingdom.

Endorsement notice

The text of ISO 19085-5:2017 has been approved by CEN as EN ISO 19085-5:2017 without any modification.

Annex ZA (informative)

Relationship between this European Standard and the essential requirements of EU Directive 2006/42/EC

This European standard has been prepared under a Commission's standardization request "M/396" to provide one voluntary means of conforming to essential requirements of the new approach Machinery Directive 2006/42.

Once this standard is cited in the Official Journal of the European Union under that Directive, compliance with the normative clauses of this standard given in Table ZA.1 confers, within the limits of the scope of this standard, a presumption of conformity with the corresponding essential requirements of that Directive, and associated EFTA regulations.

Table ZA.1 — Correspondence between this European Standard and Directive 2006/42/EC

| Essential Requirements (ERs) of Directive 2006/42/EC | Clause(s)/subclause(s) of this EN | Remarks/Notes |
|---|---|---------------|
| 1.1.2 Principles of safety integration | | |
| a) fitted for its function | 5.1, 5.2, 5.3, 5.4, 5.5, 5.6, 5.7, 5.11, 5.13, 6.6, 6.7, 6.8, 7.12, 7.13, 8.3 | |
| b) eliminate or reduce the risks, give measures, inform | Clause 5, 6, 7, 8 | |
| c) intended use and reasonably foreseeable misuse | Clause 5, 6, 7, 8 | |
| d) constraints in use | 7.5, 8.3 | |
| e) equipment | 6.1, 6.9, 7.9, 8.3 | |
| 1.1.3 Materials and products | 6.2, 6.3, 6.5, 6.6, 6.7, 7.3 | |
| 1.1.4 Lighting | 7.6, 8.3 | |
| 1.1.5 Design of machinery to facilitate its handling | 5.2, 6.6, 7.5 | |
| 1.1.6 Ergonomics | 7.5 | |
| 1.1.7 Operating position | 5.2, 5.6, 5.7, 5.11, 5.13, 8.3 | |
| 1.2.1 Safety and reliability of control systems | 5.1, 5.6, 5.7, 5.11, 5.13, 6.5, 6.6, 7.8, 7.12 | |
| 1.2.2 Control devices | 5.2, 5.3, 5.4, 5.6, 5.7, 5.11, 5.13, 6.7.4.2, 8.3 | |
| 1.2.3 Starting | 5.2, 5.3, 5.6, 5.7, 5.11, 5.13, 6.7.4.2 | |
| 1.2.4 Stopping | 5.2, 5.4, 5.5, 5.8, 6.4.2 | |
| 1.2.4.1 Normal stop | 5.4.2 | |
| 1.2.4.2 Operational stop | 5.4.3 | |
| 1.2.4.3 Emergency stop | 5.4.4 | |
| 1.2.5 Selection of control or operating mode | 5.6 | |

| | | |
|--|--|--|
| 1.2.6 Failure of the power supply | 5.8, 7.7, 7.8, 7.13 | |
| 1.2.8 Software | 5.1 | |
| 1.3.1 Risk of loss of stability | 6.1, 8.3 | |
| 1.3.2 Risk of break-up during operation | 6.2, 8.3 | |
| 1.3.3 Risks due to falling or ejected objects | 6.2, 6.3, 6.5 | |
| 1.3.4 Risk due to surfaces, edges or angles | 5.1 | |
| 1.3.6 Risks relating to variations in the operating conditions | 5.7, 5.11, 5.13 | |
| 1.3.7 Risks related to moving parts | 5.6, 5.11, 5.13, 6.7 | |
| 1.3.8 Choice of protection against risks related to moving parts | 6.6.1, 6.6.2, 6.6.3, 6.6.4 | |
| 1.3.8.1 Moving transmission parts | 6.6.3 | |
| 1.3.8.2 Moving parts involved in the process | 6.6.1, 6.6.2, 6.6.3, 6.6.4 | |
| 1.3.9 Risk of uncontrolled movements | 5.6, 5.11, 6.6.4, 6.8 | |
| 1.4.1 General requirements | 6.9.1, 6.6, 6.7, 6.8, 7.3 | |
| 1.4.2.1 Fixed guards | 6.5.1 | |
| 1.4.2.2 Interlocking movable guards | 6.5.2 | |
| 1.4.2.3 Adjustable guards restricting access | 6.2, 6.6, 6.7 | |
| 1.5.1 Electricity supply | 7.4, 7.13 | |
| 1.5.2 Static electricity | 7.11 | |
| 1.5.3 Energy supply other than electricity | 7.7, 7.8 | |
| 1.5.4 Errors of fitting | 7.12 | |
| 1.5.6 Fire | 7.1 | |
| 1.5.8 Noise | 7.2 | |
| 1.5.11 External radiation | 7.9 | |
| 1.5.12 Laser equipment | 7.10 | |
| 1.5.13 Emission of hazardous materials and substances | 7.3 | |
| 1.6.1 Machinery maintenance | 7.14 | |
| 1.6.2 Access to operating position and servicing points | 5.2, 6.7, 7.14 | |
| 1.6.3 Isolation of energy sources | 7.13 | |
| 1.6.4 Operator intervention | 5.2, 5.6, 5.7, 5.11, 6.7, 7.5, 7.14, 8.3 | |
| 1.6.5 Cleaning of internal parts | 7.3, 8.3 | |
| 1.7.1 Information and warnings on the machinery | 5.1, 6.3, 7.5, 8.3 | |
| 1.7.2 Warning devices | 8.1 | |
| 1.7.3 Marking of machinery | 8.2 | |
| 1.7.4 Instructions | 8.3 | |

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see www.iso.org/patents).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation on the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT) see the following URL: www.iso.org/iso/foreword.html.

The committee responsible for this document is ISO/TC 39, *Machine tools*, Subcommittee SC 4 *Woodworking machines*.

This document is intended to be used in conjunction with ISO 19085-1, which gives requirements common to different machine types.

A list of all parts in the ISO 19085 series can be found on the ISO website.

ISO 19085-5:2017(E)

Introduction

The ISO 19085 series of International Standards provides technical safety requirements for the design and construction of woodworking machinery. It concerns designers, manufacturers, suppliers and importers of the machines specified in the Scope. It also includes a list of informative items that the manufacturer will need to give to the user.

This document is a type-C standard as stated in ISO 12100.

The machinery concerned and the extent to which hazards, hazardous situations or hazardous events are covered are indicated in the Scope of this part of ISO 19085.

When requirements of this type-C standard are different from those which are stated in type-A or type-B standards, the requirements of this type-C standard take precedence over the requirements of the other standards for machines that have been designed and built according to the requirements of this type-C standard.

The full set of requirements for a particular type of woodworking machine are those given in the part of ISO 19085 applicable to that type, together with the relevant requirements from ISO 19085-1:2017, to the extent specified in the Scope of the applicable part of ISO 19085.

As far as possible, in parts of ISO 19085 other than ISO 19085-1:2017, safety requirements are referenced to the relevant sections of ISO 19085-1:2017, to avoid repetition and reduce their length. The other parts contain replacements and additions to the common requirements given in ISO 19085-1:2017.

Thus, [Clauses 5, 6, 7 and 8](#), with their subclauses and the annexes of this part can either

- confirm as a whole,
- confirm with additions,
- exclude in total, or
- replace with specific text,

the corresponding subclauses or annexes of ISO 19085-1:2017.

This interrelation is indicated in the first paragraph of each subclause or annex right after the title by one of the following statements:

- “This subclause of ISO 19085-1:2017 applies.”;
- “This subclause of ISO 19085-1:2017 applies with the following additions.”, or “This subclause of ISO 19085-1:2017 applies with the following additions, subdivided into further specific subclauses.”;
- “This subclause of ISO 19085-1:2017 does not apply.”;
- “This subclause of ISO 19085-1:2017 is replaced by the following text.”, or “This subclause of ISO 19085-1:2017 is replaced by the following text, subdivided into further specific subclauses.”.

Specific subclauses and annexes in this part of ISO 19085 without correspondent in ISO 19085-1:2017 are indicated by the introductory sentence: “Subclause (or annex) specific to this part of ISO 19085.”

[Clauses 1, 2, 4](#) replace the correspondent clauses of ISO 19085-1:2017, with no need for indication since they are specific to each part of the series.

NOTE Requirements for tools are given in EN 847-1:2013 and EN 847-2:2013.

Woodworking machines — Safety —

Part 5: Dimension saws

1 Scope

This document gives the safety requirements and measures for stationary and displaceable dimension saws, hereinafter referred to as “machines”, designed to cut wood and material with similar physical characteristics to wood.

NOTE 1 For the definitions of stationary and displaceable machines, see ISO 19085-1:2017, 3.4 and 3.5.

It deals with all significant hazards, hazardous situations and events as listed in [Clause 4](#), relevant to the machines, when operated, adjusted and maintained as intended and under the conditions foreseen by the manufacturer including reasonably foreseeable misuse. Also, transport, assembly, dismantling, disabling and scrapping phases have been taken into account.

NOTE 2 For relevant but not significant hazards, e.g. sharp edges of the machine frame, see ISO 12100.

It is also applicable to machines fitted with one or more of the following devices/additional working units, whose hazards have been dealt with:

- device for the main saw blade and scoring saw blade to be raised and lowered;
- device to tilt the main saw blade and scoring saw blade for angled cutting;
- device for scoring;
- device for grooving with milling tool with a width not exceeding 20 mm;
- demountable power feed unit;
- post-formed edge pre-cutting unit;
- power-operated sliding table;
- workpiece clamping.

NOTE 3 Dimension saws are used for ripping, cross cutting, dimensioning and grooving.

It is not applicable to machines intended for use in potentially explosive atmospheres or to machines manufactured prior to the date of its publication.

2 Normative references

The following documents are referred to in the text in such a way that some or all of their content constitutes requirements of this document. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.
