Bio-based products - Requirements for Business-to-Consumer communication and claims

I.S. EN 16935:2017

Incorporating amendments/corrigenda/National Annexes issued since publication:

The National Standards Authority of Ireland (NSAI) produces the following categories of formal documents:

I.S. xxx: Irish Standard — national specification based on the consensus of an expert panel and subject to public consultation.

S.R. xxx: Standard Recommendation — recommendation based on the consensus of an expert panel and subject to public consultation.

SWiFT xxx: A rapidly developed recommendatory document based on the consensus of the participants of an NSAI workshop.

This document replaces/revises/consolidates the NSAI adoption of the document(s) indicated on the CEN/CENELEC cover/Foreword and the following National document(s):

NOTE: The date of any NSAI previous adoption may not match the date of its original CEN/CENELEC document.

National Foreword

I.S. EN 16935:2017 is the adopted Irish version of the European Document EN 16935:2017, Bio-based products - Requirements for Business-to-Consumer communication and claims

This document does not purport to include all the necessary provisions of a contract. Users are responsible for its correct application.

For relationships with other publications refer to the NSAI web store.

Compliance with this document does not of itself confer immunity from legal obligations.

In line with international standards practice the decimal point is shown as a comma (,) throughout this document.

NORME EUROPÉENNE

EUROPÄISCHE NORM

May 2017

ICS 13.020.55

English Version

Bio-based products - Requirements for Business-to-Consumer communication and claims

Produits biosourcés - Exigences relatives à la communication et aux déclarations entre entreprise et consommateur

Biobasierte Produkte - Anforderungen an die Aussagen von Unternehmen und die Kommunikation zwischen Unternehmen und Verbrauchern

This European Standard was approved by CEN on 13 February 2017.

CEN members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration. Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the CEN-CENELEC Management Centre or to any CEN member.

This European Standard exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CEN member into its own language and notified to the CEN-CENELEC Management Centre has the same status as the official versions.

CEN members are the national standards bodies of Austria, Belgium, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, Former Yugoslav Republic of Macedonia, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Romania, Serbia, Slovakia, Slovenia, Spain, Sweden, Switzerland, Turkey and United Kingdom.

European foreword

This document (EN 16935:2017) has been prepared by Technical Committee CEN/TC 411 “Bio-based products”, the secretariat of which is held by NEN.

This European Standard shall be given the status of a national standard, either by publication of an identical text or by endorsement, at the latest by November 2017, and conflicting national standards shall be withdrawn at the latest by November 2017.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. CEN shall not be held responsible for identifying any or all such patent rights.

This document has been prepared under a mandate given to CEN by the European Commission and the European Free Trade Association.

According to the CEN-CENELEC Internal Regulations, the national standards organisations of the following countries are bound to implement this European Standard: Austria, Belgium, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, Former Yugoslav Republic of Macedonia, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Romania, Serbia, Slovakia, Slovenia, Spain, Sweden, Switzerland, Turkey and the United Kingdom.

EN 16935:2017 (E)

Introduction

Bio-based products from forestry and agriculture have a long history of application, such as paper, board and various chemicals and materials. The last decades have seen the emergence of new bio-based products in the market. Some of the reasons for the increased interest lie in the bio-based products' benefits in relation to the depletion of fossil resources and climate change. Bio-based products may also provide additional product functionalities. This has triggered a wave of innovation with the development of knowledge and technologies allowing new transformation processes and product development.

Acknowledging the need for common standards for bio-based products, the European Commission issued mandate M/492, resulting in a series of standards developed by CEN/TC 411, with a focus on bio-based products other than food, feed and biomass for energy applications.

The standards of CEN/TC 411 "Bio-based products" provide a common basis on the following aspects:

- common terminology;
- bio-based content determination;
- Life Cycle Assessment (LCA);
- sustainability aspects;
- declaration tools.

It is important to understand what the term bio-based product covers and how it is being used. The term 'bio-based' means 'derived from biomass'. Bio-based products (bottles, insulation materials, wood and wood products, paper, solvents, chemical intermediates, composite materials, etc.) are products which are wholly or partly derived from biomass. It is essential to characterize the amount of biomass contained in the product by for instance its bio-based content or bio-based carbon content.

The bio-based content of a product does not provide information on its environmental impact or sustainability, which may be assessed through LCA and sustainability criteria. In addition, transparent and unambiguous communication within bio-based value chains is facilitated by a harmonized framework for certification and declaration.

The prefix "bio" frequently appears in everyday language in terms such as "bioproduct" (where "product" can be substituted by e.g. lubricant), mainly as marketing tools. Detergents and plastic products are other examples of the widespread use of the "bio" prefix. Without reference to clear and agreed definitions, there are many unsubstantiated claims, which can be deceptive.

The term "biomass-based" or "bio-based" refers to the origin of the raw material. The prefix "bio" can refer to different functionalities (biodegradable, biocompatible, etc.) or processing (biological or biotechnological processes).

The objective of this European Standard is to harmonize the use of claims which are relevant to describe the characteristics of bio-based products for business to consumer communication. This is done by defining criteria for credible, transparent and non-misleading communication, based on the general principles outlined in ISO 14020. Thereby, ensuring that the information is easily available and understandable to the consumer.

This standard applies to organisations that place bio-based products on the market and wish to inform the consumers about the specific characteristics of such bio-based products.

1 Scope

This European Standard specifies requirements for transparent and non-misleading business-to-consumer communication of characteristics of bio-based products by means of labelling and claims. It does not specify requirements for bio-based products.

This European Standard is intended to be used as a tool to generate and transfer information to the consumer and/or as an input for product-specific standards and certification schemes.

Business to business communication is covered by EN 16848.[1]

NOTE This standard is applicable to all claims which are based on or make reference to bio-based content (e.g. vegetable-based, plant-based).

2 Normative references

The following documents, in whole or in part, are normatively referenced in this document and are indispensable for its application. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.

EN 16760:2015, *Bio-based products - Life Cycle Assessment*

EN 16575, *Bio-based products - Vocabulary*

EN 16785-1, *Bio-based products - Bio-based content - Part 1: Determination of the bio-based content using the radiocarbon analysis and elemental analysis*

prEN 16785-2, *Bio-based products - Bio-based content - Part 2: Determination of the bio-based content using the material balance method*

EN 16848, *Bio-based products — Requirements for Business to Business communication of characteristics using a Data Sheet*

EN ISO 14020, *Environmental labels and declarations - General principles (ISO 14020)*

EN ISO 14021, *Environmental labels and declarations - Self-declared environmental claims (Type II environmental labelling) (ISO 14021)*

3 Terms and definitions

For the purposes of this document, the terms and definitions given in EN 16848 and EN 16575 and the following apply.

3.1

claim

label

declaration

statement, symbol or graphic that indicates an aspect of a bio-based product

Note 1 to entry: It may take the form of a statement, symbol or graphic on a product or package label, in product literature, in technical bulletins, in advertising or in publicity, amongst other things.

[adapted from EN ISO 14021:2016, modified: 'environmental' removed from term. 'product, a component or packaging' replaced by 'bio-based product', original note removed]
