Irish Standard
I.S. EN 50131-5-3:2017

Alarm systems - Intrusion systems - Part 5-3: Requirements for interconnections equipment using radio frequency techniques

I.S. EN 50131-5-3:2017

Incorporating amendments/corrigenda/National Annexes issued since publication:

The National Standards Authority of Ireland (NSAI) produces the following categories of formal documents:

I.S. xxx: Irish Standard — national specification based on the consensus of an expert panel and subject to public consultation.

S.R. xxx: Standard Recommendation — recommendation based on the consensus of an expert panel and subject to public consultation.

SWiFT xxx: A rapidly developed recommendatory document based on the consensus of the participants of an NSAI workshop.

This document replaces/revises/consolidates the NSAI adoption of the document(s) indicated on the CEN/CENELEC cover/Foreword and the following National document(s):

NOTE: The date of any NSAI previous adoption may not match the date of its original CEN/CENELEC document.

This document is based on:	*Published:*

National Foreword

I.S. EN 50131-5-3:2017 is the adopted Irish version of the European Document EN 50131-5-3:2017, Alarm systems - Intrusion systems - Part 5-3: Requirements for interconnections equipment using radio frequency techniques

This document does not purport to include all the necessary provisions of a contract. Users are responsible for its correct application.

For relationships with other publications refer to the NSAI web store.

Compliance with this document does not of itself confer immunity from legal obligations.

In line with international standards practice the decimal point is shown as a comma (,) throughout this document.

EUROPEAN STANDARD

NORME EUROPÉENNE

EUROPÄISCHE NORM

EN 50131-5-3

March 2017

ICS 13.310

Supersedes EN 50131-5-3:2005

English Version

Alarm systems - Intrusion systems - Part 5-3: Requirements for interconnections equipment using radio frequency techniques

Systèmes d'alarme - Systèmes d'alarme contre l'intrusion - Partie 5-3: Exigences pour les équipements d'interconnexion utilisant des techniques radio

Alarmanlagen - Einbruch- und Überfallmeldeanlagen - Teil 5-3: Anforderungen an Übertragungsgeräte, die Funkfrequenz-Techniken verwenden

This European Standard was approved by CENELEC on 2016-11-14. CENELEC members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration.

Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the CEN-CENELEC Management Centre or to any CENELEC member.

This European Standard exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CENELEC member into its own language and notified to the CEN-CENELEC Management Centre has the same status as the official versions.

CENELEC members are the national electrotechnical committees of Austria, Belgium, Bulgaria, Croatia, Cyprus, the Czech Republic, Denmark, Estonia, Finland, Former Yugoslav Republic of Macedonia, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, the Netherlands, Norway, Poland, Portugal, Romania, Serbia, Slovakia, Slovenia, Spain, Sweden, Switzerland, Turkey and the United Kingdom.

European foreword

This document (EN 50131-5-3:2017) has been prepared by CLC/TC 79 “Alarm systems”.

The following dates are fixed:

• latest date by which this document has to be implemented at national level by publication of an identical national standard or by endorsement	(dop)	2017-09-17
• latest date by which the national standards conflicting with this document have to be withdrawn	(dow)	2020-03-17

This document supersedes EN 50131-5-3:2005.

This document is bound to be used in conjunction with the other parts of the EN 50131 series that define the functional requirements of the equipment regardless of the type of interconnections used.

EN 50131-5 is currently composed with the following parts:

— CLC/FprTS 50131-5-1 *Alarm systems — Intrusion systems — Part 5-1: Interconnections — Requirements for wired Interconnection for I&HAS equipments located in supervised premises*;

— EN 50131-5-3, *Alarm systems — Intrusion systems — Part 5-3: Requirements for interconnections equipment using radio frequency techniques*;

— CLC/TS 50131-5-4, *Alarm systems — Intrusion and hold-up systems — Part 5-4: System compatibility testing for I&HAS equipments located in supervised premises*.

1 Scope

This European Standard applies to intrusion alarm equipment using radio frequency (RF) links and located on protected premises. It does not cover long-range radio transmissions.

This European Standard defines the terms used in the field of intrusion alarm equipment using radio frequency links as well as the requirements relevant to the equipment.

2 Normative references

The following documents, in whole or in part, are normatively referenced in this document and are indispensable for its application. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.

EN 50131-1:2006, *Alarm systems - Intrusion and hold-up systems - Part 1: System requirements*

EN 50131-3, *Alarm systems - Intrusion and hold-up systems - Part 3: Control and indicating equipment*

3 Terms, definitions and abbreviated terms

3.1 Terms and definitions

For the purpose of this document, the following terms and definitions apply.

3.1.1
alarm message
message conveying information regarding intruder, tamper or fault alarms

3.1.2
assigned band
frequency band within which the equipment is authorized to operate

3.1.3
attenuation
degradation of the RF signal due to a change in the passive environment of the system after its installation

EXAMPLE Creation, relocation or reflection or absorption materials.

3.1.4
collision
simultaneous transmissions from two or more RF communication devices belonging to the same system, of sufficient signal strength to cause corruption or obliteration of the RF signals

3.1.5
collision probability
likelihood of two or more messages having part or all of their information coincident on the RF link leading to a collision

3.1.6
communication link
all local RF equipment, media and protocols used to route alarm system messages
