Standards

Irish Standard
I.S. EN 12080:2017

Railway applications - Axleboxes - Rolling bearings

I.S. EN 12080:2017

Incorporating amendments/corrigenda/National Annexes issued since publication:

The National Standards Authority of Ireland (NSAI) produces the following categories of formal documents:

I.S. xxx: Irish Standard — national specification based on the consensus of an expert panel and subject to public consultation.

S.R. xxx: Standard Recommendation — recommendation based on the consensus of an expert panel and subject to public consultation.

SWiFT xxx: A rapidly developed recommendatory document based on the consensus of the participants of an NSAI workshop.

This document replaces/revises/consolidates the NSAI adoption of the document(s) indicated on the CEN/CENELEC cover/Foreword and the following National document(s):

NOTE: The date of any NSAI previous adoption may not match the date of its original CEN/CENELEC document.

This document is based on:

National Foreword

I.S. EN 12080:2017 is the adopted Irish version of the European Document EN 12080:2017, Railway applications - Axleboxes - Rolling bearings

This document does not purport to include all the necessary provisions of a contract. Users are responsible for its correct application.

For relationships with other publications refer to the NSAI web store.

Compliance with this document does not of itself confer immunity from legal obligations.

In line with international standards practice the decimal point is shown as a comma (,) throughout this document.

Railway applications - Axleboxes - Rolling bearings

Applications ferroviaires - Boîtes d'essieux -
Roulements

Bahnanwendungen - Radsatzlager - Wälzlager

This European Standard was approved by CEN on 19 June 2017.

CEN members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration. Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the CEN-CENELEC Management Centre or to any CEN member.

This European Standard exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CEN member into its own language and notified to the CEN-CENELEC Management Centre has the same status as the official versions.

CEN members are the national standards bodies of Austria, Belgium, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, Former Yugoslav Republic of Macedonia, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Romania, Serbia, Slovakia, Slovenia, Spain, Sweden, Switzerland, Turkey and United Kingdom.

EN 12080:2017 (E)**European foreword**

This document (EN 12080:2017) has been prepared by Technical Committee CEN/TC 256 “Railway Applications”, the secretariat of which is held by DIN.

This European Standard shall be given the status of a national standard, either by publication of an identical text or by endorsement, at the latest by March 2018, and conflicting national standards shall be withdrawn at the latest by March 2018.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. CEN [and/or CENELEC] shall not be held responsible for identifying any or all such patent rights.

This document supersedes EN 12080:2007+A1:2010.

The main changes with respect to the previous edition are listed below:

- The list of normative references has been changed. Some references have been added;
- The list of “Terms and definitions” has been changed and new items added, e.g. “Supplier” has been replaced by “Manufacturer”;
- Clause 4 that regulates “Information and requirements to be agreed and documented” has changed significantly, and 4.3 and 4.4 have been removed;
- The definition of “Dimensional stability” in Clause 6.2 is new and a new requirement for retained austenite for through hardened rings has been added;
- Clause 6.3 about “Traceability” is re-written with new requirements;
- Clause 6.4 about “Coatings” is new;
- Clause 7 about “Material properties” has new requirements on “Chemical composition” and “Inclusion content”;
- Clause 10 “Physical properties” has several changes, e.g. the definition of “Soundness class” as well as that “Steel riveted brass cages” are no longer allowed;
- Clause 11 “Marking” is now more detailed and specifies marking of different “bearing types” – country of origin is no longer compulsory;
- The inspection plan in Clause 12 has been extended;
- A requirement for archiving of documents relating to quality records has been added in Clause 13;
- In Clause 14 a requirement for informing about changes relating to product approval has been added;
- Clause 15 has changes relating to grease batch approval, corrosion protection and packaging;
- In Annex A there are changes to the specification of “Preparation of rings”;
- In Annex B there are changes to the specification of “Equipment”;

- Annex D is now normative and has significant changes;
- Annex F is now normative and more specific on some criteria;
- Annex G is a new informative annex giving an example of an axlebox assembly.

This document has been prepared under a mandate given to CEN by the European Commission and the European Free Trade Association, and supports essential requirements of EU Directive 2008/57/EC.

For relationship with EU Directive 2008/57/EC, see informative Annex ZA, which is an integral part of this document.

According to the CEN-CENELEC Internal Regulations, the national standards organisations of the following countries are bound to implement this European Standard: Austria, Belgium, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, Former Yugoslav Republic of Macedonia, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Romania, Serbia, Slovakia, Slovenia, Spain, Sweden, Switzerland, Turkey and the United Kingdom.

EN 12080:2017 (E)

Introduction

This standard is part of a set of standards: EN 12080, EN 12081 and EN 12082.

This European Standard has been drawn up with the purpose of aiming at optimum performance in rail transportation. Performance implies a certain quality level of the vehicle running gear, which every railway undertaking may require, notably by imposing procedures in approval and requesting the existence of a quality assurance system for the supply of rolling bearings intended for rolling stock operating on its network or other networks in Europe.

1 Scope

This European Standard specifies the quality parameters of axlebox rolling bearings supporting the load of the vehicle, required for reliable operation of trains on European networks. It covers metallurgical and material properties as well as geometric and dimensional characteristics. It also defines methods for quality assurance and conditions for approval of the products.

2 Normative references

The following documents, in whole or in part, are normatively referenced in this document and are indispensable for its application. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.
