Irish Standard Recommendation  
S.R. CWA 17357:2019

# Urban search and rescue (USaR) robotic platform technical and procedural interoperability - Guide

**S.R. CWA 17357:2019**

*Incorporating amendments/corrigenda/National Annexes issued since publication:*

The National Standards Authority of Ireland (NSAI) produces the following categories of formal documents:

I.S. xxx: Irish Standard — national specification based on the consensus of an expert panel and subject to public consultation.

S.R. xxx: Standard Recommendation — recommendation based on the consensus of an expert panel and subject to public consultation.

SWiFT xxx: A rapidly developed recommendatory document based on the consensus of the participants of an NSAI workshop.

*This document replaces/revises/consolidates the NSAI adoption of the document(s) indicated on the CEN/CENELEC cover/Foreword and the following National document(s):*

*NOTE: The date of any NSAI previous adoption may not match the date of its original CEN/CENELEC document.*

*This document is based on:*

CWA 17357:2019

*Published:*

2019-02-27

*This document was published under the authority of the NSAI and comes into effect on:*

2019-03-17

## National Foreword

S.R. CWA 17357:2019 is the adopted Irish version of the European Document CWA 17357:2019, Urban search and rescue (USaR) robotic platform technical and procedural interoperability - Guide

This document does not purport to include all the necessary provisions of a contract. Users are responsible for its correct application.

For relationships with other publications refer to the NSAI web store.

**Compliance with this document does not of itself confer immunity from legal obligations.**

*In line with international standards practice the decimal point is shown as a comma (,) throughout this document.*

## Urban search and rescue (USaR) robotic platform technical and procedural interoperability - Guide

This CEN Workshop Agreement has been drafted and approved by a Workshop of representatives of interested parties, the constitution of which is indicated in the foreword of this Workshop Agreement.

The formal process followed by the Workshop in the development of this Workshop Agreement has been endorsed by the National Members of CEN but neither the National Members of CEN nor the CEN-CENELEC Management Centre can be held accountable for the technical content of this CEN Workshop Agreement or possible conflicts with standards or legislation.

This CEN Workshop Agreement can in no way be held as being an official standard developed by CEN and its Members.

This CEN Workshop Agreement is publicly available as a reference document from the CEN Members National Standard Bodies.

CEN and CENELEC members are the national standards bodies and national electrotechnical committees of Austria, Belgium, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, Former Yugoslav Republic of Macedonia, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Romania, Serbia, Slovakia, Slovenia, Spain, Sweden, Switzerland, Turkey and United Kingdom.

## European foreword

This CEN-CENELEC Workshop Agreement has been drafted and approved by a workshop of representatives of interested parties on 2018-11-13, the constitution of which was supported by CEN-CENELEC following the public call for participation made on 2018-05-09.

The CEN-CENELEC Workshop offers a platform whereby stakeholders can discuss and resolve standardization issues by consensus and validation in an open process.

The main activity of a CEN-CENELEC Workshop is the development and publication of a CEN-CENELEC Workshop Agreement (CWA). The CWA is a voluntary standard applicable internationally and does not have the force of regulation. A CWA can be an initial step in the development of a European standard.

The development of CWA 17357, *Urban search and rescue (USaR) robotic platform technical and procedural interoperability – Guide*, has received funding from the European Union's Seventh Framework Programme (FP7/2007-2013) under grant agreement no.607522INACHUS.

The secretariat was held by the British National Standards Body, BSI. A list of the individuals and organizations which supported the technical consensus represented by the CEN Workshop Agreement is available to purchasers from the CEN-CENELEC Management Centre. These are listed below:

- Airbus
- BYTE
- CLAWAR Association Ltd
- Crisisplan
- DIGINEXT
- EXODUS SA
- FUNDACION TEKNIKER
- Kangwon University
- SINTEF
- TELINT RTD Consultancy Services Ltd
- The Institute of Communication and Computer Systems (ICCS)

Along with the following individuals:

- Dr Angelos Amditis, Chair
- Dr Vasilis Sourlas, Vice-Chair

Those CEN-CENELEC Technical committees supporting technical consensus are as follows:

- CLC/TC 79 Alarm systems

CWA 17357:2019

The formal process followed by the Workshop in the development of the CEN-CENELEC Workshop Agreement has been endorsed by the National Members of CEN but neither the National Members of CEN nor the CEN-CENELEC Management Centre can be held accountable for the technical content of the CEN-CENELEC Workshop Agreement or possible conflict with standards or legislation. This CEN-CENELEC Workshop Agreement can in no way be held as being an official standard developed by CEN-CENELEC and its members.

The final review/endorsement round for this CWA was started in October 2018 and was successfully closed in November 2018. The final text of this CWA was submitted to CEN for publication in November 2018.

This CEN-CENELEC Workshop Agreement is publically available as a reference document from the National Members of the following countries: Austria, Belgium, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, Former Yugoslav Republic of Macedonia, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Romania, Serbia, Slovakia, Slovenia, Spain, Sweden, Switzerland, Turkey and the United Kingdom.

Comments or suggestions from the users of the CEN-CENELEC Workshop Agreement are welcome and should be addressed to the CEN-CENELEC Management Centre.

## **Introduction**

This CWA provides specific information on technical content where this is deemed to be necessary for the application of the CWA. It contains background to the project, guidance on the approach taken and an explanation of any new concepts that the CWA is based on.

This document constitutes a CEN Workshop Agreement (CWA) that represents a consensus among the participants of the Workshop and gives guidance on the technical and procedural interoperability of urban search and rescue (USaR) robotic platforms.

CWA 17357:2019

## 1 Scope

This CWA provides recommendations to enable technical interoperability (hardware, software) between urban search and rescue (USaR) robotic platforms and the equipment, sensors and tools that are attached to them. This CWA also provides guidance on the principles for enabling USaR robotic platforms (various types of them such as drones, snake-like, robots with wheels, legs, etc.) to operate in all ground search environments. In this way a generic platform can be adapted, designed and built for any possible search and rescue (SaR) scenario on the ground.

The CWA is for use by organizations responsible for designing, manufacturing, configuring, customizing and maintaining USaR robotic platforms, tools, equipment and sensors (e.g. drones, snake-like robots, mobile robots with wheels, cameras, lasers, environmental analysis sensors, etc.).

The CWA is also for use by integrators and providers of SaR support systems in general.

The CWA is of interest to first responder organizations, operators of the USaR systems, public authorities and end-users in the field dealing with USaR mission organization and execution.

The CWA is also of interest in the procurement of USaR platforms.

## 2 Normative references

The following documents are referred to in the text in such a way that some or all of their content constitutes requirements of this document. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.
