National Foreword

I.S. EN 16942:2016 is the adopted Irish version of the European Document EN 16942:2016, Fuels - Identification of vehicle compatibility - Graphical expression for consumer information

EN 16942:2016 requires that each country implementing this standard establishes a national annex detailing requirements for an identifier system for marketed liquid and gaseous fuels. The identifier is intended to be visualised at dispensers and refuelling points.

To address the requirements introduced by EN 16942:2016, a National Annex will need to be drafted. The draft National Annex will then need to go for public consultation and approval prior to their publication.

Once approved for publication, the new National Annex will become available for use EN 16942:2016.

This document does not purport to include all the necessary provisions of a contract. Users are responsible for its correct application.

Compliance with this document does not of itself confer immunity from legal obligations.

In line with international standards practice the decimal point is shown as a comma (,) throughout this document.
