English version

**Electricity metering equipment (a.c.)  
Part 2: Particular requirements -  
Electromechanical meters for active energy  
(class indexes A and B)**

Equipement de comptage  
d'électricité (c.a.)  
Partie 2: Prescriptions particulières -  
Compteurs électromécaniques  
d'énergie active  
(classes de précision A et B)

Wechselstrom-Elektrizitätszähler  
Teil 2: Besondere Anforderungen -  
Elektromechanische  
Wirkverbrauchszähler  
der Genauigkeitsklassen A und B

This European Standard was approved by CENELEC on 2006-05-01. CENELEC members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration.

Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the Central Secretariat or to any CENELEC member.

This European Standard exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CENELEC member into its own language and notified to the Central Secretariat has the same status as the official versions.

CENELEC members are the national electrotechnical committees of Austria, Belgium, Cyprus, the Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, the Netherlands, Norway, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, Sweden, Switzerland and the United Kingdom.

## Foreword

This European Standard was prepared by the Technical Committee CENELEC TC 13, Equipment for electrical energy measurement and load control.

The text of the draft was submitted to the Unique Acceptance Procedure and was approved by CENELEC as EN 50470-2 on 2006-05-01.

The following dates were fixed:

- latest date by which the EN has to be implemented at national level by publication of an identical national standard or by endorsement (dop) 2007-05-01
- latest date by which the national standards conflicting with the EN have to be withdrawn (dow) 2009-05-01

This EN 50470-2 is related to EN 62053-11:2003, *Electricity metering equipment (a.c.) – Particular requirements – Part 11: Electromechanical meters for active energy (classes 0,5, 1 and 2)*.

The structure of the two standards is similar, modifications in this European Standard are provided in the perspective of compliance with the Essential Requirements of the Directive 2004/22/EC on Measuring Instruments (MID).

This standard is to be used with EN 50470-1:2006, *Electricity metering equipment (a.c.) – Part 1: General requirements, tests and test conditions – Metering equipment (class indexes A, B and C)*.

This European Standard has been prepared under a mandate given to CENELEC by the European Commission and the European Free Trade Association and covers essential requirements of EC Directive 2004/22/EC. See Annex ZZ.

## Contents

1	Scope.....	5
2	Normative references .....	5
3	Terms, definitions and abbreviations .....	5
4	Standard electrical values .....	6
5	Mechanical requirements.....	6
5.1	General .....	6
5.2	Register (counting mechanism) .....	6
5.3	Direction of rotation and marking of the rotor.....	6
6	Climatic conditions .....	6
7	Electrical requirements.....	6
7.1	Power consumption.....	6
7.1.1	Measuring method .....	6
7.1.2	Voltage circuits.....	7
7.1.3	Current circuits .....	7
7.2	AC voltage test.....	7
8	Accuracy requirements and tests.....	9
8.1	Limits of percentage error due to variation of the load .....	9
8.2	Repeatability .....	9
8.3	Limits of additional percentage error due to influence quantities.....	9
8.4	Maximum permissible error (MPE).....	11
8.5	Effect of disturbances of long duration.....	11
8.6	Short time overcurrents .....	13
8.7	Performing the tests .....	13
8.7.1	Accuracy test conditions.....	13
8.7.2	Accuracy test at reference conditions .....	15
8.7.3	Interpretation of accuracy test results .....	15
8.7.4	Repeatability .....	15
8.7.5	Test of effects of influence quantities.....	15
8.7.6	Calculation of the composite error .....	16
8.7.7	Test of effects of disturbances of long duration.....	16
8.7.8	Short time overcurrents .....	19
8.7.9	Test of starting and no-load condition .....	19
8.7.10	Meter constant.....	20
8.7.11	Adjustment .....	20
9	Durability.....	21
10	Reliability .....	21
11	Protection against corruption.....	21
	Annex A (informative) Calculation of the composite error.....	22
	Annex B (normative) Test circuit diagram for the test of immunity to earth fault .....	23
	Annex ZZ (informative) Coverage of Essential Requirements of EC Directives.....	24
	Bibliography.....	25

**Figures**

Figure B.1 – Circuit to simulate earth fault condition in phase 1 .....	23
Figure B.2 – Voltages at the meter under test .....	23

**Tables**

Table 1 – Power consumption in voltage circuits .....	7
Table 2 – Power consumption in current circuits .....	7
Table 3 – AC voltage tests .....	8
Table 4 – Percentage error limits at reference conditions (single-phase meters and polyphase meters with balanced loads) .....	9
Table 5 – Percentage error limits at reference conditions (polyphase meters carrying a single-phase load, but with balanced polyphase voltages applied to voltage circuits) .....	9
Table 6 – Limits of additional percentage error due to influence quantities (single-phase meters and polyphase meters with balanced loads).....	10
Table 7 – Limits of additional percentage error due to influence quantities (polyphase meters carrying a single phase load, but with balanced polyphase voltages applied to voltage circuits).....	10
Table 8 – Maximum permissible error (MPE).....	11
Table 9 – Effect of disturbances of long duration – Critical change values .....	12
Table 10 – Effect of short time overcurrents – Critical change value .....	13
Table 11 – Voltage and current balance .....	13
Table 12 – Reference conditions .....	14
Table 13 – Test points for determining the intrinsic error and the additional percentage error due to influence quantities .....	15
Table 14 – Interpretation of test results.....	15
Table 15 – Starting current .....	20
Table 16 – Minimum range of adjustment.....	20
