Irish Standard Recommendation
S.R. CEN/TR 16396:2020

Playground equipment for children -
Replies to requests for interpretation of
EN 1176 and its parts

S.R. CEN/TR 16396:2020

Incorporating amendments/corrigenda/National Annexes issued since publication:

The National Standards Authority of Ireland (NSAI) produces the following categories of formal documents:

I.S. xxx: Irish Standard — national specification based on the consensus of an expert panel and subject to public consultation.

S.R. xxx: Standard Recommendation — recommendation based on the consensus of an expert panel and subject to public consultation.

SWiFT xxx: A rapidly developed recommendatory document based on the consensus of the participants of an NSAI workshop.

This document replaces/revises/consolidates the NSAI adoption of the document(s) indicated on the CEN/CENELEC cover/Foreword and the following National document(s):

NOTE: The date of any NSAI previous adoption may not match the date of its original CEN/CENELEC document.

This document is based on:

CEN/TR 16396:2020

CEN/TR 16396:2020 (E)

European foreword

This document (CEN/TR 16396:2020) has been prepared by Technical Committee CEN/TC 136 “Sports, playground and other recreational facilities and equipment”, the secretariat of which is held by DIN.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. CEN shall not be held responsible for identifying any or all such patent rights.

This document supersedes CEN/TR 16396:2012.

Introduction

Interpretations and no-action decisions

This document contains all interpretation of TR 16396 to the end of 2017. It should bring a close to all interpretations made to the 2008 version of EN 1176 and all of its specific parts that were also revised in 2017. It contains replies to requests for interpretations concerning the understanding of clauses in the 2008 edition of EN 1176 series. The replies concern those requests that have resulted in an interpretation or a decision that no action is required as the standard is sufficiently clear.

An interpretation does not have the same status as the text of the standard. However, following an interpretation gives assurance that the relevant clause of the standard has been correctly applied. An interpretation is a clarification of the meaning of the standard. This TR covers requests from 2011 to the end of 2017.

Disclaimer

The interpretations have been prepared by the interpretation panel of CEN/TC 136/SC1 committee according to agreed process and finally confirmed by the whole SC1 committee prior to responding back to the enquiring National Standard Body. The information contained herein should always be considered in association with the original 2008 edition of EN 1176 series published text.

Requests for interpretations may be submitted by a CEN member body through its national committee or by a CEN/TC 136 liaison (but not directly by an individual or a company) – in accordance with the interpretation protocols agreed by CEN/TC 136/SC1. The requests are then channelled to the CEN/TC 136/SC1 interpretation panel, which will then deal with the request.

A request for an interpretation may lead to:

- a) *an interpretation of the standard with no action to the standard (no revision and no amendment)*

This should reflect a reasonable interpretation of how the standard should be used, taking into account:

- 1) the wording of the standard;
- 2) the rationale of the standard;
- 3) the history of the standard.

This is also applicable when it is agreed that the standard appropriately specifies how playground equipment shall be assessed.

- b) *a proposal for an amendment of the standard*

This is applicable when it is agreed that the standard is deficient in some way.

NOTE Interpretation and no-action decisions are published in CEN/TR 16396 which will be updated on a regular basis. Proposals for amendments will be progressed as new work item proposals in accordance with CEN rules.

- c) a future revision

It is not within the interpretation protocol to carry out new work that was not previously covered within the published EN 1176 series parts and clauses. Future work requests should always be raised by National Standard Bodies using the “Future work request template” to ensure full

CEN/TR 16396:2020 (E)

consideration is given to the necessity and possible consequences, before starting any new work on EN 1176 series.

Answers to requests for interpretations

Since requests for interpretations are submitted through a CEN member body, it is assumed that the member body will keep itself informed about decisions concerning the request and its progress and will itself inform the originator of the request as appropriate.

The following information requests have been included in this Technical Report:

2009

2009-01 DS — Part 4 — 4.5

2009-02 DS — Part 10 — 4.3.7

CEN/TR 16396:2020 (E)

1 Scope

The purpose of this document is to publish replies to requests for interpretations, to all parts of EN 1176 series, which have been drafted by the interpretation panel and confirmed by CEN/TC 136/S C1 “Playground equipment for children”.

2 Normative References

There are no normative references in this document.

3 Terms and definitions

No terms and definitions are listed in this document.

ISO and IEC maintain terminological databases for use in standardization at the following addresses:

- IEC Electropedia: available at <http://www.electropedia.org/>
- ISO Online browsing platform: available at <http://www.iso.org/obp>

4 EN 1176-1:2008, *Playground equipment and surfacing — Part 1: General safety requirements and test method*

4.1 General (interpretation request 2010-09 — SII)

Question

1. We would appreciate a formal answer from the TC 136/WG in relation to how to test the “rope carousel” and to provide an explanation for the rationale for testing them only according to EN 1176-1 and not according to EN 1176-5?
2. During that period our WG discussed the EN 1176-1:2008 standard and now have a few questions:
 - a) We need to obtain the position regarding the criteria for fire resistance of playground equipment placed mainly in open areas.
 - b) We need to obtain an explanation as to why the instructions for tests of playground equipment in accordance with EN 1021 series have been deleted.
 - c) Why are there no clear instructions besides the regulations of the countries as to where the equipment is assembled?
3. We are also involved with musical playground equipment (see attached photographs). Would the requirements of EN 1176-1 be applicable to some of them? Which types would be covered by EN 1176-1 and which would not? Is there any restriction to placing them in an area together with other playground equipment?

Reply

No action/interpretation

1. A picture of the specific product would be required to make a formal judgement.

EN 1176-1, 4.2.1 confirms; “Equipment where the primary play function is augmented by a secondary motion, e.g. rocking and/or rotating, shall conform to the additional parts of EN 1176
