Tattooing - Safe and hygienic practice

I.S. EN 17169:2020&LC:2020

Incorporating amendments/corrigenda/National Annexes issued since publication:

The National Standards Authority of Ireland (NSAI) produces the following categories of formal documents:

I.S. xxx: Irish Standard — national specification based on the consensus of an expert panel and subject to public consultation.

S.R. xxx: Standard Recommendation — recommendation based on the consensus of an expert panel and subject to public consultation.

SWiFT xxx: A rapidly developed recommendatory document based on the consensus of the participants of an NSAI workshop.

This document replaces/revises/consolidates the NSAI adoption of the document(s) indicated on the CEN/CENELEC cover/Foreword and the following National document(s):

NOTE: The date of any NSAI previous adoption may not match the date of its original CEN/CENELEC document.

English Version

Tattooing - Safe and hygienic practice

Tatouage - Bonnes pratiques d'hygiène et de salubrité

Tätowieren - Sichere und hygienische Praxis

This European Standard was approved by CEN on 9 October 2019.

CEN members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration. Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the CEN-CENELEC Management Centre or to any CEN member.

This European Standard exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CEN member into its own language and notified to the CEN-CENELEC Management Centre has the same status as the official versions.

CEN members are the national standards bodies of Austria, Belgium, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Republic of North Macedonia, Romania, Serbia, Slovakia, Slovenia, Spain, Sweden, Switzerland, Turkey and United Kingdom.

EN 17169:2020 (E)

European foreword

This document (EN 17169:2020) has been prepared by Technical Committee CEN/TC 435 “Tattooing services”, the secretariat of which is held by DIN.

This European Standard shall be given the status of a national standard, either by publication of an identical text or by endorsement, at the latest by July 2020, and conflicting national standards shall be withdrawn at the latest by July 2020.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. CEN shall not be held responsible for identifying any or all such patent rights.

According to the CEN-CENELEC Internal Regulations, the national standards organisations of the following countries are bound to implement this European Standard: Austria, Belgium, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Republic of North Macedonia, Romania, Serbia, Slovakia, Slovenia, Spain, Sweden, Switzerland, Turkey and the United Kingdom.

Introduction

This document provides requirements and recommendations on hygienic and safe tattoo practice to protect both the client and the tattooist against infection. It is essential to minimize infection risks caused by tattooing to clients, tattooists and others working in tattoo premises by use of appropriate hygiene procedures. Anyone carrying out tattooing is bound to be responsible for their own, their clients' and others' safety in respect of the tattooing process.

It is essential to also apply relevant European and national regulations, where they exist.

The verbal forms "shall" and "shall not" are used to express requirements.

The verbal forms "should" and "should not" are used to express recommendations.

The verbal forms "may" and "need not" are used to express permission.

The verbal forms "can" and "cannot" are used to express possibility and capability.

EN 17169:2020 (E)

1 Scope

This document specifies hygiene requirements before and during tattooing and for aftercare. It gives guidelines for tattooists and their routine interactions with clients and public authorities. It gives guidelines for the correct procedures to be used to ensure optimum protection of the client, the tattooist and others in the tattoo work area.

2 Normative references

The following documents are referred to in the text in such a way that some or all of their content constitutes requirements of this document. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.

EN 374 (all parts), *Protective gloves against chemicals and micro-organisms*

EN 455 (all parts), *Medical gloves for single use*

EN 1500, *Chemical disinfectants and antiseptics - Hygienic handrub - Test method and requirements (phase 2/step 2)*

EN 13060, *Small steam sterilizers*

EN ISO 11607-1, *Packaging for terminally sterilized medical devices - Part 1: Requirements for materials, sterile barrier systems and packaging systems (ISO 11607-1)*

EN ISO 17665-1, *Sterilization of health care products - Moist heat - Part 1: Requirements for the development, validation and routine control of a sterilization process for medical devices (ISO 17665-1)*

EN ISO 23907-1, *Sharps injury protection - Requirements and test methods - Part 1: Single-use sharps containers (ISO 23907-1)*

3 Terms and definitions

For the purposes of this document, the following terms and definitions apply.

ISO and IEC maintain terminological databases for use in standardization at the following addresses:

- IEC Electropedia: available at <http://www.electropedia.org/>
- ISO Online browsing platform: available at <http://www.iso.org/obp>

3.1 aftercare

care process following tattooing to promote optimal healing

3.2 body fluids

fluids such as blood, serum and other fluids that may be contaminated with these substances that present a risk of infection transmission in the context of tattooing

Note 1 to entry: Bodily fluids such as tears, sweat or vomit do not present a specific tattooing hazard.

3.3 cleaning

removal of foreign materials from a surface
