

AS/NZS 1567:1997

Reconfirmed 2021

Australian/New Zealand Standard[®]

**Copper and copper alloys—
Wrought rods, bars and sections**

AS/NZS 1567:1997

This Joint Australian/New Zealand Standard was prepared by Joint Technical Committee MT/2, Copper and Copper Alloys. It was approved on behalf of the Council of Standards Australia on 28 February 1997 and on behalf of the Council of Standards New Zealand on 24 March 1997. It was published on 5 July 1997.

The following interests are represented on Committee MT/2:

AUSTAP

Hunter Water Corporation
Metal Trades Industry Association of Australia
New Zealand Manufacturers Federation
Welding Technology Institute of Australia

Additional interests participating in preparation of Standard:

Australian Forging Group
Extruders and manufacturers

Review of Standards. To keep abreast of progress in industry, Joint Australian/New Zealand Standards are subject to periodic review and are kept up to date by the issue of amendments or new editions as necessary. It is important therefore that Standards users ensure that they are in possession of the latest edition, and any amendments thereto.

Full details of all Joint Standards and related publications will be found in the Standards Australia and Standards New Zealand Catalogue of Publications; this information is supplemented each month by the magazines 'The Australian Standard' and 'Standards New Zealand', which subscribing members receive, and which give details of new publications, new editions and amendments, and of withdrawn Standards.

Suggestions for improvements to Joint Standards, addressed to the head office of either Standards Australia or Standards New Zealand, are welcomed. Notification of any inaccuracy or ambiguity found in a Joint Australian/New Zealand Standard should be made without delay in order that the matter may be investigated and appropriate action taken.
