

Australian/New Zealand Standard™

**Geographic information — Calibration
and validation of remote sensing
imagery sensors and data**

Part 3: SAR/InSAR

SA/SNZ TS ISO 19159.3:2019

This Joint Australian/New Zealand Standard™ was prepared by Joint Technical Committee IT-004, Geographical Information/Geomatics. It was approved on behalf of the Council of Standards Australia on 3 May 2019 and by the New Zealand Standards Executive on 10 April 2019.

This Standard was published on 30 May 2019.

The following are represented on Committee IT-004:

- ANZLIC - the Spatial Information Council
- Australian Antarctic Division
- Australian Bureau of Meteorology
- Australian Bureau of Statistics
- Australian Maritime Safety Authority
- CSIRO
- Curtin University of Technology
- Department of Defence (Australian Government)
- Department of Human Services (Australian Government)
- Geoscience Australia
- Science New Zealand
- Spatial Industries Business Association
- University of Melbourne

This Standard was issued in draft form for comment as DR SA/SNZ TS ISO 19159.3:2019.

Preface

This Technical Specification was prepared by the Joint Standards Australia/Standards New Zealand Committee IT-004, Geographical Information/Geomatics.

The objective of this Technical Specification is to define the calibration of SAR/InSAR sensors and validation of SAR/InSAR calibration information.

This Technical Specification addresses earth based remote sensing. The specified sensors include airborne and spaceborne SAR/InSAR sensors.

This Technical Specification also addresses the metadata related to calibration and validation.

This Technical Specification is identical with, and has been reproduced from, ISO/TS 19159-3:2018, *Geographic information — Calibration and validation of remote sensing imagery sensors and data — Part 3: SAR/InSAR*.

As this document has been reproduced from an International Standard, a full point substitutes for a comma when referring to a decimal marker.

Australian or Australian/New Zealand Standards that are identical adoptions of international normative references may be used interchangeably. Refer to the online catalogue for information on specific Standards.

The terms “normative” and “informative” are used in Standards to define the application of the appendices or annexes to which they apply. A “normative” appendix or annex is an integral part of a Standard, whereas an “informative” appendix or annex is only for information and guidance.

Contents

Preface	ii
Foreword	iv
Introduction	v
1 Scope	1
2 Normative references	1
3 Terms and definitions	1
4 Symbols, abbreviated terms and conventions	8
4.1 Symbols.....	8
4.2 Abbreviated terms.....	10
4.3 Conventions.....	10
5 Conformance	11
6 General SAR sensor calibration model	11
6.1 Introduction.....	11
6.2 Top-level model.....	12
6.3 Radar system.....	14
6.4 Antenna system.....	15
6.5 Antenna phase centre.....	16
6.6 SAR signal processing.....	17
6.7 Atmospheric propagation and earth motion.....	19
6.8 SAR calibration field.....	20
6.8.1 Introduction.....	20
6.8.2 CA_SARCalibrationField.....	22
6.8.3 CA_SARCalibrationNaturalField.....	22
6.8.4 CA_SARCalibrationManmadeField.....	22
6.8.5 CA_SARCalibrationEquipment.....	22
6.8.6 CA_CornerReflectorAndTransponder.....	22
6.8.7 CA_GroundReceiver.....	23
6.8.8 CA_ScatteringMatrix.....	23
6.9 SAR validation.....	23
6.10 SAR Requirement.....	24
7 InSAR sensor calibration model	24
7.1 General.....	24
7.2 CA_InSARSensor.....	25
7.3 InSAR Requirement.....	27
8 PolSAR sensor calibration model	27
8.1 General.....	27
8.2 CA_PolSARSensor.....	28
8.3 PolSAR requirement.....	29
Annex A (normative) Abstract test suite	30
Annex B (normative) Data dictionary	31
Annex C (informative) SAR geometric calibration use case	45
Annex D (informative) SAR radiometric calibration use case	49
Bibliography	52
