Preface

This Technical Report was prepared by the Joint Standards Australia/Standards New Zealand Committee IT-030, ICT Governance and Management.

The objective of this Technical Report is to provide guidance to the members of governing bodies of organizations and their executive managers on the implications of AS ISO/IEC 38505.1 for data management. It assumes understanding of the principles of AS ISO/IEC 38500 and familiarization with the data accountability map and associated matrix of considerations, as presented in AS ISO/IEC 38505.1.

This document enables an informed dialogue between the governing body and the senior/executive management team of an organization to ensure that the data use throughout the organization aligns with the strategic direction set by the governing body.

This document covers the following:

- (a) Identifying the information that a governing body requires in order to evaluate and direct the strategies and policies relating to a data-driven business.
- (b) Identifying the capabilities and potential of measurement systems that can be used to monitor the performance of data and its uses.

This Technical Report is identical with, and has been reproduced from, ISO/IEC TR 38505-2:2018, *Information technology — Governance of IT — Governance of data — Part 2: Implications of ISO/IEC 38505-1 for data management*.

As this document has been reproduced from an International Technical Report, a full point substitutes for a comma when referring to a decimal marker.

Australian or Australian/New Zealand Standards that are identical adoptions of international normative references may be used interchangeably. Refer to the online catalogue for information on specific Standards.

The terms “normative” and “informative” are used in Standards to define the application of the appendices or annexes to which they apply. A “normative” appendix or annex is an integral part of a Standard, whereas an “informative” appendix or annex is only for information and guidance.

Contents

Preface	ii
Foreword	iv
Introduction	v
1 Scope	1
2 Normative references	1
3 Terms and definitions	1
4 Governance and management roles	1
4.1 General	1
4.2 The governance role	2
4.3 The management role	4
5 Connecting business strategy to data management	5
6 Establishing policies through the checklist of considerations	7
