## Preface

This Standard was prepared by the Standards Australia o Committee MB-019, Asset Management, to supersede AS ISO 55002:2014, *Asset management — Management systems — Guidelines for the application of AS ISO 55001*.

The objective of this Standard is to provide guidelines for the application of an asset management system, in accordance with the requirements of ISO 55001.

This Standard can be applied to all types of assets and by all types and sizes of organizations.

NOTE 1 This Standard is intended to be used for managing physical assets in particular, but it can also be applied to other asset types.

NOTE 2 This Standard does not provide financial, accounting or technical guidance for managing specific asset types, however, in Annex F information is provided on the relationship between the financial and non-financial asset management functions.

NOTE 3 For the purposes of AS ISO 55000, AS ISO 55001 and this Standard, the term “asset management system” is used to refer to a management system for asset management.

This Standard is identical with, and has been reproduced from, ISO 55002:2018, *Asset management — Management systems — Guidelines for the application of ISO 55001*.

As this document has been reproduced from an International Standard, a full point substitutes for a comma when referring to a decimal marker.

Australian or Australian/New Zealand Standards that are identical adoptions of international normative references may be used interchangeably. Refer to the online catalogue for information on specific Standards.

The terms “normative” and “informative” are used in Standards to define the application of the appendices or annexes to which they apply. A “normative” appendix or annex is an integral part of a Standard, whereas an “informative” appendix or annex is only for information and guidance.

# Contents

<b>Preface</b> .....	<b>ii</b>
<b>Foreword</b> .....	<b>vi</b>
<b>Introduction</b> .....	<b>vii</b>
<b>1 Scope</b> .....	<b>1</b>
