

## **Financial services—Secure cryptographic devices (retail)**

### **Part 2: Security compliance checklists for devices used in financial transactions**

## AS ISO 13491.2:2019

This Australian Standard® was prepared by IT-005, Financial Transaction Systems. It was approved on behalf of the Council of Standards Australia on 23 January 2019.

This Standard was published on 12 March 2019.

The following are represented on Committee IT-005:

- Australian Payments Network
- EFTPOS Payments Australia

### Additional Interests

- ANZ Banking Group
- Coles Group
- Diebold Nixdorf
- FIS Global
- Gemalto
- National Australia Bank
- Sundial
- SWIFT
- Thales e-Security
- Woolworths

This Standard was issued in draft form for comment as DR AS ISO 13491.2:2018.

## Preface

This Standard was prepared by the Standards Australia Committee IT-005, Financial Transaction Systems, to supersede AS 2805.14.2—2009, *Electronic funds transfer — Requirements for interfaces —Part 14.2: Secure cryptographic devices (retail) — Security compliance checklists for devices used in financial transactions*.

The objective of this Standard is to specify checklists to be used to evaluate secure cryptographic devices (SCDs) incorporating cryptographic processes as specified in ISO 9564-1, ISO 9564-2, ISO 16609, AS 2805.6.1.1 (identical adoption of ISO 11568-1), AS 2805.6.1.2 (identical adoption of ISO 11568-2), and AS 2805.6.1.4 (identical adoption of ISO 11568-4), in the financial services environment. Integrated circuit (IC) payment cards are subject to the requirements identified in this document up until the time of issue after which they are to be regarded as a “personal” device and outside of the scope of this document.

This Standard is identical with, and has been reproduced from, ISO 13491-2:2017, *Financial services — Secure cryptographic devices (retail) — Part 2: Security compliance checklists for devices used in financial transactions*.

As this document has been reproduced from an International Standard, a full point substitutes for a comma when referring to a decimal marker.

Australian or Australian/New Zealand Standards that are identical adoptions of international normative references may be used interchangeably. Refer to the online catalogue for information on specific Standards.

The terms “normative” and “informative” are used in Standards to define the application of the annexes to which they apply. A “normative” annex is an integral part of a Standard, whereas an “informative” annex is only for information and guidance.

# Contents

<b>Preface</b> .....	<b>ii</b>
<b>Foreword</b> .....	<b>iv</b>
<b>Introduction</b> .....	<b>v</b>
<b>1 Scope</b> .....	<b>1</b>
<b>2 Normative references</b> .....	<b>1</b>
<b>3 Terms and definitions</b> .....	<b>1</b>
<b>4 Use of security compliance checklists</b> .....	<b>2</b>
4.1 General .....	2
4.2 Informal evaluation .....	3
4.3 Semi-formal evaluation .....	3
4.4 Strict semi-formal evaluation .....	3
4.5 Formal evaluation .....	3
<b>Annex A</b> (normative) <b>Physical, logical, and device management characteristics common to all secure cryptographic devices</b> .....	<b>4</b>
<b>Annex B</b> (normative) <b>Devices with PIN entry functionality</b> .....	<b>12</b>
<b>Annex C</b> (normative) <b>Devices with PIN management functionality</b> .....	<b>17</b>
<b>Annex D</b> (normative) <b>Devices with message authentication functionality</b> .....	<b>20</b>
<b>Annex E</b> (normative) <b>Devices with key generation functionality</b> .....	<b>22</b>
<b>Annex F</b> (normative) <b>Devices with key transfer and loading functionality</b> .....	<b>27</b>
<b>Annex G</b> (normative) <b>Devices with digital signature functionality</b> .....	<b>32</b>
<b>Annex H</b> (normative) <b>Categorization of environments</b> .....	<b>34</b>
<b>Bibliography</b> .....	<b>38</b>
