

Australian Standard[®]

**Electronic funds transfer—
Requirements for interfaces**

**Part 6.1.4: Key management—
Asymmetric cryptosystems—Key
management and life cycle**

This Australian Standard® was prepared by Committee IT-005, Financial Transaction Systems. It was approved on behalf of the Council of Standards Australia on 13 January 2009. This Standard was published on 11 February 2009.

The following are represented on Committee IT-005:

- Australian Association of Permanent Building Societies
 - Australian Bankers Association
 - Australian Electrical and Electronic Manufacturers Association
 - Australian Information Industry Association
 - Australian Payments Clearing Association
 - Australian Retailers Association
 - Reserve Bank of Australia
-

This Standard was issued in draft form for comment as DR 08013.

Standards Australia wishes to acknowledge the participation of the expert individuals that contributed to the development of this Standard through their representation on the Committee and through the public comment period.

Keeping Standards up-to-date

Australian Standards® are living documents that reflect progress in science, technology and systems. To maintain their currency, all Standards are periodically reviewed, and new editions are published. Between editions, amendments may be issued.

Standards may also be withdrawn. It is important that readers assure themselves they are using a current Standard, which should include any amendments that may have been published since the Standard was published.

Detailed information about Australian Standards, drafts, amendments and new projects can be found by visiting **www.standards.org.au**

Standards Australia welcomes suggestions for improvements, and encourages readers to notify us immediately of any apparent inaccuracies or ambiguities. Contact us via email at **mail@standards.org.au**, or write to Standards Australia, GPO Box 476, Sydney, NSW 2001.
