ISO 19101-1:2014

AS/NZS ISO 19101.1:2015

Australian/New Zealand Standard™

## Geographic information—Reference model

### Part 1: Fundamentals

## **AS/NZS ISO 19101.1:2015**

This Joint Australian/New Zealand Standard was prepared by Joint Technical Committee IT-004, Geographical Information/Geomatics. It was approved on behalf of the Council of Standards Australia on 12 December 2014 and on behalf of the Council of Standards New Zealand on 20 January 2015.  
This Standard was published on 13 February 2015.

---

The following are represented on Committee IT-004:

ANZLIC—The Spatial Information Council  
Australian Antarctic Division  
Australian Bureau of Meteorology  
Australian Bureau of Statistics  
Australian Hydrographic Office  
CSIRO  
Curtin University of Technology  
Department of Communications (Australia)  
Department of Defence (Australia)  
Geoscience Australia (Australia)  
Land Information New Zealand  
New Zealand Geospatial Office  
Science New Zealand  
Spatial Industries Business Association

---

### **Keeping Standards up-to-date**

Standards are living documents which reflect progress in science, technology and systems. To maintain their currency, all Standards are periodically reviewed, and new editions are published. Between editions, amendments may be issued. Standards may also be withdrawn. It is important that readers assure themselves they are using a current Standard, which should include any amendments which may have been published since the Standard was purchased.

Detailed information about joint Australian/New Zealand Standards can be found by visiting the Standards Web Shop at [www.saiglobal.com.au](http://www.saiglobal.com.au) or Standards New Zealand web site at [www.standards.co.nz](http://www.standards.co.nz) and looking up the relevant Standard in the on-line catalogue.

For more frequent listings or notification of revisions, amendments and withdrawals, Standards Australia and Standards New Zealand offer a number of update options. For information about these services, users should contact their respective national Standards organization.

We also welcome suggestions for improvement in our Standards, and especially encourage readers to notify us immediately of any apparent inaccuracies or ambiguities. Please address your comments to the Chief Executive of either Standards Australia or Standards New Zealand at the address shown on the back cover.

## PREFACE

This Standard was prepared by the Joint Standards Australia/Standards New Zealand Committee IT-004 Geographical Information/Geomatics, to supersede AS/NZS ISO 19101.1:2003, *Geographic information—Reference model*.

The objective of this Standard is to specify, and provide geographic information system, developers with, the schema required for describing geographic information and services.

This Standard is identical with, and has been reproduced from ISO 19101-1:2014, *Geographic information—Reference model*, Part 1: *Fundamentals*.

As this Standard is reproduced from an International Standard, the following applies:

- (a) In the source text ‘this part of ISO 19101’ should read ‘this Australian/New Zealand Standard’.
- (b) A full point substitutes for a comma when referring to a decimal marker.

The terms ‘normative’ and ‘informative’ have been used in this Standard to define the application of the annex to which they apply. A ‘normative’ annex is an integral part of a Standard, whereas an ‘informative’ annex is only for information and guidance.

## CONTENTS

<b>1</b>	<b>Scope</b>	<b>1</b>
<b>2</b>	<b>Conformance</b>	<b>1</b>
<b>3</b>	<b>Normative references</b>	<b>1</b>
<b>4</b>	<b>Terms, definitions, and abbreviated terms</b>	<b>1</b>
4.1	Terms and definitions	1
4.2	Abbreviated terms	6
<b>5</b>	<b>Interoperability</b>	<b>8</b>
5.1	Interoperability of geographic information	8
5.2	Interoperability of geographic information in e-government	11
<b>6</b>	<b>Interoperability foundations and scope for the reference model</b>	<b>11</b>
6.1	Foundations	11
6.2	Scope in the ISO geographic information standards	13
<b>7</b>	<b>Abstraction of the real world</b>	<b>13</b>
7.1	General	13
7.2	Conceptual formalism	13
7.3	Ontological languages	13
<b>8</b>	<b>The ISO geographic information reference model</b>	<b>14</b>
8.1	General	14
8.2	Reference model conceptual framework	15
8.3	Reference model — Semantic foundation	17
8.4	Reference model — Syntactic foundation	18
8.5	Reference model — Service foundation	19
8.6	Reference model — Procedural standards	20
8.7	Uses of the reference model	21
<b>9</b>	<b>Profiles</b>	<b>21</b>
9.1	Introduction to profiles	21
9.2	Use of profiles	21
9.3	Relationship of profiles to base standards	21
	<b>Annex A (normative) Abstract test suite</b>	<b>22</b>
	<b>Annex B (informative) Layers of interoperability</b>	<b>26</b>
	<b>Annex C (informative) Interoperability of geographic information in e-government</b>	<b>29</b>
	<b>Annex D (informative) Foundation standards for SDI</b>	<b>33</b>
	<b>Annex E (informative) Abstraction of the real world in geographic information</b>	<b>36</b>
	<b>Annex F (informative) Overview of the ISO geographic information standards</b>	<b>41</b>
	<b>Annex G (informative) Conceptual Schema Modelling Facility: a summary</b>	<b>45</b>
	<b>Bibliography</b>	<b>47</b>
