

**Protective clothing for firefighters —  
Requirements and test methods for  
protective clothing used for structural  
firefighting**

AS 4967:2019

This Australian Standard® was prepared by SF-049, Firefighters Personal Protective Equipment. It was approved on behalf of the Council of Standards Australia on 3 June 2019.

This Standard was published on 25 June 2019.

The following are represented on Committee SF-049:

- Association of Accredited Certification Bodies
- Australasian Fire and Emergency Service Authorities Council
- Australian Chamber of Commerce and Industry
- Australian Fashion Council
- Australian Industry Group
- AWTA Product Testing (Testing Interests Australia)
- BSI Group Australian and New Zealand (Certification Bodies)
- CSIRO
- Department of Defence (Australian Government)
- Footwear Manufacturers Association of Australia
- NSW Rural Fire Service Association
- United Firefighters Union of Australia
- VicLabs (Testing Interests Australia)

This Standard was issued in draft form for comment as DR AS 4967:2018.

## Preface

This Standard was prepared by the Joint Standards Australia/Standards New Zealand Committee SF-049, Firefighters Personal Protective Equipment, to supersede AS/NZS 4967:2009.

After consultation with stakeholders in both countries, Standards Australia and Standards New Zealand decided to develop this Standard as an Australian Standard rather than an Australian/New Zealand Standard.

The objective of this Standard is to provide manufacturers, suppliers, laboratories and end users with a clear statement of the minimum requirements for apparel for structural firefighters.

Standards Australia thanks the International Organization for Standardization (ISO) for permission to reproduce definitions from ISO 11999-1:2015. These definitions are copyright of ISO, Geneva, Switzerland. All rights reserved.

Changes to this edition include the revision and updating of referenced documents such as the following:

- (a) Replacement of references to EN 340 with ISO 13688.
- (b) Replacement of references to AS/NZS 4360 with AS/NZS ISO 31000.
- (c) Replacement of references to AS 2001.5.4 with ISO 6330.
- (d) Replacement of references to AS 2001.2.3.1 with ISO 13934-1.
- (e) Replacement of references to ISO 12127 with ISO 12127-1.
- (f) Replacement of references to EN 20811 with ISO 811.
- (g) Replacement of references to ISO 13506 with ISO 13506-1 and ISO 13506-2.

In the longer term, the Committee is committed to developing a single standard for all items of personal protective equipment used for structural firefighting.

Notes are used in this Standard to provide additional information to explain, or assist in the understanding of, the text, figure or table.

The terms “normative” and “informative” are used in Standards to define the application of the appendices to which they apply. A “normative” appendix is an integral part of a Standard, whereas an “informative” appendix is only for information and guidance.

# Contents

<b>Preface</b> .....	<b>ii</b>
<b>Introduction</b> .....	<b>v</b>
<b>Section 1 Scope and general</b> .....	<b>1</b>
1.1 Scope.....	1
1.2 Normative references.....	1
1.3 Terms and definitions.....	2
<b>Section 2 Determination of requirements for protective clothing for firefighters</b> .....	<b>7</b>
<b>Section 3 Design</b> .....	<b>8</b>
3.1 General clothing design.....	8
3.2 Design requirements.....	8
3.2.1 Garment design.....	8
3.2.2 Configuration.....	8
3.3 Restriction of movement.....	8
3.4 Seams.....	8
3.5 Hardware.....	8
3.6 Closure systems.....	8
3.7 High visibility trim.....	9
3.8 Sleeve ends.....	9
3.9 Trouser ends.....	9
3.10 Neck protection.....	9
3.11 Clothing mass.....	9
3.12 Cleaning and decontamination.....	9
3.13 Innocuousness.....	9
3.14 Compatibility.....	9
3.15 Inspection.....	9
<b>Section 4 Performance requirements</b> .....	<b>10</b>
4.1 Sampling and pre-treatment.....	10
4.1.1 Specimens.....	10
4.1.2 Number and size of specimens.....	10
4.1.3 Pre-treatment.....	10
4.1.4 Conditioning.....	10
4.2 Thermal requirements.....	10
4.2.1 Limited flame spread.....	10
4.2.2 Heat transfer (flame exposure).....	11
4.2.3 Heat transfer (radiation exposure).....	12
4.2.4 Residual strength of material when exposed to radiant heat.....	12
4.3 Heat resistance.....	12
4.3.1 Materials and hardware.....	12
4.3.2 Threads.....	12
4.4 Tensile strength.....	13
4.4.1 Outer material.....	13
4.4.2 Main seams.....	13
4.5 Tear strength.....	13
4.6 Conductive compressive heat resistance.....	13
4.7 Abrasion resistance.....	14
4.8 Surface wetting.....	14
4.9 Resistance to water and liquid chemicals.....	14
4.9.1 General.....	14
4.9.2 Penetration by liquid chemicals.....	14
4.9.3 Water penetration.....	14
4.10 Water vapour resistance.....	14
4.11 Dimensional change.....	15
4.12 High visibility trim performance.....	15
