Standards Australia wishes to acknowledge the participation of the expert individuals that contributed to the development of this Standard through their representation on the Committee and through the public comment period.

Keeping Standards up-to-date

Australian Standards® are living documents that reflect progress in science, technology and systems. To maintain their currency, all Standards are periodically reviewed, and new editions are published. Between editions, amendments may be issued.

Standards may also be withdrawn. It is important that readers assure themselves they are using a current Standard, which should include any amendments that may have been published since the Standard was published.

Detailed information about Australian Standards, drafts, amendments and new projects can be found by visiting **www.standards.org.au**

Standards Australia welcomes suggestions for improvements, and encourages readers to notify us immediately of any apparent inaccuracies or ambiguities. Contact us via email at **mail@standards.org.au**, or write to Standards Australia, GPO Box 476, Sydney, NSW 2001.

PREFACE

This Standard was prepared by Standards Australia Committee SF-048, Emergency Eyewash and Shower Equipment. The Standard was prepared in response to requests from manufacturers and suppliers of these products, as well as industry in general.

This Standard is based on but not equivalent to ANSI Z358.1—2004, *Emergency eyewash and shower equipment*. Apart from terminology and layout differences, changes were made to address the specific needs of Australian applications, and integrate with other Australian Standards. The main differences are as follows:

- (a) Inclusion of guidance on dimensional constraints for disabled access.
- (b) Inclusion of guidance on local materials for plumbing components.
- (c) Inclusion of guidance on good design and manufacture.

The terms ‘normative’ and ‘informative’ have been used in this Standard to define the application of the appendix to which they apply. A ‘normative’ appendix is an integral part of a Standard. An ‘informative’ appendix is only for information and guidance.
