Australian Standard™

Dependability management

**Part 3.14: Application guide—
Maintenance and maintenance support**

This Australian Standard was prepared by Committee QR-005, Dependability. It was approved on behalf of the Council of Standards Australia on 8 April 2005. This Standard was published on 5 May 2005.

The following are represented on Committee QR-005:

AirServices Australia
Australian Organisation for Quality
Department of Defence (Australia)
Engineers Australia
The University of New South Wales

Additional Interests:

Australian Bankers Association
Australian Chamber of Commerce and Industry
Australian Electrical and Electronic Manufacturers Association
Australian Industry Group
Australian Nuclear Science & Technology Organisation
Certification Interests (Australia)
Commonwealth Department of Transport and Regional Services
Energy Supply Association of Australia
Federal Chamber of Automotive Industries
Federation of Automotive Products Manufacturers
QSA International

Keeping Standards up-to-date

Standards are living documents which reflect progress in science, technology and systems. To maintain their currency, all Standards are periodically reviewed, and new editions are published. Between editions, amendments may be issued. Standards may also be withdrawn. It is important that readers assure themselves they are using a current Standard, which should include any amendments which may have been published since the Standard was purchased.

Detailed information about Standards can be found by visiting the Standards Web Shop at www.standards.com.au and looking up the relevant Standard in the on-line catalogue.

Alternatively, the printed Catalogue provides information current at 1 January each year, and the monthly magazine, *The Global Standard*, has a full listing of revisions and amendments published each month.

Australian Standards™ and other products and services developed by Standards Australia are published and distributed under contract by SAI Global, which operates the Standards Web Shop.

We also welcome suggestions for improvement in our Standards, and especially encourage readers to notify us immediately of any apparent inaccuracies or ambiguities. Contact us via email at mail@standards.org.au, or write to the Chief Executive, Standards Australia, GPO Box 5420, Sydney, NSW 2001.

This Standard was issued in draft form for comment as DR 04320.

PREFACE

This Standards was prepared by Standards Australia Committee QR-005, Dependability.

It is identical with, and has been reproduced from, IEC 60300-3-14, Ed.1.0 (2004), *Dependability management, Part 3-14: Application guide—Maintenance and maintenance support*.

‘Dependability’ is a collective term for performance characteristics (reliability, availability, maintainability) of simple or complex products and systems. This Standard is part of the AS IEC 60300 series of dependability management Standards, which provide general guidelines for establishing a dependability management system to meet most organizational or project needs, supported by a ‘tool kit’ of non-prescriptive standards on a range of dependability application guidelines and methods, and outlines maintenance and maintenance support process as a major component of dependability.

The objective of this Standard is to provide an outline of the maintenance, maintenance support and management processes and techniques that can be applied to achieve adequate dependability and meet operational needs throughout the life cycle of systems, products and equipment.

As this Standard is reproduced from an International Standard, the following applies:

- (a) Its number does not appear on each page of text and its identity is shown only on the cover and title page.
- (b) The page numbers do not correspond to the IEC dual language (English/French) version.
- (c) In the source text ‘this part of IEC 60300’ should read ‘this Australian Standard’.

References to International Standards should be replaced by references to Australian or Australian/New Zealand Standards, as follows:

<i>Reference to International Standard</i>		<i>Australian/New Zealand Standard</i>	
IEC		AS IEC	
60300	Dependability management	60300	Dependability management
60300-1	Part 1: Dependability systems management	60300.1	Part 1: Dependability systems management
60300-2	Part 2: Guidelines for dependability management	60300.2	Part 2: Guidelines for dependability management
60300-3-3	Part 3-3: Application guide – Life cycle costing	60300.3.3	Part 3.3: Application guide – Life cycle costing
60300-3-10	Part 3-10: Application guide – Maintainability	60300.3.10	Part 3.10: Application guide – Maintainability
60300-3-11	Part 3-11: Application guide – Reliability centred maintenance	60300.3.11	Part 3.11: Application guide – Reliability centred maintenance
60300-3-12	Part 3-12: Application guide – Integrated logistic support	60300.3.12	Part 3.12: Application guide – Integrated logistic support

Only international references identical to Australian or Australian/New Zealand Standards have been listed.

The term ‘informative’ has been used in this Standard to define the application of the annex to which it applies. An ‘informative’ annex is only for information and guidance.

CONTENTS

	<i>Page</i>
1 Scope	1
2 Normative references	1
3 Terms, definitions and acronyms	2
3.1 Terms and definitions	2
3.2 Acronyms	5
4 Maintenance and maintenance support overview	5
4.1 Life cycle aspects	5
4.1.1 General	5
4.1.2 Scenarios for maintenance and maintenance support	6
4.1.3 Concept and definition phase	7
4.1.4 Design and development phase	7
4.1.5 Manufacturing phase	8
4.1.6 Installation phase	8
4.1.7 Operation and maintenance phase	8
4.1.8 Disposal phase	9
4.2 Description of maintenance	9
4.2.1 General	9
4.2.2 Maintenance policy and concept	9
4.2.3 Indenture levels	10
4.2.4 Maintenance echelons	10
4.2.5 Preventive and corrective maintenance	10
4.3 Description of maintenance support	11
5 Management responsibility	11
5.1 Management commitment	11
5.2 Customers	12
5.3 Maintenance policy	12
5.4 Planning of maintenance and maintenance support	12
5.5 Responsibility, authority and communication	12
6 Maintenance process implementation	13
6.1 General	13
6.2 Maintenance management	13
6.3 Maintenance and maintenance support planning	14
6.3.1 General	14
6.3.2 Determination of maintenance support	15
6.3.3 Maintenance task identification	16
6.3.4 Maintenance task analysis	17
6.3.5 Identification of maintenance support resources	17
6.4 Maintenance preparation	18
6.5 Maintenance execution	18
7 Resource management	19
7.1 Provision of resources	19
7.2 Human resources	19
7.2.1 General	19
