IEC 60479-1:1994

AS/NZS 60479.1

Australian/New Zealand Standard™

**Effects of current on human beings and
livestock**

Part 1: General aspects

AS/NZS 60479.1:2002

This Joint Australian/New Zealand Standard was prepared by Joint Technical Committee EL-001, Wiring Rules. It was approved on behalf of the Council of Standards Australia on 10 September 2002 and on behalf of the Council of Standards New Zealand on 3 September 2002. It was published on 3 October 2002.

The following are represented on Committee EL-001:

Association of Consulting Engineers Australia
Australian Building Codes Board
Australian Electrical and Electronic Manufacturers Association
Canterbury Manufacturers Association New Zealand
Communications, Electrical Plumbing Union
Electrical Contractors Association of New Zealand
Electrical Safety Organisation (New Zealand)
Electricity Supply Association of Australia
ElectroComms & Energy Utilities Qualifications Standards Body of Australia
Institute of Electrical Inspectors
Institution of Engineers Australia
Insurance Council of Australia
Ministry of Economic Development (New Zealand)
National Electrical and Communications Association
New Zealand Council of Elders
New Zealand Electrical Institute
Regulatory Authorities (Electrical)
Telstra Corporation

Keeping Standards up-to-date

Standards are living documents which reflect progress in science, technology and systems. To maintain their currency, all Standards are periodically reviewed, and new editions are published. Between editions, amendments may be issued. Standards may also be withdrawn. It is important that readers assure themselves they are using a current Standard, which should include any amendments which may have been published since the Standard was purchased.

Detailed information about joint Australian/New Zealand Standards can be found by visiting the Standards Australia web site at www.standards.com.au or Standards New Zealand web site at www.standards.co.nz and looking up the relevant Standard in the on-line catalogue.

Alternatively, both organizations publish an annual printed Catalogue with full details of all current Standards. For more frequent listings or notification of revisions, amendments and withdrawals, Standards Australia and Standards New Zealand offer a number of update options. For information about these services, users should contact their respective national Standards organization.

We also welcome suggestions for improvement in our Standards, and especially encourage readers to notify us immediately of any apparent inaccuracies or ambiguities. Please address your comments to the Chief Executive of either Standards Australia International or Standards New Zealand at the address shown on the back cover.

AS/NZS 60479.1:2002

Australian/New Zealand Standard™

Effects of current on human beings and livestock

Part 1: General aspects

Originated as part of MP 30—1976.
Previous edition AS 3859—1991.
Jointly revised and redesignated in part as AS/NZS 60479.1:2002.

PREFACE

This Standard was prepared by the Joint Standards Australia/Standards New Zealand Committee EL-001, Wiring Rules to supersede AS 3859—1991 Chapters 1, 2 and 3.

AS 3859—1991 was produced from IEC 60479, *Effects of current passing through the human body*, 60479-1:1984 *Part 1: General aspects*, and 60479-2:1987 *Part 2: Special aspects*. Subsequently IEC 60479-1 was revised and issued as IEC 60479-1:1994 (third edition). IEC 60479-2 was reconfirmed without change and a new IEC 60479-3:1998 published. AS 3859—1991 has been revised and issued as AS/NZS 60479.1, 60479.2 and 60479.3.

The objective of this Standard is to provide basic guidance on the effects of electrical currents on persons and livestock for the establishment of electrical safety requirements.

This Standard has been reproduced from IEC 60479-1:1994, *Effects of current on human beings and livestock—Part 1: General aspects*.

Variations to IEC 60479-1:1994 are indicated at the appropriate places throughout this Standard. Strikethrough (~~example~~) identifies IEC tables, figures and passages of text which, for the purposes of this Australian/New Zealand Standard, are deleted. Where Australian/New Zealand tables, figures or passages of text are added, each is set in its proper place and identified by shading (**example**). Added figures are not themselves shaded, but are identified by a shaded border.

This Standard is Part One of a series that includes the following:

AS/NZS

- | | |
|---------|---|
| 60479 | Effects of current on human beings and livestock |
| 60479.1 | Part 1: General aspects (this Standard) |
| 60479.2 | Part 2: Special aspects |
| 60479.3 | Part 3: Effects of currents passing through the body of livestock |

In January 1997, the IEC commenced numbering its Standards from 60000 by adding 60000 to the number of each existing Standard. This coordinates IEC numbering with ISO numbering. During the transition period an IEC Standard might be identified by its new number or its old number (for example, IEC 60050 or IEC 50).

As this Standard is reproduced from an International Standard, the following applies:

- (a) Its number does not appear on each page of text and its identity is shown only on the cover and title page.
- (b) In the source text ‘this technical report’ should read ‘this Australian/New Zealand Standard’.
- (c) A full point should be substituted for a comma when referring to a decimal marker.

In this Standard, the following print types are used:

- requirements proper: in arial type;
- *test specifications: in italic type;*
- explanatory matter: in smaller arial type.

The terms ‘normative’ and ‘informative’ have been used in this Standard to define the application of the annex to which they apply. A ‘normative’ annex is an integral part of a Standard, whereas an ‘informative’ annex is only for information and guidance.

CONTENTS

	<i>Page</i>
INTRODUCTION.....	iv
1 General	1
1.1 Scope and object.....	1
1.2 Normative reference	2
1.3 Definitions	2
2 Electrical impedance of the human body.....	3
2.1 Internal impedance of the human body (Z_i)	3
2.2 Impedance of the skin (Z_p)	4
2.3 Total impedance of the human body (Z_T).....	4
2.4 Initial resistance of the human body (R_0).....	4
2.5 Values of the total impedance of the human body (Z_T)	4
2.6 Value of the initial resistance of the human body (R_0)	7
2.7 Dependence of body impedances on the surface area of contact for a.c. 50/60 Hz and for d.c.	7
3 Effects of sinusoidal alternating current in the range of 15 Hz to 100 Hz.....	15
3.1 Threshold of perception and threshold of reaction.....	15
3.2 Threshold of let-go.....	15
3.3 Threshold of ventricular fibrillation	15
3.4 Other effects of current.....	15
3.5 Description of the time/current zones (see figure 14)	16
3.6 Application of heart-current factor (F)	17
4 Effects of direct current.....	20
4.1 Threshold of perception and threshold of reaction.....	20
4.2 Threshold of let-go.....	20
4.3 Threshold of ventricular fibrillation	20
4.4 Other effects of current.....	20
4.5 Description of the time/current zones (see figure 15)	21
Annexes	
A Measurements made on living and dead human beings and the statistical analysis of the results	24
B Influence of frequency on the total body impedance (Z_T)	25
C Total body resistance (R_T) for direct current.....	26
D Measurements of the dependence of the total impedance of the human body (Z_T) on the surface area of contact	27
E Bibliography.....	28
ZA Physiology of electrocution	30
