

AS 2945(Int)—2002
(Expires 9 January 2004)

AS 2945(Int)

Interim Australian Standard™

**Batch-type washer/disinfectors for
health care facilities**

This Australian Standard was prepared by Committee ME-003, Sterilizing Equipment. It was approved on behalf of the Council of Standards Australia on 26 October 2001 and published on 9 January 2002.

The following interests are represented on Committee ME-003:

Australian Chamber of Commerce and Industry
Australian Dental Association
Australian Dental Industry Association
Australian Health Industry
Australian Industry Group
Australian Stainless Steel Development Association
Commonwealth Department of Health and Aged Care
Department of Human Services (Victoria)
Health Department of Western Australia
Institute of Hospital Engineering, Australia
Medical Industry Association of Australia
New South Wales Health Department
Queensland Health
Royal College of Pathologists of Australasia
South Australian Health Commission
Sterilizing Research and Advisory Council of Australia (N.S.W. Branch)

Keeping Standards up-to-date

Standards are living documents which reflect progress in science, technology and systems. To maintain their currency, all Standards are periodically reviewed, and new editions are published. Between editions, amendments may be issued. Standards may also be withdrawn. It is important that readers assure themselves they are using a current Standard, which should include any amendments which may have been published since the Standard was purchased.

Detailed information about Standards can be found by visiting the Standards Australia web site at www.standards.com.au and looking up the relevant Standard in the on-line catalogue.

Alternatively, the printed Catalogue provides information current at 1 January each year, and the monthly magazine, *The Australian Standard*, has a full listing of revisions and amendments published each month.

We also welcome suggestions for improvement in our Standards, and especially encourage readers to notify us immediately of any apparent inaccuracies or ambiguities. Contact us via email at mail@standards.com.au, or write to the Chief Executive, Standards Australia International Ltd, GPO Box 5420, Sydney, NSW 2001.

This Standard was issued in draft form for comment as DR 99301.

PREFACE

This Interim Australian Standard was prepared by the Standards Australia Committee ME-003, Sterilizing Equipment, to supersede AS 2945—1998.

The objective of this Standard is to standardize the performance of washer/disinfectors used in health care facilities

The Scope of this edition has been extended to include multi-purpose type washer/disinfectors that are able to empty, flush and disinfect bed pans and urine bottles.

The terms ‘normative’ and ‘informative’ have been used in this Standard to define the application of the appendix to which they apply. A ‘normative’ appendix is an integral part of a Standard, whereas an ‘informative’ appendix is only for information and guidance.

Standards Australia invites comment on this Interim Standard from persons and organizations concerned with the subject of the Standard. The date of expiry of comment is two years after publication, at which time this Interim Australian Standard will be confirmed, withdrawn or revised in the light of public comment.

CONTENTS
