AS/NZS 4871.1:2010

Australian/New Zealand Standard™

Electrical equipment for mines and quarries

Part 1: General requirements

AS/NZS 4871.1:2010

This Joint Australian/New Zealand Standard was prepared by Joint Technical Committee EL-023, Electrical Equipment in Mines and Quarries. It was approved on behalf of the Council of Standards Australia on 13 April 2010 and on behalf of the Council of Standards New Zealand on 23 April 2010.
This Standard was published on 25 May 2010.

The following are represented on Committee EL-023:

Australian Chamber of Commerce and Industry
Australian Coal Association
Australian Industry Group
Aviation and Marine Engineers Association, New Zealand
Department of Mines and Energy, Qld
Department of Primary Industries, Mineral Resources, NSW
Electrical Apparatus Service Association
Electrical Regulatory Authorities Council
Mining Electrical and Mining Mechanical Engineering Society
Ministry of Economic Development, New Zealand
National Association of Testing Authorities Australia
Simtars (Department of Mines and Energy, Qld)
Solid Energy, New Zealand
University of Newcastle
WorkCover New South Wales

Keeping Standards up-to-date

Standards are living documents which reflect progress in science, technology and systems. To maintain their currency, all Standards are periodically reviewed, and new editions are published. Between editions, amendments may be issued. Standards may also be withdrawn. It is important that readers assure themselves they are using a current Standard, which should include any amendments which may have been published since the Standard was purchased.

Detailed information about joint Australian/New Zealand Standards can be found by visiting the Standards Web Shop at www.saiglobal.com.au or Standards New Zealand web site at www.standards.co.nz and looking up the relevant Standard in the on-line catalogue.

For more frequent listings or notification of revisions, amendments and withdrawals, Standards Australia and Standards New Zealand offer a number of update options. For information about these services, users should contact their respective national Standards organization.

We also welcome suggestions for improvement in our Standards, and especially encourage readers to notify us immediately of any apparent inaccuracies or ambiguities. Please address your comments to the Chief Executive of either Standards Australia or Standards New Zealand at the address shown on the back cover.

AS/NZS 4871.1:2010

Australian/New Zealand Standard™

Electrical equipment for mines and quarries

Part 1: General requirements

Originated as part of AS 1039—1972, AS 1740—1975, AS 2595.1—1983 and AS 2989—1987.

AS 1039—1986, AS 1740—1990, AS 2595.1—1992 and AS 2989—1992 jointly revised, amalgamated and redesignated in part as AS/NZS 4781.1:2002.

Second edition 2010.

PREFACE

This Standard was prepared by the Joint Standards Australia/Standards New Zealand Committee EL-023, Electrical Equipment in Mines and Quarries to supersede AS/NZS 4871.1:2002, *Electrical equipment for coal mines, for use underground*, Part 1: *General requirements*.

The objective of this Standard is to set out the minimum design, manufacturing, testing and performance requirements for electrical equipment intended for use in mines and quarries.

This Standard is Part 1 of the series AS/NZS 4871, *Electrical equipment for mines and quarries*.

The AS/NZS 4871 series comprises the following parts:

Part 1: General requirements (this Part)

Part 2: Distribution, control and auxiliary equipment

Part 3: Substations

Part 4: Mains powered electrical mobile machines

Part 5: Battery powered electrical mobile machines

Part 6: Diesel powered machinery and ancillary equipment

This Standard differs from the 2002 edition as follows:

- (a) The title and scope changed from coal mining to cover all mining and quarrying activities.
- (b) Addition of Part 6.
- (c) Expansion of general requirements in Part 1 to avoid duplication in the other parts.
- (d) General improvements including: Changes to earth-fault protection to allow a more flexible systems approach to protection settings, improvements to the testing requirements moved to Appendix H, alignment of protection requirements with the new release of AS 2081 series (to be published), alignment with AS 60204, guidance on hazards associated with variable speed drives, expansion of risk management.

The terms 'normative' and 'informative' have been used in this Standard to define the application of the appendix to which they apply. A 'normative' appendix is an integral part of a Standard, whereas an 'informative' appendix is only for information and guidance.

CONTENTS

	<i>Page</i>
SECTION 1 SCOPE AND GENERAL	
1.1 SCOPE	5
1.2 APPLICATION	5
1.3 SERVICE CONDITIONS.....	5
1.4 REFERENCED DOCUMENTS	6
1.5 DEFINITIONS	8
1.6 EXISTING EQUIPMENT	15
SECTION 2 COMMON REQUIREMENTS	
2.1 GENERAL	16
2.2 ENCLOSURE REQUIREMENTS.....	17
2.3 COMPONENTS REQUIREMENTS	20
2.4 CONDUCTORS AND CABLING REQUIREMENTS.....	25
2.5 CONNECTION FACILITIES FOR EARTHING AND EQUIPOTENTIAL BONDING CONDUCTORS	26
2.6 PROTECTION REQUIREMENTS	27
2.7 REMOTE CONTROL	31
2.8 PROXIMITY DETECTION	31
SECTION 3 HAZARDOUS AREA REQUIREMENTS	
3.1 SCOPE	32
3.2 EXPLOSION PROTECTION.....	32
3.3 ALUMINIUM OR LIGHT METAL ALLOY PARTS	32
3.4 INTERLOCKING.....	32
3.5 ENCLOSURES.....	33
3.6 MOTORS	33
3.7 BATTERIES.....	34
3.8 CABLE HOSE.....	34
3.9 MACHINE CABLES.....	34
3.10 INTRINSICALLY SAFE PLUGS AND SOCKETS.....	35
3.11 INTRINSICALLY SAFE CONDUCTORS	36
SECTION 4 TESTS	
4.1 GENERAL	37
4.2 TYPE TESTS	37
4.3 ROUTINE TESTS	37
4.4 TESTING OF DEVICES AND SELF-CONTAINED COMPONENTS INCORPORATED IN THE ASSEMBLY	38
4.5 SPECIFIC TEST REQUIREMENTS.....	38
4.6 HIGH VOLTAGE TESTS	38
SECTION 5 MARKING AND LABELLING	
5.1 EQUIPMENT MARKING.....	39
5.2 COMPONENT MARKING.....	39
5.3 WIRING MARKING.....	39
5.4 WARNING LABELS	40
5.5 RATING PLATE.....	40
