

AS/NZS 1102.110:1997
IEC 617-10:1996

Australian/New Zealand Standard®

**Graphical symbols for
electrotechnical documentation**

**Part 110: Telecommunications—
Transmission**

[IEC title: Graphical symbols for diagrams,
Part 10: Telecommunications — Transmission]

AS/NZS 1102.110:1997

This Joint Australian/New Zealand Standard was prepared by Joint Technical Committee TE/13, Symbols, Units and Quantities for Electrotechnology. It was approved on behalf of the Council of Standards Australia on 19 September 1997 and on behalf of the Council of Standards New Zealand on 19 September 1997. It was published on 5 December 1997.

The following interests are represented on Committee TE/13:

AirServices Australia
The Association of Consulting Engineers, Australia
Australian Chamber of Commerce & Industry
Department of Employment & Technical & Further Education, S.A.
Department of Defence, Australia
Institution of Engineers, Australia
Institution of Radio & Electronics Engineers, Australia
Ministry of Commerce, New Zealand
Queensland Mining Council
Royal Melbourne Institute of Technology

Review of Standards. To keep abreast of progress in industry, Joint Australian/New Zealand Standards are subject to periodic review and are kept up to date by the issue of amendments or new editions as necessary. It is important therefore that Standards users ensure that they are in possession of the latest edition, and any amendments thereto.

Full details of all Joint Standards and related publications will be found in the Standards Australia and Standards New Zealand Catalogue of Publications; this information is supplemented each month by the magazines 'The Australian Standard' and 'Standards New Zealand', which subscribing members receive, and which give details of new publications, new editions and amendments, and of withdrawn Standards.

Suggestions for improvements to Joint Standards, addressed to the head office of either Standards Australia or Standards New Zealand, are welcomed. Notification of any inaccuracy or ambiguity found in a Joint Australian/New Zealand Standard should be made without delay in order that the matter may be investigated and appropriate action taken.

PREFACE

This Standard was prepared by the Joint Standards Australia/Standards New Zealand Committee TE/13, Symbols, Units and Quantities for Electrotechnology. It is issued as a Joint Standard to supersede AS 1102.110—1989. This Standard is technically equivalent to and reproduced from IEC 617-10, *Graphical symbols for diagrams*, Part 10: *Telecommunications: Transmission*.

The objective of this Standard is to provide users of electrotechnical documents with graphical symbols for telecommunications transmission for the purposes of uniformity and clarity in presenting electrotechnical diagrams.

The Part numbers in this series of Standards correspond to equivalent Parts in the IEC 617 series but with '100' added to the IEC 617 Part number. For example, for the Standard IEC 617-2 refer to AS/NZS 1102.102. The symbol numbers within this Standard are the same as the IEC 617 numbers. In AS 1102.101, *Graphical symbols for electrotechnical documentation*, Part 101: *General information and general index*, the first part of the symbol number refers to the Part number, e.g. in the index, for symbol 102-01-01, refer to Part 102, symbol 02-01-01.

In this Standard, Australian and New Zealand variations have been listed in Appendix ZA and accordingly, the source text should be amended, supplemented or replaced as required. The changes to the source text are indicated with a marginal bar against each clause, table, figure or part thereof affected.

The term 'normative' has been used in this Standard to define the application of the appendix to which it applies. A 'normative' appendix is an integral part of a Standard.

As this Standard is reproduced from an international Standard, the following applies:

- (a) Its number appears on the cover and title page while the international Standard number appears only on the cover.
- (b) In the source text, 'this International Standard' should read 'this Australian/New Zealand Standard'.
- (c) A full point substitutes for a comma when referring to a decimal marker.

References to international Standards should be replaced by equivalent Australian or Australian/New Zealand Standards as follows:

<i>Reference to International Standard</i>		<i>Australian or Australian/New Zealand Standard</i>	
IEC		AS	
617	Graphical symbols for diagrams	1102	Graphical symbols for electrotechnical documentation
617-1	Part 1: General information, general index. Cross-reference tables	1102.101	Part 101: General information and general index

Please note that on the CD-ROM, only the English definitions are available. For the full version incorporating French terms, please refer to the hard copy.

© Copyright — STANDARDS AUSTRALIA/STANDARDS NEW ZEALAND

Users of Standards are reminded that copyright subsists in all Standards Australia and Standards New Zealand publications and software. Except where the Copyright Act allows and except where provided for below no publications or software produced by Standards Australia or Standards New Zealand may be reproduced, stored in a retrieval system in any form or transmitted by any means without prior permission in writing from Standards Australia or Standards New Zealand. Permission may be conditional on an appropriate royalty payment. Australian requests for permission and information on commercial software royalties should be directed to the head office of Standards Australia. New Zealand requests should be directed to Standards New Zealand.

Up to 10 percent of the technical content pages of a Standard may be copied for use exclusively in-house by purchasers of the Standard without payment of a royalty or advice to Standards Australia or Standards New Zealand.

Inclusion of copyright material in computer software programs is also permitted without royalty payment provided such programs are used exclusively in-house by the creators of the programs.

Care should be taken to ensure that material used is from the current edition of the Standard and that it is updated whenever the Standard is amended or revised. The number and date of the Standard should therefore be clearly identified.

The use of material in print form or in computer software programs to be used commercially, with or without payment, or in commercial contracts is subject to the payment of a royalty. This policy may be varied by Standards Australia or Standards New Zealand at any time.

CONTENTS

Page

INTRODUCTION	iv
CHAPTER I: TELECOMMUNICATION CIRCUITS	
Section 1	Lines and circuit usage 2
Section 2	Amplified circuits 3
CHAPTER II: ANTENNAS AND RADIO STATIONS	
Section 3	Qualifying symbols 4
Section 4	General symbol and examples of use 5
Section 5	Specific types of antennas and parts of antennas 7
Section 6	Radio stations 9
CHAPTER III: MICROWAVE TECHNOLOGY	
Section 7	Transmission paths 12
Section 8	One- and two-port devices 15
Section 9	Multi-port devices 20
Section 10	Couplers and probes 23
Section 11	Masers and lasers 25
CHAPTER IV: MISCELLANEOUS BLOCK SYMBOLS	
Section 12	Qualifying symbols for the types of pulse-modulation 27
Section 13	Signal generators 28
Section 14	Converters 29
Section 15	Amplifiers 30
Section 16	Networks with several pairs of terminals 31
Section 17	Limiters 35
Section 18	Terminating sets and hybrid transformers 37
Section 19	Modulators, demodulators, discriminators 38
Section 20	Concentrators, multiplexers 40
CHAPTER V: FREQUENCY SPECTRUM DIAGRAMS	
Section 21	Symbol elements 42
Section 22	Examples of frequency spectrum diagrams 45
CHAPTER VI: FIBRE OPTICS	
Section 23	Transmission line 48
Section 24	Transmission devices 50
Annex A — Older Symbols	
Annex C — English alphabetic index 54	
APPENDIX ZA	CHANGES TO THE IEC STANDARD FOR AUSTRALIA AND NEW ZEALAND 61
