**Risk management – Guidelines
on risk assessment techniques**

handbook

HB

SA/SNZ HB 89:2013

This Handbook was prepared by a working group under the direction of Joint Standards Australia/Standards New Zealand Committee QR-005, Dependability, with representatives from Joint Standards Australia/Standards New Zealand Committee OB-007, Risk Management. It was approved on behalf of the Council of Standards Australia on 5 December 2013 and on behalf of the Council of Standards New Zealand on 5 December 2013.

This Handbook was published on 18 December 2013.

The following are represented on Committee QR-005:

- Asset Management Council
- Australian Industry Group
- Australian Organisation for Quality
- Department of Defence (Australia)
- Engineers Australia
- Independent Transport Safety & Reliability Regulator
- Institution of Professional Engineers New Zealand
- New Zealand Institute of Safety Management
- New Zealand Society for Risk Management
- Risk Management Institution of Australasia
- University of New South Wales
- University of Wollongong

The following are represented on Committee OB-007:

- Attorney General's Department
- Australian Chamber of Commerce and Industry
- Australian Computer Society
- Australian Logistics Council
- Dairy Companies Association of New Zealand
- Department of Finance
- Financial Services Institute of Australasia
- Governance Institute of Australia
- Minerals Council of Australia
- Ministry of Business, Innovation and Employment, New Zealand
- New Zealand Institute of Safety Management
- New Zealand Society of Risk Management
- Risk Management Institution of Australasia
- Royal Australian Chemical Institute
- Society for Risk Analysis, Australia and New Zealand Regional
- The Institute of Internal Auditors, Australia
- United Independent Pools

Standards Australia and Standards New Zealand wish to acknowledge the participation of the expert individuals that contributed to the development of this Handbook through their representation on the Committee.

Keeping Standards up-to-date

Standards are living documents which reflect progress in science, technology and systems. To maintain their currency, all Standards are periodically reviewed, and new editions are published. Between editions, amendments may be issued. Standards may also be withdrawn. It is important that readers assure themselves they are using a current Standard, which should include any amendments which may have been published since the Standard was purchased.

Detailed information about joint Australian/New Zealand Standards can be found by visiting the Standards Web Shop at www.saiglobal.com.au or Standards New Zealand web site at www.standards.co.nz and looking up the relevant Standard in the on-line catalogue.

For more frequent listings or notification of revisions, amendments and withdrawals, Standards Australia and Standards New Zealand offer a number of update options. For information about these services, users should contact their respective national Standards organization.

We also welcome suggestions for improvement in our Standards, and especially encourage readers to notify us immediately of any apparent inaccuracies or ambiguities. Please address your comments to the Chief Executive of either Standards Australia or Standards New Zealand at the address shown on the back cover.

PREFACE

This Handbook was prepared by a working group under the direction of the Joint Standards Australia/Standards New Zealand Committee QR-005, Dependability, with representatives from the Joint Standards Australia/Standards New Zealand Committee OB-007, Risk Management. It supersedes HB 89—2012.

The purpose of this revision is to correct the referenced documents and introduce minor text changes to facilitate use of the Handbook. The Handbook is now a Joint Standards Australia/Standards New Zealand publication.

This Handbook is based on International Standard ISO/IEC 31010:2009, *Risk management—Risk assessment techniques*, and incorporates material from AS/NZS 3931:1998, *Risk analysis of technological systems—Application guide* [which is an identical adoption of IEC 60300-3-9:1995 (withdrawn)]. The objective of the Handbook is to provide guidance on good practice for assessing risk, as part of a risk management process in accordance with AS/NZS ISO 31000:2009, *Risk management—Principles and guidelines*, and to assist in making decisions under conditions of uncertainty. It provides an overview of a range of risk assessment techniques, and guidance on their selection and implementation.

AS/NZS ISO 31000 describes the fundamental principles of risk management, provides a framework for integrating risk management into an organization and describes a process for managing risk effectively. The Standard post-dates the development of many of the techniques described in this Handbook, so there may be some discrepancy between terminology traditionally used and that of AS/NZS ISO 31000 and ISO Guide 73, *Risk management—Vocabulary*. However, the techniques remain valid and, over time, it is expected that terminology will become fully compatible with the new standards.

Many of the techniques described in this Handbook were originally developed to consider risk in technological applications but increasingly they are being applied much more widely. However, techniques specifically developed for and used in the assessment of financial risks are not included here.

This Handbook strives to aid the process of ongoing development in the use of the techniques and a consistent terminology, aligned with the definitions in ISO Guide 73:2009 and AS/NZS ISO 31000:2009. Many of the techniques described have not traditionally included a requirement to explicitly link ‘risk’ to an organization’s objectives or to consider the organizational context. However, that is not to suggest that such a link was not assumed or inferred, or is not valuable; a clearly stated link is essential to ensure the effective use of these techniques.

CONTENTS

	<i>Page</i>
FOREWORD.....	4
SECTION 1 SCOPE AND GENERAL	
1.1 SCOPE.....	5
1.2 REFERENCED DOCUMENTS.....	6
1.3 TERMS AND DEFINITIONS	7
SECTION 2 RISK ASSESSMENT CONCEPTS	
2.1 PURPOSE.....	10
2.2 RISK ASSESSMENT AND RISK MANAGEMENT	10
SECTION 3 RISK ASSESSMENT PROCESS	
3.1 OVERVIEW	13
3.2 PREPARATION FOR RISK ASSESSMENT	13
3.3 RISK IDENTIFICATION.....	16
3.4 RISK ANALYSIS.....	17
3.5 QUALITATIVE AND QUANTITATIVE TECHNIQUES	17
3.6 RISK EVALUATION.....	23
3.7 RECORDING AND REPORTING	24
3.8 MONITORING AND REVIEWING RISK ASSESSMENT	25
3.9 APPLICATION OF RISK ASSESSMENT DURING LIFE CYCLE PHASES	25
SECTION 4 SELECTION OF RISK ASSESSMENT TECHNIQUES	
4.1 GENERAL.....	27
4.2 SELECTION OF TECHNIQUES	27
APPENDICES	
A COMPARISON OF RISK ASSESSMENT TECHNIQUES	29
B RISK ASSESSMENT TECHNIQUES.....	32
