

Australian/New Zealand Standard™

**Approval and test specification—  
Portable machines for electric arc  
welding and allied processes**

## **AS/NZS 3195:2002**

---

This Joint Australian/New Zealand Standard was prepared by Joint Technical Committee EL/2 - Safety of household and similar electrical appliances and small power transformers and EL/19, Electric Welding Plant. It was approved on behalf of the Council of Standards Australia on 21 May 2001 and by the Council of Standards New Zealand on 12 May 2001. It was published on 13 May 2002.

The following interests are represented on Committee EL/2 and EL/19

Association of Certification Bodies  
Australian Chamber of Commerce and Industry  
Australian Electrical and Electronic Manufacturers Association  
Canterbury Manufacturers Association New Zealand  
Consumer Electronic Suppliers Association, Australia  
Electrical regulatory authorities, Australia  
Electrical test laboratories  
Electrical consultants  
Electricity Supply Association of Australia  
Institution of Engineers Australia  
Metal Trades Industries Association of Australia  
Ministry of Consumer Affairs, New Zealand

Additional interests participating in preparation of this Standard:

Welding Technology Institute of Australia

---

### **Keeping Standards up-to-date**

Standards are living documents, which reflect progress in science, technology and systems.

To maintain their currency, all Standards are periodically reviewed, and new editions are published. Between editions, amendments may be issued. Standards may also be withdrawn. It is important that readers assure themselves they are using a current Standard, which should include any amendments which may have been published since the Standard was purchased.

Detailed information about joint Australian/New Zealand Standards can be found by visiting the Standards Australia web site at [www.standards.com.au](http://www.standards.com.au) or Standards New Zealand web site at [www.standards.co.nz](http://www.standards.co.nz) and looking up the relevant Standard in the on-line catalogue. Alternatively, both organizations publish an annual printed Catalogue with full details of all current Standards. For more frequent listings or notification of revisions, amendments and withdrawals, Standards Australia and Standards New Zealand offer a number of update options. For information about these services, users should contact their respective national Standards organization.

We also welcome suggestions for improvement in our Standards, and especially encourage readers to notify us immediately of any apparent inaccuracies or ambiguities. Please address your comment to the Chief Executive of either Standards Australia International or Standards New Zealand at the address shown on the back cover.

## CONTENTS

	Page
PREFACE.....	4
1 SCOPE.....	5
2 APPLICATION.....	5
2.1 General requirements of AS/NZS 3100.....	5
2.2 Specific requirements of this Standard.....	5
2.3 Requirements of other Standards.....	5
3 REFERENCED DOCUMENTS.....	6
4 DEFINITIONS.....	7
5 TRANSFORMERS.....	8
5.1 General.....	8
5.2 Power supply to external devices.....	8
6 CAPACITORS.....	8
7 SAFETY IMPEDANCES.....	9
8 ENCLOSING CASE.....	9
9 MEANS OF CONNECTION.....	9
9.1 Input side.....	9
9.1.1 Connecting facilities.....	9
9.1.2 Flexible cord.....	9
9.1.3 Warning notice.....	10
9.2 Output side.....	10
9.2.1 Connecting facilities.....	10
9.2.2 Output leads.....	10
9.2.3 Marking of connections.....	10
10 EARTHING FACILITIES.....	10
11 DOUBLE INSULATION.....	10
12 NO-LOAD VOLTAGE.....	11
12.1 General.....	11
12.2 Environment with increased hazard of electric shock.....	11
12.3 Environment without increased hazard of electric shock.....	12
12.4 Mechanically held torches with increased protection for the operator.....	12
12.5 Allied processes.....	12
13 EQUIPMENT WIRING.....	13
14 MARKING.....	13
15 SWITCHES.....	14
16 THERMAL CUTOUTS.....	14
17 HAZARD-REDUCING DEVICE.....	15
17.1 General.....	15
17.2 Voltage-reducing device.....	15
17.3 Switching device from alternating current (a.c.) to direct current (d.c.).....	15
17.4 Connection of a hazard-reducing device.....	15
17.5 Interference with operation of a hazard-reducing device.....	15
17.6 Operating time.....	15

17.7	Indication of satisfactory operation .....	16
17.8	Fail to a safe condition .....	16
17.9	Position for satisfactory operation .....	16
18	TESTS.....	16
18.1	General .....	16
18.2	Insulation resistance test.....	16
18.3	High voltage test .....	17
18.4	No-load voltage test .....	18
18.5	Maximum short-circuit input current test .....	18
18.6	Test for magnetic particle entry .....	18
18.7	Temperatures during normal operation .....	19
18.8	Temperatures during abnormal operation .....	19
18.9	Test of overheating protective devices.....	19
18.10	Rated load voltage test.....	20
18.11	Test for current rating of supply flexible cord .....	20
18.12	Resistance to heat, fire and tracking .....	20
Figure 1 - Measurement of peak values .....		11
Table 1 - Summary of allowable rated no-load voltages .....		13
Table 2 - Tests to be applied and order of application.....		17
Table 3 - Insulation resistance and high voltage requirements for power sources.....		17
