

AS/NZS CISPR 16.1.1:2006  
CISPR 16-1-1:2006

AS/NZS CISPR 16.1.1:2006

Australian/New Zealand Standard™

**Specification for radio disturbance and  
immunity measuring apparatus and  
methods**

**Part 1.1: Radio disturbance and  
immunity measuring apparatus—  
Measuring apparatus**

## **AS/NZS CISPR 16.1.1:2006**

This Joint Australian/New Zealand Standard was prepared by Joint Technical Committee TE-003, Electromagnetic Interferences. It was approved on behalf of the Council of Standards Australia on 10 April 2006 and on behalf of the Council of Standards New Zealand on 19 May 2006.

This Standard was published on 2 June 2006.

---

The following are represented on Committee TE-003:

Australian Broadcasting Corporation  
Australian Chamber of Commerce and Industry  
Australian Communications and Media Authority  
Australian Electrical and Electronic Manufacturers Association  
Australian Information Industry Association  
Consumer Electronics Supplier Association  
Electrical Compliance Testing Association  
Engineers Australia  
Free TV Australia  
Ministry of Economic Development, New Zealand  
National Measurement Institute  
SingTel Optus  
Society of Automotive Engineers, Australasia  
Telstra Corporation  
University of Western Australia  
Wireless Institute Australia

---

### **Keeping Standards up-to-date**

Standards are living documents which reflect progress in science, technology and systems. To maintain their currency, all Standards are periodically reviewed, and new editions are published. Between editions, amendments may be issued. Standards may also be withdrawn. It is important that readers assure themselves they are using a current Standard, which should include any amendments which may have been published since the Standard was purchased.

Detailed information about joint Australian/New Zealand Standards can be found by visiting the Standards Web Shop at [www.standards.com.au](http://www.standards.com.au) or Standards New Zealand web site at [www.standards.co.nz](http://www.standards.co.nz) and looking up the relevant Standard in the on-line catalogue.

Alternatively, both organizations publish an annual printed Catalogue with full details of all current Standards. For more frequent listings or notification of revisions, amendments and withdrawals, Standards Australia and Standards New Zealand offer a number of update options. For information about these services, users should contact their respective national Standards organization.

We also welcome suggestions for improvement in our Standards, and especially encourage readers to notify us immediately of any apparent inaccuracies or ambiguities. Please address your comments to the Chief Executive of either Standards Australia or Standards New Zealand at the address shown on the back cover.

---

*This Standard was issued in draft form for comment as DR 06064.*

## PREFACE

This Standard was prepared by the Joint Standards Australia/Standards New Zealand Committee TE-003, Electromagnetic Interferences to supersede AS/NZS CISPR 16.1.1:2004, as one of a series of Standards intended to facilitate control of electromagnetic interference and the compatibility of electrical and electronic equipment.

This Standard is identical with, and has been reproduced from CISPR 16-1-1:2006, *Specification for radio disturbance and immunity measuring apparatus and methods—Part 1-1: Radio disturbance and immunity measuring apparatus—Measuring apparatus*.

The objective of this Standard is to update CISPR 16-1-1 with amendments identified by CISPR subcommittee A.

As this Standard is reproduced from an International Standard, the following applies:

- (a) Its number does not appear on each page of text and its identity is shown only on the cover and title page.
- (b) In the source text ‘this part of CISPR 16’ should read ‘this Australian/New Zealand Standard’.
- (c) A full point should be substituted for a comma when referring to a decimal marker.
- (d) Any French text on figures should be ignored.

References to International Standards should be replaced by references to Australian or Australian/New Zealand Standards, as follows:

CISPR	AS/NZS CISPR
11 Industrial, scientific and medical (ISM) radio-frequency equipment—Electromagnetic disturbance characteristics—Limits and methods of measurement	11 Industrial, scientific and medical (ISM) radio-frequency equipment—Electromagnetic disturbance characteristics—Limits and methods of measurement
14 Electromagnetic compatibility—Requirements for household appliances, electric tools and similar apparatus	14 Electromagnetic compatibility—Requirements for household appliances, electric tools and similar apparatus
14-1 Part 1: Emission	14.1 Part 1: Emission
16 Specification for radio disturbance and immunity measuring apparatus and methods	16 Specification for radio disturbance and immunity measuring apparatus and methods
16-3 Part 1-3: CISPR technical reports	16.3 Part 1.3: CISPR technical reports

Only international references that have been adopted as Australian or Australian/New Zealand Standards have been listed.

The terms ‘normative’ and ‘informative’ have been used in this Standard to define the application of the annex to which they apply. A ‘normative’ annex is an integral part of a Standard, whereas an ‘informative’ annex is only for information and guidance.

## CONTENTS

	<i>Page</i>
1 Scope.....	1
2 Normative references .....	1
3 Terms and definitions .....	2
4 Quasi-peak measuring receivers for the frequency range 9 kHz to 1 000 MHz .....	4
5 Measuring receivers with peak detector for the frequency range 9 kHz to 18 GHz .....	16
6 Measuring receivers with average detector for the frequency range 9 kHz to 18 GHz .....	19
7 Measuring receivers with rms detector for the frequency range 9 kHz to 18 GHz .....	23
8 Measuring receivers for the frequency range 1 GHz to 18 GHz with amplitude probability distribution (APD) measuring function.....	26
9 Disturbance analyzers .....	27
 Annex A (normative) Determination of response to repeated pulses of quasi-peak and r.m.s. measuring receivers (subclauses 3.2, 4.4.2, 7.2.2 and 7.4.1) .....	 36
Annex B (normative) Determination of pulse generator spectrum (subclauses 4.4, 5.4, 6.4, 7.4) .....	41
Annex C (normative) Accurate measurements of the output of nanosecond pulse generators (subclauses 4.4, 5.4, 6.4, 7.4) .....	43
Annex D (normative) Influence of the quasi-peak measuring receiver characteristics on its pulse response (subclause 4.4.2) .....	45
Annex E (normative) Response of average and peak measuring receivers (subclause 6.2.1) .....	46
Annex F (normative) Performance check of the exceptions from the definitions of a click according to 4.2.3 of CISPR 14-1 .....	55
Annex G (informative) Rationale for the specifications of the APD measuring function .....	62
 Bibliography.....	 65
 Figure 1 – Pulse response curves .....	 8
Figure 2 – Limits of overall selectivity .....	12
Figure 3 – Arrangement for testing intermodulation effects .....	13
Figure 4 – Block diagram of an average detector. ....	22
Figure 5 – Response of the meter simulating network to an intermittent narrowband signal.....	22
Figure 6 – Example of a disturbance analyzer.....	29
Figure 7 – A graphical presentation of test signals used in the test of the analyzer for the performance check against the definition of a click according to Table 14 .....	30
