

Australian Standard™

**Geometrical product specifications
(GPS)—Indication of surface texture in
technical product documentation**

This Australian Standard was prepared by Committee ME-072, Technical Drawings. It was approved on behalf of the Council of Standards Australia on 9 March 2005. This Standard was published on 4 May 2005.

The following are represented on Committee ME-072:

Department of Defence
Department of Education, Training and Employment (South Australia)
Design Association of New Zealand
Institute for Drafting and Design Australia
Master Builders Australia
TAFE NSW
University of Melbourne

Keeping Standards up-to-date

Standards are living documents which reflect progress in science, technology and systems. To maintain their currency, all Standards are periodically reviewed, and new editions are published. Between editions, amendments may be issued. Standards may also be withdrawn. It is important that readers assure themselves they are using a current Standard, which should include any amendments which may have been published since the Standard was purchased.

Detailed information about Standards can be found by visiting the Standards Web Shop at www.standards.com.au and looking up the relevant Standard in the on-line catalogue.

Alternatively, the printed Catalogue provides information current at 1 January each year, and the monthly magazine, *The Global Standard*, has a full listing of revisions and amendments published each month.

Australian Standards™ and other products and services developed by Standards Australia are published and distributed under contract by SAI Global, which operates the Standards Web Shop.

We also welcome suggestions for improvement in our Standards, and especially encourage readers to notify us immediately of any apparent inaccuracies or ambiguities. Contact us via email at mail@standards.org.au, or write to the Chief Executive, Standards Australia, GPO Box 5420, Sydney, NSW 2001.

This Standard was issued in draft form for comment as DR 04296.

PREFACE

This Standard was prepared by the Standards Australia Committee ME-072, Technical Drawings.

This Standard is identical with and reproduced from ISO 1302:2002, *Geometrical product specifications (GPS)—Indication of surface texture in technical product documentation*.

As this Standard is reproduced from an International Standard, the following applies:

- (a) Its number appears on the cover and title page while the International Standard number appears only on the cover.
- (b) In the source text, ‘this International Standard’ should read ‘this Australian Standard’.
- (c) A full point substitutes for a comma when referring to a decimal marker.

References to International Standards should be replaced by equivalent Australian Standards, as follows:

<i>Reference to International Standard</i>		<i>Australian Standard</i>
ISO		AS
129	Technical drawings—Indication of dimensions and tolerances	—
129-1	Part 1: General principles	—
1101	Geometrical Product Specifications (GPS)—Geometrical tolerancing Tolerances of form, orientation, location and run-out	—
3098	Technical product documentation—Lettering	—
3098-2	Part 2: Latin alphabet, numerals and marks	—
3274	Geometrical Product Specifications (GPS)—Surface texture: Profile method—Nominal characteristics of contact (stylus) instruments	—
4287	Geometrical product specifications (GPS)—Surface texture: Profile method—Terms, definitions and surface texture parameters	—
4288	Geometrical product specifications (GPS)—Surface texture: Profile method—Rules and procedures for the assessment of surface texture	—
8785	Geometrical Product Specification (GPS)—Surface imperfections—Terms, definitions and parameters	—
10135	Technical drawings—Simplified representation of moulded, cast and forged parts	—
10209	Technical product documentation—Vocabulary	—
10209.1	Part 1: Terms relating to technical drawings General and types of drawings	—
