Australian Standard®

Information technology—Open Systems Interconnection— Specification of Abstract Syntax Notation One (ASN.1)

This Australian Standard was prepared by Committee IT/1, Information Systems— Interconnection. It was approved on behalf of the Council of Standards Australia on 1 July 1991 and published on 9 August 1991.

The following interests are represented on Committee IT/1:

AUSSAT

Australian Association of Permanent Building Societies

Australian Bankers Association

Australian Bureau of Statistics

Australian Committee of Directors and Principals

Australian Computer Equipment Manufacturers Association

Australian Computer Society

Australian Computer Users Association

Australian Computing Services Association

Australian Information Industry Association

Australian Vice Chancellors Committee

CSIRO—Institute of Information and Communication Technologies

Department of Defence

Department of Industry, Technology and Commerce

Information Exchange Steering Committee

Life Insurance Federation of Australia

OTC

Public Service Board, N.S.W.

Telecom Australia

Additional interests participating in preparation of Standard:

Computer consultants

Review of Australian Standards. To keep abreast of progress in industry, Australian Standards are subject to periodic review and are kept up-to-date by the issue of amendments or new editions as necessary. It is important therefore that Standards users ensure that they are in possession of the latest edition, and any amendments thereto.

Full details of all Australian Standards and related publications will be found in the Standards Australian Catalogue of Publications; this information is supplemented each month by the magazine 'The Australian Standard', which subscribing members receive, and which gives details of new publications, new editions and amendments, and of withdrawn Standards.

and amendments, and of withdrawn Standards. Suggestions for improvements to Australian Standards, addressed to the head office of Standards Australia, are welcomed. Notification of any inaccuracy or ambiguity found in an Australian Standard should be made without delay in order that the matter may be investigated and appropriate action taken.

AS 3625-1991

## PREFACE

This Standard was prepared by the Standards Australia Committee on Information Systems-Interconnection. It is identical with and has been reproduced from ISO/IEC 8824:1990, Information technology-Open Systems Interconnection-Specification of Abstract Syntax Notation One (ASN.1). The Standard is one of a series of Open Systems Interconnection (OSI) Standards which are currently under development. Since OSI Standards are developmental, there may be some minor

difficulties encountered in their implementation. For this reason, Standards Australia will be providing, through the OSI Help Desk, a service to coordinate and disseminate information concerning difficulties which are identified in using this Standard.

Under arrangements made between Standards Australia and the international Standards bodies, ISO and IEC, as well as certain other Standards organizations, users of this Australian Standard are advised of the following:

- (a) Copyright is vested in Standards Australia.
- (b) The number of this Standard is not reproduced on each page; its identity is shown only on the cover and title pages.
- For the purpose of this Australian Standard, the ISO/IEC text should be modified as follows:
- (i) *Terminology* The words 'Australian Standard' should replace the words 'International Standard' wherever they appear.
- (ii) References The references to International Standards should be replaced by references to Australian Standards as below. Special note should be taken of the fact that ISO Standards 2014, 3307 and 4031 were superseded by ISO 8601: 1988 (AS 3802—1989).
