#### **Keeping Standards up-to-date**

Standards are living documents which reflect progress in science, technology and systems. To maintain their currency, all Standards are periodically reviewed, and new editions are published. Between editions, amendments may be issued. Standards may also be withdrawn. It is important that readers assure themselves they are using a current Standard, which should include any amendments which may have been published since the Standard was purchased.

Detailed information about Standards can be found by visiting the Standards Australia web site at [www.standards.com.au](http://www.standards.com.au) and looking up the relevant Standard in the on-line catalogue.

Alternatively, the printed Catalogue provides information current at 1 January each year, and the monthly magazine, *The Australian Standard*, has a full listing of revisions and amendments published each month.

We also welcome suggestions for the improvement in our Standards, and especially encourage readers to notify us immediately of any apparent inaccuracies or ambiguities. Contact us via email at [mail@standards.com.au](mailto:mail@standards.com.au), or write to the Chief Executive, Standards Australia International Ltd, PO Box 5420, Sydney, NSW 2001.

## PREFACE

This Standard was prepared by the Joint Standards Australia/Standards New Zealand Committee ME/51, Amusement Rides and Devices, to supersede AS 3533 Supplement 1—1988, *Logbook—Amusement rides and devices*.

*This Standard incorporates Amendment No. 1 (March 2001). The changes required by the Amendment(s) are indicated in the text by a marginal bar and amendment number against the clause, note, table, figure, or part thereof affected.*

This Standard is the result of a consensus among Australian and New Zealand representatives on the Joint Committee to produce it as an Australian Standard.

The purpose of this logbook is to provide a succinct record of the important issues relating to the safety of an amusement ride or device and to indicate briefly where further information can be sought. The logbook should be read in conjunction with AS 3533.2. AS 3533.2 contains definitions and registration information applicable to the logbook, while also specifying requirements and providing guidance in every aspect of the operation and maintenance of amusement rides and devices.

Regulatory authorities may require, as a minimum, the information contained in this logbook to be kept for individual amusement rides and devices.

A1

Such records should be made available to inspecting personnel, authorities, insurers and other appropriate persons by arrangement.

The term 'informative' has been used in this Standard to define the application of the appendix to which it applies. An 'informative' appendix is only for information and guidance.

## CONTENTS

<i>Page heading and purpose</i>	<i>Page</i>
NAME AND IDENTIFICATION . . . . . Provides a record of identification for the amusement ride or device, with contact information for both the manufacturer and supplier.	5
OWNERSHIP RECORD . . . . . Traces changes of ownership throughout the working life of an amusement ride or device.	6
ORIGINAL REGISTRATION DETAILS . . . . . Records the initial registration of an amusement ride or device for each jurisdiction in which the device has been erected and operated.	7
CURRENT REGISTRATION DETAILS . . . . . Records the current status of registration for an amusement ride or device.	7
NOTE: Where registration has lapsed, any change in identification or unit numbers should be noted upon re-registration.	
DATA SUPPLIED . . . . . Records the original background data and any subsequent information, as supplied by the manufacturer or other sources, for an amusement ride or device.	10
RECORD OF INITIAL ACCEPTANCE TESTS . . . . . Provides a simple format and record of testing carried out before the amusement ride or device was committed to service, and contact details of the person who carried out such testing in the case of review.	10
GENERAL DATA AND RESTRICTIONS . . . . . Provides a ready reference concerning the operational requirements of an amusement ride or device, and any restrictions in place.	11
REQUIRED INSPECTIONS (INCLUDING NON-DESTRUCTIVE TESTING) . . . . . Records the requirements for any special inspection procedures deemed necessary by the manufacturer over the life of the amusement ride or device.	12
NOTE: Additional requirements may come into effect due to experience or by notification from the manufacturer.
