AS 62103—2006

Australian Standard<sup>®</sup>

# Electronic equipment for use in power installations

This Australian Standard® was prepared by Committee EL-027, Power Electronics. It was approved on behalf of the Council of Standards Australia on 10 November 2006. This Standard was published on 15 December 2006.

---

The following are represented on Committee EL-027:

- Australian Communications and Media Authority
  - Australian Electrical and Electronic Manufacturers Association
  - Bureau of Steel Manufacturers of Australia
  - Department of Defence (Australia)
  - Energy Networks Association
  - Monash University
- 

This Standard was issued in draft form for comment as DR 06587.

Standards Australia wishes to acknowledge the participation of the expert individuals that contributed to the development of this Standard through their representation on the Committee and through public comment period.

---

### **Keeping Standards up-to-date**

Australian Standards® are living documents that reflect progress in science, technology and systems. To maintain their currency, all Standards are periodically reviewed, and new editions are published. Between editions, amendments may be issued.

Standards may also be withdrawn. It is important that readers assure themselves they are using a current Standard, which should include any amendments that may have been published since the Standard was published.

Detailed information about Australian Standards, drafts, amendments and new projects can be found by visiting **[www.standards.org.au](http://www.standards.org.au)**

Standards Australia welcomes suggestions for improvements, and encourages readers to notify us immediately of any apparent inaccuracies or ambiguities. Contact us via email at **[mail@standards.org.au](mailto:mail@standards.org.au)**, or write to Standards Australia, GPO Box 476, Sydney, NSW 2001.

## PREFACE

This Standard was prepared by the Standards Australia Committee EL-027, Power Electronics.

The objective of this Standard is to provide designers, manufacturers and purchasers with generic requirements for electronic power equipment. This Standard applies where there is no product specific Standard available.

This Standard is identical with, and has been reproduced from IEC 62103, Ed.1.0 (2003), *Electronic equipment for use in power installations*.

Informative notes have been added in Clauses 5.2.11.1 and 9.2.

As this Standard is reproduced from an International Standard, the following applies:

- (a) Its number does not appear on each page of text and its identity is shown only on the cover and title page.
- (b) In the source text 'IEC 62103' should read 'AS 62103'.
- (c) A full point should be substituted for a comma when referring to a decimal marker.
- (d) Any French text on figures should be ignored.

The terms 'normative' and 'informative' are used to define the application of the annex to which they apply. A normative annex is an integral part of a standard, whereas an informative annex is only for information and guidance.

# CONTENTS

	<i>Page</i>
INTRODUCTION .....	iv
1 Scope .....	1
2 Normative references .....	1
3 Terms and definitions .....	5
4 Requirements for the entire system .....	15
4.1 Normal function .....	15
4.2 Damage to persons or material .....	16
4.3 EE connected to unearthed supply mains under earth fault conditions .....	16
4.4 Earthing requirements .....	17
4.5 Wires and cables for interconnection .....	17
4.6 Fuses in neutral and protective conductors .....	17
5 Safety requirements .....	18
5.1 General requirements .....	18
5.2 Requirements for EE with regard to protection against electric shock .....	20
5.3 Requirements for EEs in installations with regard to protection against electric shock .....	55
6 Environmental requirements and conditions .....	57
6.1 Climatic conditions .....	58
6.2 Mechanical requirements (General) .....	61
6.3 Electrical and electromagnetic requirements .....	62
7 Requirements for electronic equipment .....	64
7.1 Design and construction .....	64
7.2 Marking, identification, documentation .....	69
8 Requirements for the assembly of EE(s) .....	71
8.1 General .....	71
8.2 Fitting tolerances after assembly .....	71
8.3 Supply mains .....	72
9 Testing .....	73
9.1 General .....	74
9.2 Compliance with this standard .....	76
9.3 Overview of tests .....	77
9.4 Performance of the tests .....	78
Annex A (informative) Additional information .....	95
Bibliography .....	135
