

Safety of machinery

Part 3408: Safety of packaging machines—Strapping machines

This Australian Standard is the identical adoption of EN 415-8:2008, Safety of packaging machines — Part 8: Strapping machines, with the permission of the European Committee for Standardization - CEN, Avenue Marnix 17, B-1000 Brussels, Belgium.

AS 4024.3408:2018

This Australian Standard® was prepared by SF-041, Safety of Machinery. It was approved on behalf of the Council of Standards Australia on 7 February 2018.

This Standard was published on 3 May 2018.

The following are represented on Committee SF-041:

- Australian Industry Group
- Australian Manufacturing Workers' Union
- Australian Packaging and Processing Machinery Association
- Engineers Australia
- Human Factors and Ergonomics Society of Australia
- Institute of Instrumentation, Control and Automation, Australia
- NSCA Foundation
- NSW Department of Industry, Skills and Regional Development
- Safety Institute of Australia
- SafeWork NSW
- Swinburne University of Technology
- University of Melbourne
- Workplace Health and Safety Queensland
- WorkSafe Victoria

This Standard was issued in draft form for comment as DR AS EN 4024.3408:2017.

Preface

This Standard was prepared by the Australian members of the Joint Standards Australia/Standards New Zealand Committee SF-041, Safety of Machinery.

The objective of this Standard is to specify safety requirements for machine design, construction, installation, commissioning, operation, adjustment, maintenance and cleaning of strapping machines. This applies to the following groups of machines—

- (a) Powered hand strapping tools.
- (b) Semi-automatic strapping machines.
- (c) Automatic strapping machines.
- (d) Horizontal pallet strapping machines.
- (d) Vertical pallet strapping machines.

This Standard is identical with, and has been reproduced from, EN 415-8:2008, *Safety of packaging machines*, Part 8: *Strapping machines*.

As this document has been reproduced from an International Standard, the following applies:

- (i) In the source text ‘this European Standard’ should read ‘this Australian Standard’.
- (ii) A full point substitutes for a comma when referring to a decimal marker.

Australian or Australian/New Zealand Standards that are identical adoptions of international normative references may be used interchangeably. Refer to the online catalogue for information on specific Standards.

The terms ‘normative’ and ‘informative’ are used in Standards to define the application of the appendices or annexes to which they apply. A ‘normative’ appendix or annex is an integral part of a Standard, whereas an ‘informative’ appendix or annex is only for information and guidance.
