

AS 2006—1986

Australian Standard[®]

**HIGH VOLTAGE A.C.
SWITCHGEAR AND
CONTROLGEAR—
CIRCUIT-BREAKERS FOR RATED
VOLTAGES ABOVE 1000 V**

[Title allocated by the Defence Cataloguing Authority:
SWITCHGEAR AND CONTROLGEAR, ELECTRICAL
(Circuit Breaker, A.C., above 1 kV)]

This Australian standard was prepared by Committee EL/7, Power Switchgear. It was approved on behalf of the Council of the Standards Association of Australia on 22 April 1986 and published on 7 July 1986.

The following interests are represented on Committee EL/7:

Australian British Chamber of Commerce
Australian Electrical and Electronic Manufacturers Association
Confederation of Australian Industry
Electricity Supply Association of Australia
Institution of Engineers Australia
Railways of Australia Committee
Testing Authorities

Review of Australian Standards. *To keep abreast of progress in industry, Australian Standards are subject to periodic review and are kept up to date by the issue of amendments or new editions as necessary. It is important therefore that Standards users ensure that they are in possession of the latest edition, and any amendments thereto.*

Full details of all Australian Standards and related publications will be found in the Standards Australia Catalogue of Publications; this information is supplemented each month by the magazine 'The Australian Standard', which subscribing members receive, and which gives details of new publications, new editions and amendments, and of withdrawn Standards.

Suggestions for improvements to Australian Standards, addressed to the head office of Standards Australia, are welcomed. Notification of any inaccuracy or ambiguity found in an Australian Standard should be made without delay in order that the matter may be investigated and appropriate action taken.

This standard was issued in draft form for comment as DR 85033.

PREFACE

This standard was prepared by the association's Committee on Power Switchgear to supersede AS 2006—1980.

It is based on the following IEC documents for the revision of IEC 56, High Voltage Alternating Current Circuit-breakers, Parts 1 to 6 and acknowledgment is made of the assistance received therefrom:

17A(Central Office)173:	Revision of Publication 56-1, General and Definitions.
17A(Central Office)174:	Revision of Publication 56-2, Rating.
17A(Central Office)175:	Revision of Publication 56-3, Design and Construction.
17A(Central Office)176:	Revision of Publication 56-4, Type Tests and Routine Tests.
17A(Central Office)177:	Revision of Publication 56-5, Rules for the Selection of Circuit-breakers for Service.
17A(Central Office)178:	Revision of Publication 56-6, Information to be Given with Enquiries, Tenders and Orders and Rules for Transport, Erection and Maintenance.
17A(Central Office)179:	Revision of IEC Publications 56-1, 56-2 and 56-6 in Respect of Time Quantities.
17A(Central Office)180:	Amendments of IEC Publication 56-2 and 56-4 in Respect of Short-line Fault Tests.
17A(Central Office)181:	Amendment to IEC Publication 56-4 in Respect of Tightness Specifications and Tests.
17A(Central Office)195:	Amendments to IEC Publication 56 in Respect of the Rated Operating Sequence.
17A(Secretariat)262:	Revision of IEC Publication 56-4 High-voltage Alternating Current Circuit-breakers Type Tests and Routine Tests.

The standard is intended to be read in conjunction with AS 2650, High Voltage A.C. Switchgear and Controlgear—Common Requirements, as, in general, the clauses herein modify or supplement the corresponding clauses of AS 2650. Clauses having numbers with a component part of 101 or greater are specific to this standard only.

The clause numbering herein closely follows that of the above IEC documents and IEC 694, Common Clauses for High Voltage Switchgear and Controlgear Standards.

Where this standard deviates technically from the above IEC documents by way of different or additional requirements, this fact is indicated by a rule in the margin against the clause, or part thereof, affected. A summary of technical variations between this standard and the above IEC documents is given in the Annex.

Where reference is made directly to clauses of the same number in AS 2650 without amendment thereto, those clauses are shown in the Contents in bold type.

A revision of IEC 427, Synthetic Testing of High-voltage Alternating Current Circuit-breakers, is in course of preparation, and will be the basis of either a new Australia standard or a supplement to this standard. This work is available as IEC document 17A(Secretariat) 263 at this stage of its development.

Users of Standards are reminded that copyright subsists in all Standards Australia publications and software. Except where the Copyright Act allows and except where provided for below no publications or software produced by Standards Australia may be reproduced, stored in a retrieval system in any form or transmitted by any means without prior permission in writing from Standards Australia. Permission may be conditional on an appropriate royalty payment. Requests for permission and information on commercial software royalties should be directed to the head office of Standards Australia.

Standards Australia will permit up to 10 percent of the technical content pages of a Standard to be copied for use exclusively in-house by purchasers of the Standard without payment of a royalty or advice to Standards Australia.

Standards Australia will also permit the inclusion of its copyright material in computer software programs for no royalty payment provided such programs are used exclusively in-house by the creators of the programs.

Care should be taken to ensure that material used is from the current edition of the Standard and that it is updated whenever the Standard is amended or revised. The number and date of the Standard should therefore be clearly identified.

The use of material in print form or in computer software programs to be used commercially, with or without payment, or in commercial contracts is subject to the payment of a royalty. This policy may be varied by Standards Australia at any time.

NOTE: The listing of clauses in bold type below indicates that those clauses in AS 2650 apply without amendment in this standard.

1. SCOPE AND GENERAL	
1.1 SCOPE	6
1.2 APPLICATION	6
1.3 REFERENCED DOCUMENTS	6
2. SERVICE CONDITIONS	
2.1 NORMAL SERVICE CONDITIONS	6
2.2 SPECIAL SERVICE CONDITIONS	6
3. DEFINITIONS	
3.1 GENERAL	6
3.101 GENERAL TERMS	7
3.102 SWITCHING DEVICES	8
3.103 PARTS OF CIRCUIT-BREAKERS	8
3.104 OPERATION	8
3.105 CHARACTERISTIC QUANTITIES OF CIRCUIT-BREAKERS	9
4. RATINGS	
4.0 LIST OF RATINGS	20
4.1 RATED VOLTAGE	20
4.2 RATED INSULATION LEVEL	20
4.3 RATED FREQUENCY	20
4.4 RATED NORMAL CURRENT AND TEMPERATURE RISE	20
4.5 RATED SHORT-TIME WITHSTAND CURRENT	20
4.6 RATED PEAK WITHSTAND CURRENT	20
4.7 RATED DURATION OF SHORT-CIRCUIT	20
4.8 RATED SUPPLY VOLTAGE OF CLOSING AND OPENING DEVICES AND AUXILIARY CIRCUITS	21
4.9 RATED SUPPLY FREQUENCY OF OPERATING DEVICES AND AUXILIARY CIRCUITS	21
4.10 RATED PRESSURE OF COMPRESSED GAS SUPPLY FOR OPERATION OR INTERRUPTION	21
4.11 RATED MECHANICAL LOAD OF TERMINALS	21
4.101 RATED SHORT-CIRCUIT BREAKING CURRENT	21
4.102 RATED TRV FOR TERMINAL FAULTS	22
4.103 RATED SHORT-CIRCUIT MAKING CURRENT	27
4.104 RATED OPERATING SEQUENCE	27
4.105 RATED CHARACTERISTICS FOR SHORT-LINE FAULTS	28
4.106 RATED OUT-OF-PHASE BREAKING CURRENT	30
4.107 RATED LINE-CHARGING BREAKING CURRENT	31
4.108 RATED CABLE-CHARGING BREAKING CURRENT	31
4.109 RATED SINGLE CAPACITOR BANK BREAKING CURRENT	32
4.110 RATED BACK-TO-BACK CAPACITOR BANK BREAKING CURRENT	32
4.111 RATED CAPACITOR BANK INRUSH MAKING CURRENT	33
4.112 RATED SMALL INDUCTIVE BREAKING CURRENT	33
4.113 RATED TIME QUANTITIES	33
4.114 COORDINATION OF RATED VALUES	33
