# Australian/New Zealand Standard<sup>™</sup>

### Safety in laboratories

Part 5: Non-ionizing radiations— Electromagnetic, sound and ultrasound

#### AS/NZS 2243.5:2004

This Joint Australian/New Zealand Standard was prepared by Joint Technical Committee CH-026, Safety in Laboratories. It was approved on behalf of the Council of Standards Australia on 27 November 2003 and on behalf of the Council of Standards New Zealand on 23 February 2004. It was published on 4 March 2004.

The following are represented on Committee CH-026:

Australian Industry Group Australian Institute of Occupational Hygienists CSIRO Department of Labour, New Zealand Department of Primary Industries (Victoria) Independent Chairman Ministry of Economic Development, New Zealand National Association of Testing Authorities, Australia The New Zealand Chemical Industry Council New Zealand Microbiological Society Victorian WorkCover Authority WorkCover New South Wales

Additional interests participating in the preparation of this Standard:

Australian Radiation Protection and Nuclear Safety Agency Queensland University of Technology Radiation consultants Western Sydney Area Health Service

#### Keeping Standards up-to-date

Standards are living documents which reflect progress in science, technology and systems. To maintain their currency, all Standards are periodically reviewed, and new editions are published. Between editions, amendments may be issued. Standards may also be withdrawn. It is important that readers assure themselves they are using a current Standard, which should include any amendments which may have been published since the Standard was purchased.

Detailed information about joint Australian/New Zealand Standards can be found by visiting the Standards Web Shop at www.standards.com.au or Standards New Zealand web site at www.standards.co.nz and looking up the relevant Standard in the on-line catalogue.

Alternatively, both organizations publish an annual printed Catalogue with full details of all current Standards. For more frequent listings or notification of revisions, amendments and withdrawals, Standards Australia and Standards New Zealand offer a number of update options. For information about these services, users should contact their respective national Standards organization.

We also welcome suggestions for improvement in our Standards, and especially encourage readers to notify us immediately of any apparent inaccuracies or ambiguities. Please address your comments to the Chief Executive of either Standards Australia International or Standards New Zealand at the address shown on the back cover.

This Standard was issued in draft form for comment as DR 02640.

### PREFACE

This Standard was prepared by Standards Australia/Standards New Zealand Committee CH-026, Safety in Laboratories, to supersede AS 2243.5—1993, *Safety in laboratories* Part 5: *Non-ionizing radiations*.

The setting of exposure criteria is not conducted by Standards Australia or Standards New Zealand. Such criteria are set by regulations or organizational policy. They may be found in the occupational health and safety or related regulations that are applicable for the workplace under assessment. Where limits are reproduced in this Standard, they are provided as an example for guidance only and the source is indicated. Readers are requested to ascertain the appropriate regulatory body for their circumstances and check with it for the current requirements or recommendations to be applied.

This revision includes the following modifications:

- (a) Clarification that field work outside the laboratory and exposures of persons for medical purposes are excluded.
- (b) Differentiation between direct and indirect hazards for ultraviolet, visible and laser radiations.
- (c) Revised text on the various types of radiation and updated references to Standards and other documents where various types of radiation are addressed in more detail.
- (d) Clarification of the source of any limits quoted in this Standard and their status.

This Standard is the fifth in the AS/NZS 2243 series aimed at promoting safety in laboratories. Other Parts of the series are as follows:

- Part 1: General
- Part 2: Chemical aspects
- Part 3: Microbiological aspects and containment facilities
- Part 4: Ionizing radiations
- Part 6: Mechanical aspects
- Part 7: Electrical aspects
- Part 8: Fume cupboards
- Part 9: Recirculating fume cabinets
- Part 10: Storage of chemicals

The term 'informative' has been used in this Standard to define the application of the appendices. An 'informative' appendix is only for information and guidance.

### CONTENTS

Page
------

FOREWORD			
SECTIO	ON 1 SCOPE AND GENERAL		
1.1	SCOPE		
1.2	OBJECTIVE		
1.3	REFERENCED DOCUMENTS		
1.4	DEFINITIONS		
1.5	GENERAL PRINCIPLES OF PROTECTION		
1.6	INCIDENT AND ACCIDENT REPORTING		
1.7	STATUTORY REQUIREMENTS		
SECTIO	ON 2 ULTRAVIOLET RADIATION		
2.1	GENERAL	13	
2.1	SOURCES OF UV RADIATION		
2.2	HAZARDS		
2.5	RECOMMENDED EXPOSURE LIMITS		
2.5	PROTECTION		
2.0			
SECTIO	ON 3 VISIBLE LIGHT		
3.1	GENERAL		
3.2	SOURCES OF VISIBLE LIGHT		
3.3	ТНЕ ЕҮЕ		
3.4	HAZARDS		
3.5	RECOMMENDED EXPOSURE LIMITS		
3.6	PROTECTION		
SECTIO	ON 4 INFRARED RADIATION		
4.1	GENERAL	20	
4.2	SOURCES OF RADIATION		
4.3	HAZARDS		
4.4	RECOMMENDED EXPOSURE LIMITS		
4.5	PROTECTION		
	ON 5 RADIOFREQUENCY RADIATION		
	GENERAL		
5.2	SOURCES OF RADIATION		
5.3	HAZARDS AND EFFECTS		
5.4	RECOMMENDED EXPOSURE LIMITS		
5.5	PROTECTION		
SECTION 6 EXTREMELY LOW FREQUENCY RADIATION			
6.1	GENERAL	24	
6.2	SOURCES OF RADIATION		
6.3	HAZARDS		
6.4	EXPOSURE LIMITS		
6.5	PROTECTION		
0.0
