

AS/NZS 3584.1:2005

AS/NZS 3584.1:2005

Australian/New Zealand Standard™

Diesel engine systems for underground coal mines

Part 1: Fire protected—Heavy duty

AS/NZS 3584.1:2005

This Joint Australian/New Zealand Standard was prepared by Joint Technical Committee ME-018, Mining Equipment. It was approved on behalf of the Council of Standards Australia on 11 January 2005 and on behalf of the Council of Standards New Zealand on 17 December 2004.
This Standard was published on 8 April 2005.

The following are represented on Committee ME-018:

Australasian Institute of Mining and Metallurgy
Australian Chamber of Commerce and Industry
Australian Coal Association
Bureau of Steel Manufacturers of Australia
Chamber of Minerals and Energy of Western Australia
Department of Infrastructure, Energy and Resources (Tasmania)
Department of Labour, New Zealand
Department of Mineral Resources, N.S.W.
Department of Minerals and Energy, W.A.
Department of Mines and Energy (Qld)
Department of Natural Resources and Environment, Vic
Institution of Engineers Australia
Institution of Mining Engineers, Australia
Minerals Council of Australia
South Australian Chamber of Mines and Energy

Keeping Standards up-to-date

Standards are living documents which reflect progress in science, technology and systems. To maintain their currency, all Standards are periodically reviewed, and new editions are published. Between editions, amendments may be issued. Standards may also be withdrawn. It is important that readers assure themselves they are using a current Standard, which should include any amendments which may have been published since the Standard was purchased.

Detailed information about joint Australian/New Zealand Standards can be found by visiting the Standards Web Shop at www.standards.com.au or Standards New Zealand web site at www.standards.co.nz and looking up the relevant Standard in the on-line catalogue.

Alternatively, both organizations publish an annual printed Catalogue with full details of all current Standards. For more frequent listings or notification of revisions, amendments and withdrawals, Standards Australia and Standards New Zealand offer a number of update options. For information about these services, users should contact their respective national Standards organization.

We also welcome suggestions for improvement in our Standards, and especially encourage readers to notify us immediately of any apparent inaccuracies or ambiguities. Please address your comments to the Chief Executive of either Standards Australia or Standards New Zealand at the address shown on the back cover.

PREFACE

This Standard was prepared by the Joint Standards Australia/Standards New Zealand Committee ME-018, Mining Equipment.

The objective of this Standard is to promote the safety of fire-protected diesel engine systems that are used underground in coal mines.

This Standard is one of the following series of the standards:

AS/NZS

- 3584 Diesel engine systems for underground coal mines
- 3584.1 Part 1: Fire protected (this Standard)
- 3584.2 Part 2: Explosion protected
- 3584.3 Part 3: Maintenance

This edition allows for the implementation of new technology in diesel engine systems, including the use of dry exhaust systems, limiting the emission of diesel aerosol particulates and generally reducing the emission of pollutants. This edition facilitates the use of electronically managed diesel engine systems. Its emphasis is to facilitate the implementation of new technology resulting in the increased operational safety of diesel engine systems.

Statements expressed in mandatory terms in notes to tables are deemed to be requirements of this Standard.

The terms 'normative' and 'informative' have been used in this Standard to define the application of the appendix to which they apply. A 'normative' appendix is an integral part of a Standard, whereas an 'informative' appendix is only for information and guidance.

CONTENTS

	<i>Page</i>
SECTION 1 SCOPE AND GENERAL	
1.1 SCOPE	5
1.2 APPLICATION	5
1.3 REFERENCED DOCUMENTS	6
1.4 DEFINITIONS	7
SECTION 2 DESIGN AND CONSTRUCTION	
2.1 DESIGNATED SAFE AREA BARRIER	10
2.2 METHANE DETECTION	10
2.3 ENGINE TYPES	10
2.4 CONDITION MONITORING	10
2.5 SURFACE TEMPERATURE	10
2.6 MATERIALS	11
2.7 VEE-PULLEYS	11
2.8 ENGINE BREATHER	11
2.9 STARTING AIDS	11
2.10 FUEL SYSTEMS	11
2.11 AIR INLET SYSTEMS	11
2.12 AIR COMPRESSORS	12
2.13 COOLING SYSTEMS	12
2.14 ENGINE SHUTDOWN SYSTEMS	12
2.15 EXHAUST	13
2.16 ELECTRICAL SYSTEMS	17
SECTION 3 MARKING	
3.1 COMPLIANCE PLATE	22
3.2 WARNING LABELS	23
SECTION 4 TESTING	
4.1 TYPE TESTING	24
4.2 MODIFIED COMPONENTS	24
4.3 INSTALLED TESTS BY THE DIESEL ENGINE SYSTEM MANUFACTURER...	25
4.4 ROUTINE COMMISSIONING TESTS BY THE DIESEL ENGINE SYSTEM MANUFACTURER	25
4.5 USE OF LOW EMISSION FUEL	26
4.6 MANAGEMENT SYSTEM	26
SECTION 5 DOCUMENTATION	
5.1 DOCUMENTATION TO BE SUPPLIED	27
5.2 GENERAL ARRANGEMENT DRAWINGS	28
APPENDICES	
A MEANS FOR DEMONSTRATING COMPLIANCE WITH THIS STANDARD	31
B DETERMINING LOAD-SPEED CHARACTERISTICS	32
C DETERMINING CONSTITUENTS OF EXHAUST GAS	36
D DETERMINING GASEOUS EMISSION LEVELS	42
E DETERMINING DURATION, TEMPERATURE AND FLUID USAGE	50
F TESTING ENGINE PROTECTION SYSTEMS	54
G TESTING SPARK ARRESTER COMPONENTS	58
