

AS 3648—1993

Australian Standard[®]

**Specification and methods of
test for packaged concrete mixes**

This Australian Standard was prepared by Committee BD/49, Manufacture of Concrete. It was approved on behalf of the Council of Standards Australia on 18 June 1993 and published on 13 September 1993.

The following interests are represented on Committee BD/49:

Australasian Slag Association
AUSTROADS
Cement and Concrete Association of Australia
Department of Administrative Services — Australian Construction Services
Housing Industry Association
Master Builders Construction and Housing Association Australia
Metal Trades Industry Association of Australia
National Ready Mixed Concrete Association
Public Works Department, N.S.W.
Royal Australian Institute of Architects
The Association of Consulting Engineers Australia
University of New South Wales
University of Sydney

Additional interests participating in preparation of Standard:

Australian Cement Manufacturers
Bemac Laboratories
Hardware Retailers Association of N.S.W.

Review of Australian Standards. To keep abreast of progress in industry, Australian Standards are subject to periodic review and are kept up to date by the issue of amendments or new editions as necessary. It is important therefore that Standards users ensure that they are in possession of the latest edition, and any amendments thereto.

Full details of all Australian Standards and related publications will be found in the Standards Australia Catalogue of Publications; this information is supplemented each month by the magazine 'The Australian Standard', which subscribing members receive, and which gives details of new publications, new editions and amendments, and of withdrawn Standards.

Suggestions for improvements to Australian Standards, addressed to the head office of Standards Australia, are welcomed. Notification of any inaccuracy or ambiguity found in an Australian Standard should be made without delay in order that the matter may be investigated and appropriate action taken.

This Standard was issued in draft form for comment as DR 92032.

PREFACE

This Standard was prepared by the Standards Australia Committee on Manufacture of Concrete. Its preparation was initiated by the cement manufacturing industry as a means of promoting a uniform measure of quality of the product on a national scale, and to provide a degree of assurance to the user that the required quality is achieved if the supplied product complies with this Standard.

It is intended that the concrete made from the contents of each package is to be used in domestic situations for making small items (e.g. a 600 mm × 600 mm × 50 mm thick garden paving block) and for other applications, such as patching, where a particular concrete strength is not an essential consideration. It is not intended that the concrete is to be used in any way for structural purposes.

A number of Appendices are included which detail appropriate methods of test for assessing if the package and its contents satisfy specific requirements of the Standard. Also included as an Appendix are examples of suggested 'Instructions for use'.

It should be noted that the number of samples specified for each test is the minimum number necessary for establishing a meaningful result for that test. More samples may be required for quality assurance purposes.

© Copyright — STANDARDS AUSTRALIA

Users of Standards are reminded that copyright subsists in all Standards Australia publications and software. Except where the Copyright Act allows and except where provided for below no publications or software produced by Standards Australia may be reproduced, stored in a retrieval system in any form or transmitted by any means without prior permission in writing from Standards Australia. Permission may be conditional on an appropriate royalty payment. Requests for permission and information on commercial software royalties should be directed to the head office of Standards Australia.

Standards Australia will permit up to 10 percent of the technical content pages of a Standard to be copied for use exclusively in-house by purchasers of the Standard without payment of a royalty or advice to Standards Australia.

Standards Australia will also permit the inclusion of its copyright material in computer software programs for no royalty payment provided such programs are used exclusively in-house by the creators of the programs.

Care should be taken to ensure that material used is from the current edition of the Standard and that it is updated whenever the Standard is amended or revised. The number and date of the Standard should therefore be clearly identified.

The use of material in print form or in computer software programs to be used commercially, with or without payment, or in commercial contracts is subject to the payment of a royalty. This policy may be varied by Standards Australia at any time.
