

AS 1217.2—1985

Australian Standard<sup>®</sup>

---

**Acoustics—Determination of  
sound power levels of noise  
sources**

**Part 2: Precision methods for  
broad-band sources in  
reverberation rooms**

---

This Australian standard was prepared by Committee AK/2, Techniques for Measurement. It was approved on behalf of the Council of the Standards Association of Australia on 30 August 1984 and published on 4 April 1985.

---

The following interests are represented on Committee AK/2:

Australian Acoustical Society

CSIRO, Division of Building Research

CSIRO, National Measurement Laboratory

Department of Aviation

Department of Industrial Relations, N.S.W.

Department of Housing and Construction

Environment Protection Authority of Victoria

Metal Trades Industry Association of Australia

National Acoustic Laboratories

Telecom Australia

University of Adelaide

University of Queensland

---

**Review of Australian Standards.** To keep abreast of progress in industry, Australian Standards are subject to periodic review and are kept up to date by the issue of amendments or new editions as necessary. It is important therefore that Standards users ensure that they are in possession of the latest edition, and any amendments thereto.

Full details of all Australian Standards and related publications will be found in the Standards Australia Catalogue of Publications; this information is supplemented each month by the magazine 'The Australian Standard', which subscribing members receive, and which gives details of new publications, new editions and amendments, and of withdrawn Standards.

Suggestions for improvements to Australian Standards, addressed to the head office of Standards Australia, are welcomed. Notification of any inaccuracy or ambiguity found in an Australian Standard should be made without delay in order that the matter may be investigated and appropriate action taken.

---

*This standard was issued in draft form for comment as DR 82053.*
