AS 2805.2:2015
(Incorporating Amendment No. 1)

Australian
STANDARD

Electronic funds transfers— Requirements for interfaces

Part 2: Message structures, format and content

STANDARDS
Australia

This Australian Standard® was prepared by Committee IT-005, Financial Transaction Systems. It was approved on behalf of the Council of Standards Australia on 7 April 2015. This Standard was published on 8 May 2015.

———————

The following are represented on Committee IT-005:

- Australian Association of Permanent Building Societies
- Australian Bankers Association
- Australian Payments Clearing Association
- Credit Union Services Corporation, Australia
- EFTPOS Payments Australia

Additional Interests:

- ANZ Bank
- First Data International
- Inter-Tech Global Transaction Services
- NCR Australia
- Westpac Banking Corporation

———————

This Standard was issued in draft form for comment as DR AS 2805.2:2014.

Standards Australia wishes to acknowledge the participation of the expert individuals that contributed to the development of this Standard through their representation on the Committee and through the public comment period.

———————

Keeping Standards up-to-date

Australian Standards® are living documents that reflect progress in science, technology and systems. To maintain their currency, all Standards are periodically reviewed, and new editions are published. Between editions, amendments may be issued.

Standards may also be withdrawn. It is important that readers assure themselves they are using a current Standard, which should include any amendments that may have been published since the Standard was published.

Detailed information about Australian Standards, drafts, amendments and new projects can be found by visiting www.standards.org.au

Standards Australia welcomes suggestions for improvements, and encourages readers to notify us immediately of any apparent inaccuracies or ambiguities. Contact us via email at mail@standards.org.au, or write to Standards Australia, GPO Box 476, Sydney, NSW 2001.

AS 2805.2:2015
(Incorporating Amendment No. 1)

Australian Standard®

Electronic funds transfers— Requirements for interfaces

Part 2: Message structures, format and content

PREFACE

This Standard was prepared by the Standards Australia Committee IT-005, Financial Transaction Systems, to supersede AS 2805.2—2007, *Electronic funds transfer—Requirements for interfaces,* Part 2: *Message structure, format and content.* During the preparation of this Standard cognizance was taken of ISO 8583, *Financial transaction card originated messages—Interchange message specifications.*

This Standard incorporates Amendment No. 1 (July 2016). The changes required by the Amendment are indicated in the text by a marginal bar and amendment number against the clause, note, table, figure or part thereof affected.

The objective of this revision is to provide additional codes that have been identified by the payments industry.

The AS 2805 series comprises of the following:

AS		
2805		Electronic funds transfer—Requirements for interfaces
2805.1	Part 1:	Communications
2805.2	Part 2:	Message structure, format and content (this Standard)
2805.3.1	Part 3.1:	PIN management and security—General (in preparation)
2805.3.2	Part 3.2:	PIN management and security—Off-line with ICC verification (in preparation)
2805.4.1	Part 4.1:	Message authentication—Mechanisms using a block cipher
2805.4.2	Part 4.2:	Message authentication—Mechanisms using a block cipher
2805.5.1	Part 5.1:	Ciphers—Data encipherment algorithm 1 (DEA 1)
2805.5.2	Part 5.2:	Ciphers—Modes of operation for an n-bit block cipher algorithm
2805.5.3	Part 5.3:	Ciphers—Data encipherment algorithm 2 (DEA 2)
2805.5.4	Part 5.4:	Ciphers—Data encipherment algorithm 3 (DEA 3) and related techniques
2805.6.1	Part 6.1:	Key management—Principles
2805.6.2	Part 6.2:	Key management—Transaction keys
2805.6.3	Part 6.3:	Key management—Session keys—Node to node
2805.6.4	Part 6.4:	Key management—Session Keys—Terminal to acquirer
2805.6.5.1	Part 6.5.1:	Key management—TCU initialization—Principles
2805.6.5.2	Part 6.5.2:	Key management—TCU initialization—Symmetric
2805.6.5.3	Part 6.5.3:	Key management—TCU initialization—Asymmetric
2805.6.6	Part 6.6:	Key management—Session keys—Node to node with KEK replacement
2805.9	Part 9:	Privacy of communications
2805.10.1	Part 10.1:	File transfer integrity validation
2805.10.2	Part 10.2:	Secure file transfer (retail)
2805.11	Part 11:	Card parameter table
2805.12.1	Part 12.1:	Message content—Structure and format
2805.12.2	Part 12.2:	Message content—Application and registration procedures for Institution Identification Codes (IIC)
2805.12.3	Part 12.3:	Message content—Maintenance procedures for messages, data elements and code values
2805.13.1	Part 13.1:	Secure hash functions—General
2805.13.2	Part 13.2:	Secure hash functions—MD5
2805.13.3	Part 13.3:	Secure hash functions—SHA-1
2805.14.1	Part 14.1:	Secure cryptographic devices (retail)—Concepts, requirements and evaluation methods
2805.14.2	Part 14.2:	Secure cryptographic devices (retail)—Security compliance checklists for devices used in magnetic stripe card systems
2805.16	Part 16:	Merchant Category Codes (in preparation)

In the AS 2805 series of Standards, the definitions of words and phrases used are specific to the Part in which they appear.

The terms 'normative' and 'informative' have been used in this Standard to define the application of the Appendix to which they apply. A 'normative' appendix is an integral part of a Standard, whereas an 'informative' appendix is only for information and guidance.
