(Incorporating Amendment No. 1)

AS/NZS 1418.10:2011

Australian/New Zealand Standard™

Cranes, hoists and winches

**Part 10: Mobile elevating work
platforms**

AS/NZS 1418.10:2011

This Joint Australian/New Zealand Standard was prepared by Joint Technical Committee ME-005, Cranes. It was approved on behalf of the Council of Standards Australia on 11 January 2011 on behalf of the Council of Standards New Zealand on 21 January 2011.

This Standard was published on 25 May 2011.

The following are represented on Committee ME-005:

Australian Chamber of Commerce and Industry
Australian Industry Group
Australian Institute for Non-Destructive Testing
Bureau of Steel Manufacturers of Australia
Construction and Mining Equipment Industry Group
Consult Australia
Crane Association of New Zealand
Crane Industry Council of Australia
Department of Commerce, Worksafe Division (WA)
Department of Justice and Attorney General (Qld)
Department of Labour New Zealand
Department of the Premier and Cabinet (South Australia)
Electricity Engineers Association (New Zealand)
Elevating Work Platform Association of Australia
Engineers Australia
Horticulture New Zealand
Industry and Investment NSW
Institution of Professional Engineers New Zealand
Vehicle Loading Crane Interests
WorkSafe Victoria
WorkCover New South Wales

Keeping Standards up-to-date

Standards are living documents which reflect progress in science, technology and systems. To maintain their currency, all Standards are periodically reviewed, and new editions are published. Between editions, amendments may be issued. Standards may also be withdrawn. It is important that readers assure themselves they are using a current Standard, which should include any amendments which may have been published since the Standard was purchased.

Detailed information about joint Australian/New Zealand Standards can be found by visiting the Standards Web Shop at www.saiglobal.com or Standards New Zealand web site at www.standards.govt.nz and looking up the relevant Standard in the on-line catalogue.

For more frequent listings or notification of revisions, amendments and withdrawals, Standards Australia and Standards New Zealand offer a number of update options. For information about these services, users should contact their respective national Standards organization.

We also welcome suggestions for improvement in our Standards, and especially encourage readers to notify us immediately of any apparent inaccuracies or ambiguities. Please address your comments to the Chief Executive of Standards Australia or the New Zealand Standards Executive at the address shown on the back cover.

This Standard was issued in draft form for comment as DR 08188.

PREFACE

This Standard was prepared by the Joint Standards Australia/Standards New Zealand Committee ME-005 Cranes, to supersede AS 1418.10(Int)—2004, *Cranes, hoists and winches*, Part 10: *Elevating work platforms*.

This Standard incorporates Amendment No. 1 (September 2017). The changes required by the Amendment are indicated in the text by a marginal bar and amendment number against the clause, note, table, figure or part thereof affected.

The objective of this Standard is to address the requirements for mobile elevating work platforms (MEWPs) in general and, in addition, those intended for specific applications such as use near live electrical conductors, or operation in orchards where specific design requirements are necessary to address the risks associated with the intended use. Additional requirements are also specified for portable MEWPs.

In the preparation of this Standard cognizance was taken of ISO 16368, *Mobile Elevating Work Platforms—Design, Calculations, Safety Requirements and Test Methods*.

This revision includes the following significant changes:

- (a) Sections 1 to 4 follow largely the requirements specified in ISO 16368. However, the reader is cautioned that some significant deviations from that Standard have been incorporated.
- (b) The introduction of specific requirements for safety devices taking cognizance of the requirements in EN 280, *Mobile Elevating Work Platforms—Design Calculations—Stability Criteria—Construction—Safety—Examinations and Tests*.
- (c) The introduction of load- and moment-sensing systems.
- (d) Requirements for insulated MEWPs have been combined into a separate section.
- (e) Revision to the ‘ring test’ used to verify the extent of low-voltage cover insulation on insulated MEWPs.
- (f) Clarification of requirements relating to basket insulation.
- (g) Clarification of insulation classes and marking.
- (h) The requirement for insulation test procedures to be developed in accordance with this Standard and documented by the manufacturer.
- (i) The introduction of requirements for MEWPs intended for exclusive use in orchards.
- (j) The introduction of requirements for portable MEWPs.
- (k) Explanatory notes on the changes for electrically insulated MEWP appear in Appendix B.

The terms ‘normative’ and ‘informative’ have been used in this Standard to define the application of the appendix to which they apply. A ‘normative’ appendix is an integral part of a Standard, whereas an ‘informative’ appendix is only for information and guidance.

Statements expressed in mandatory terms in notes to tables and figures are deemed to be requirements of this Standard.

At the time of publication of this Standard technical solutions to meet the requirements of Clauses 2.3.1.2, 2.3.1.4 and 2.3.4 may not be available for certain classes of MEWP.

The respective jurisdictional authority may specify the requirements of Clauses 2.3.1.2, 2.3.1.4 and 2.3.4 for uninsulated/insulated MEWPS including effective dates.

Australia and New Zealand have different requirements for insulated MEWPs (see Section 7).
