

AS 3135—1997

Australian Standard[®]

**Approval and test specification—
Semi-enclosed fuses for a.c. circuits**

This Australian Standard was prepared by Committee EL/4, Electrical Accessories. It was approved on behalf of the Council of Standards Australia on 12 June 1997 and published on 5 September 1997.

The following interests are represented on Committee EL/4:

Australasian Railway Association
Australian Chamber of Commerce and Industry
Australian Electrical and Electronics Manufacturers Association
Consumer Electronics Suppliers Association
Electricity Supply Association of Australia
Ministry of Commerce, New Zealand
National Electrical Contractors Association of Australia
New Zealand Manufacturers Federation
Plastics and Chemical Industries Association Inc
Regulatory authorities (electrical)
Testing interests

Review of Australian Standards. *To keep abreast of progress in industry, Australian Standards are subject to periodic review and are kept up to date by the issue of amendments or new editions as necessary. It is important therefore that Standards users ensure that they are in possession of the latest edition, and any amendments thereto.*

Full details of all Australian Standards and related publications will be found in the Standards Australia Catalogue of Publications; this information is supplemented each month by the magazine 'The Australian Standard', which subscribing members receive, and which gives details of new publications, new editions and amendments, and of withdrawn Standards.

Suggestions for improvements to Australian Standards, addressed to the head office of Standards Australia, are welcomed. Notification of any inaccuracy or ambiguity found in an Australian Standard should be made without delay in order that the matter may be investigated and appropriate action taken.

This Standard was issued in draft form for comment as DR 97027.

PREFACE

This Standard was prepared by the Joint Standards Australia/Standards New Zealand Committee EL/4, Electrical Accessories, to supersede AS 3135—1980 from the date of publication.

This Standard is the result of a consensus among Australian and New Zealand representatives on the Joint Committee to produce it as an Australian Standard.

This Standard is one of a series of Approval and Test specifications issued by Standards Australia. It is to be read in conjunction with AS 3100, *Approval and test specification—General requirements for electrical equipment*.

The objective of these Standards is to outline the conditions that must be met to secure approval for the sale and use of electrical equipment. Only safety matters and related conditions are covered.

The Standard was revised to incorporate Amendment 1, to introduce a table for the cross-sectional area for the wiring in test circuits (Table 3) and to effect some editorial changes to bring it into line with current Standards Australia practice.

The term 'normative' has been used in this Standard to define the application of the appendix to which it applies. A 'normative' appendix is an integral part of a Standard.

This Standard does not provide all the necessary conditions for a contract.

© Copyright — STANDARDS AUSTRALIA

Users of Standards are reminded that copyright subsists in all Standards Australia publications and software. Except where the Copyright Act allows and except where provided for below no publications or software produced by Standards Australia may be reproduced, stored in a retrieval system in any form or transmitted by any means without prior permission in writing from Standards Australia. Permission may be conditional on an appropriate royalty payment. Requests for permission and information on commercial software royalties should be directed to the head office of Standards Australia.

Standards Australia will permit up to 10 percent of the technical content pages of a Standard to be copied for use exclusively in-house by purchasers of the Standard without payment of a royalty or advice to Standards Australia.

Standards Australia will also permit the inclusion of its copyright material in computer software programs for no royalty payment provided such programs are used exclusively in-house by the creators of the programs.

Care should be taken to ensure that material used is from the current edition of the Standard and that it is updated whenever the Standard is amended or revised. The number and date of the Standard should therefore be clearly identified.

The use of material in print form or in computer software programs to be used commercially, with or without payment, or in commercial contracts is subject to the payment of a royalty. This policy may be varied by Standards Australia at any time.

CONTENTS

	<i>Page</i>
1 SCOPE	4
2 REFERENCED DOCUMENTS	4
3 DEFINITIONS	4
4 COMPLIANCE	5
5 STANDARD CONDITION FOR OPERATION IN SERVICE	6
6 PREFERRED VOLTAGE RATINGS, PREFERRED CURRENT RATINGS AND CATEGORIES OF DUTY	6
7 TEMPERATURE LIMITS	6
8 DESIGN AND CONSTRUCTION	6
9 MARKING	7
10 TESTS	8
 APPENDICES	
A DETERMINATION OF POWER FACTOR OF THE TEST CIRCUIT	14
B MEASUREMENT OF RECOVERY VOLTAGE AND TRANSIENT RECOVERY VOLTAGE	16
C MEASUREMENT OF PROSPECTIVE CURRENT	18
