

AS/NZS 4291.2:1995  
ISO 898-2:1992

Australian/New Zealand Standard

---

**Mechanical properties of fasteners**

**Part 2: Nuts with specified proof  
load values—Coarse thread**

---

## **AS/NZS 4291.2:1995**

---

This Joint Australian/New Zealand Standard was prepared by Joint Technical Committee ME/29, Fasteners. It was approved on behalf of the Council of Standards Australia on 18 April 1995 and on behalf of the Council of Standards New Zealand on 19 April 1995. It was published on 5 September 1995.

---

The following interests are represented on Committee ME/29:

Australian Chamber of Commerce and Industry  
Bureau of Steel Manufacturers of Australia  
Electricity Supply Association of Australia  
Fasteners Institute of Australia  
Federal Chamber of Automotive Industries  
Metal Building Products Manufacturers Association  
Metal Trades Industry Association of Australia  
New Zealand Manufacturers Federation

---

**Review of Standards.** To keep abreast of progress in industry, Joint Australian/New Zealand Standards are subject to periodic review and are kept up to date by the issue of amendments or new editions as necessary. It is important therefore that Standards users ensure that they are in possession of the latest edition, and any amendments thereto.

Full details of all Joint Standards and related publications will be found in the Standards Australia and Standards New Zealand Catalogue of Publications; this information is supplemented each month by the magazines 'The Australian Standard' and 'Standards New Zealand', which subscribing members receive, and which give details of new publications, new editions and amendments, and of withdrawn Standards.

Suggestions for improvements to Joint Standards, addressed to the head office of either Standards Australia or Standards New Zealand, are welcomed. Notification of any inaccuracy or ambiguity found in a Joint Australian/New Zealand Standard should be made without delay in order that the matter may be investigated and appropriate action taken.

## PREFACE

This Standard was prepared by the Joint Standards Australia/Standards New Zealand Committee ME/29 on Fasteners. It is identical with, and has been reproduced from ISO 898-2:1992, *Mechanical properties of fasteners Part 2: Nuts with specified proof load values—Coarse thread*.

Under arrangements made between Standards Australia/Standards New Zealand and the international Standards bodies, ISO and IEC, as well as certain other Standards organizations, users of this Joint Standard are advised that the number of this Standard is not reproduced on each page; its identity is shown only on the cover and title pages.

For the purpose of this Standard, the ISO text should be modified as follows:

- (a) *Terminology* The words ‘Joint Australian/New Zealand Standard’, should replace the words ‘International Standard’ wherever they appear.
- (b) *References* The references to International Standards should be replaced by references to the following Australian Standards:

<i>Reference to International Standard</i>		<i>Australian Standard or Australian/New Zealand Standard</i>	
ISO		AS	
1	Standard reference temperature for industrial length measurements	—	
68	ISO general purpose screw threads—Basic profile	1721	General purpose metric screw threads
261	ISO general purpose metric screw threads—General plan	1721	General purpose metric screw threads
262	ISO general purpose metric screw threads—Selected sizes for screws, bolts and nuts	1721	General purpose metric screw threads
272	Fasteners—Hexagon products—Widths across flats	—	
286	ISO system of limits and fits—	1654	Limits and fits for engineering (Metric units)
286.2	Part 2: Tables of standard tolerance grades and limit deviations for holes and shafts		
724	ISO metric screw threads—Basic dimensions	1721	General purpose metric screw threads
		AS/NZS	
898	Mechanical properties of fasteners	4291	Mechanical properties of fasteners
898.1	Part 1: Bolts, screws and studs	4291.1	Part 1: Bolts, screws and studs
965	ISO general purpose metric screw threads—Tolerances	AS	
965.1	Part 1: Principles and basic data	1721	General purpose metric screw threads
965.2	Part 2: Limits or sizes for general purpose bolt and nut threads—Medium quality	1721	General purpose metric screw threads

## iii

ISO		AS/NZS	
2320	Prevailing torque type steel hexagon nuts—Mechanical and performance properties	—	
3506	Corrosion-resistant stainless steel fasteners—Specifications	—	
4014	Hexagon head bolts—Product grades A and B	1110	ISO metric precision hexagon bolts and screws
4015	Hexagon head bolts—Product grade B—Reduced shank (shank diameter approximately equal to pitch diameter)	—	
4016	Hexagon head bolts—Product grade C	1111	ISO metric commercial hexagon bolts and screws
4017	Hexagon head screws—Product grades A and B	1110	ISO metric precision hexagon bolts and screws
4018	Hexagon head screws—Product grade C	1111	ISO metric commercial hexagon bolts and screws
4032	Hexagon nuts, style 1—Product grades A and B	1112	ISO metric hexagon nuts, including thin nuts, slotted nuts and castle nuts
4033	Hexagon nuts, style 2—Product grades A and B	1112	ISO metric hexagon nuts, including thin nuts, slotted nuts and castle nuts
4034	Hexagon nuts—Product grade C	—	
4035	Hexagon thin nuts (chamfered)—Product grades A and B	1112	ISO metric hexagon nuts, including thin nuts, slotted nuts and castle nuts
4036	Hexagon thin nuts—Product grades B (unchamfered)	—	
4964	Steel—Hardness conversions	—	
6157	Fasteners—Surface discontinuities	—	
6157.2	Part 2: Nuts with threads M5 to M39	—	
		AS	
6506	Metallic materials—Hardness test—Brinell test	1816	Metallic materials—Brinell hardness test
6507	Metallic materials—Hardness test—Vickers test		
6507.1	Part 1: HV 5 to HV 100	1817	Metallic materials—Vickers hardness test
6508	Metallic materials—Hardness test—Rockwell test—Scales A, B, C, D, E, F, G, H, K	1815	Metallic materials—Rockwell hardness test
