AS 2067—2008 (Incorporating Amendment No. 1)

Australian Standard®

Substations and high voltage installations exceeding 1 kV a.c.

This Australian Standard® was prepared by Committee EL-043, High Voltage Installations. It was approved on behalf of the Council of Standards Australia on 6 November 2008. This Standard was published on 12 December 2008.

The following are represented on Committee EL-043:

- Association of Consulting Engineers Australia
- Bureau of Steel Manufacturers of Australia
- CIGRE
- Electrical Regulatory Authorities Council
- Energy Networks Association
- Engineers Australia
- Institute of Electrical Inspectors

This Standard was issued in draft form for comment as DR 07281.

Standards Australia wishes to acknowledge the participation of the expert individuals that contributed to the development of this Standard through their representation on the Committee and through the public comment period.

Keeping Standards up-to-date

Australian Standards® are living documents that reflect progress in science, technology and systems. To maintain their currency, all Standards are periodically reviewed, and new editions are published. Between editions, amendments may be issued.

Standards may also be withdrawn. It is important that readers assure themselves they are using a current Standard, which should include any amendments that may have been published since the Standard was published.

Detailed information about Australian Standards, drafts, amendments and new projects can be found by visiting **www.standards.org.au**

Standards Australia welcomes suggestions for improvements, and encourages readers to notify us immediately of any apparent inaccuracies or ambiguities. Contact us via email at **mail@standards.org.au**, or write to Standards Australia, GPO Box 476, Sydney, NSW 2001.

AS 2067—2008 (Incorporating Amendment No. 1)

Australian Standard[®]

Substations and high voltage installations exceeding 1 kV a.c.

First published (as AS C13, being endorsement of BS 158:1961 with Australian amendment; AS C52, being endorsement of BS 159:1957 with Australian amendment; and AS C340, being endorsement of BS 162:1962 with Australian amendment) 1967. AS 2067 first published 1977. Fourth edition 2008. Reissued incorporating Amendment No. 1 (February 2010).

PREFACE

This Standard was prepared by the Standards Australia Committee EL-043, High Voltage Installations, to supersede AS 2067—1984, *Switchgear assemblies and ancillary equipment for alternating voltages above 1 kV*.

This Standard incorporates Amendment No. 1 (February 2010). The changes required by the Amendment are indicated in the text by a marginal bar and amendment number against the clause, note, table, figure or part thereof affected.

The objective of this Standard is to provide common rules for the design and the erection of electrical power installations in systems with nominal voltages above 1 kV a.c. and nominal frequency up to and including 60 Hz.

In the preparation of this Standard, consideration was given to IEC 61936-1:2002, *Power* installations exceeding 1 kV a.c.—Part 1: Common rules, and its proposed revision (IEC 61936-1 CDV/2008.05), and acknowledgement is made of the assistance received.

Following publication of this Standard, AS/NZS 3000:2007 is to be amended such that, in Australia, those portions of electrical installations operating at high voltage shall be designed and installed in accordance with this Standard. Appendix K of AS/NZS 3000:2007 will be deleted when this Standard is published.

Where a reference is made to 'national regulations', it is intended to encompass national, state and local regulations.

The terms 'normative' and 'informative' are used to define the application of the appendix to which they apply. A normative appendix is an integral part of a standard, whereas an informative appendix is only for information and guidance.
