

AS 1049—1996

Australian Standard[®]

**Telecommunication cables—
Insulation, sheath and jacket**

This Australian Standard was prepared by Committee TE/9, Materials for Telecommunication Cable. It was approved on behalf of the Council of Standards Australia on 21 February 1996 and published on 5 June 1996.

The following interests are represented on Committee TE/9:

AUSTEL

Australian Chamber of Commerce and Industry

Australian Electrical and Electronic Manufacturers Association

Optus Communications

Plastics and Chemicals Industry Association

Telstra Corporation

Review of Australian Standards. To keep abreast of progress in industry, Australian Standards are subject to periodic review and are kept up to date by the issue of amendments or new editions as necessary. It is important therefore that Standards users ensure that they are in possession of the latest edition, and any amendments thereto.

Full details of all Australian Standards and related publications will be found in the Standards Australia Catalogue of Publications; this information is supplemented each month by the magazine 'The Australian Standard', which subscribing members receive, and which gives details of new publications, new editions and amendments, and of withdrawn Standards.

Suggestions for improvements to Australian Standards, addressed to the head office of Standards Australia, are welcomed. Notification of any inaccuracy or ambiguity found in an Australian Standard should be made without delay in order that the matter may be investigated and appropriate action taken.

This Standard was issued in draft form for comment as DR 95297.

PREFACE

This Standard was prepared by the Standards Australia Committee TE/9 on Materials for Telecommunication Cable to supersede AS 1049 — 1986, *Telecommunication cables—Insulation and sheath—Polyethylene*.

The objective of this Standard is to provide the polymer manufacturers, telecommunications cable manufacturers and end users with requirements and test methods for polyethylene used in telecommunications cables insulation and sheathing in order to maintain quality control and acceptance levels at the various stages of manufacture.

This Standard has been revised with the objective of incorporating requirements for additional materials used for insulation, sheaths and jackets in telecommunication cable.

Materials used in outdoor telecommunication cables are addressed by this Standard. Additional materials for use in telecommunication cables are to be the subject of the next revision of this Standard.

The term 'normative' has been used in this Standard to define the application of the appendix to which it applies. A 'normative' appendix is an integral part of a Standard.

© Copyright — STANDARDS AUSTRALIA

Users of Standards are reminded that copyright subsists in all Standards Australia publications and software. Except where the Copyright Act allows and except where provided for below no publications or software produced by Standards Australia may be reproduced, stored in a retrieval system in any form or transmitted by any means without prior permission in writing from Standards Australia. Permission may be conditional on an appropriate royalty payment. Requests for permission and information on commercial software royalties should be directed to the head office of Standards Australia.

Standards Australia will permit up to 10 percent of the technical content pages of a Standard to be copied for use exclusively in-house by purchasers of the Standard without payment of a royalty or advice to Standards Australia.

Standards Australia will also permit the inclusion of its copyright material in computer software programs for no royalty payment provided such programs are used exclusively in-house by the creators of the programs.

Care should be taken to ensure that material used is from the current edition of the Standard and that it is updated whenever the Standard is amended or revised. The number and date of the Standard should therefore be clearly identified.

The use of material in print form or in computer software programs to be used commercially, with or without payment, or in commercial contracts is subject to the payment of a royalty. This policy may be varied by Standards Australia at any time.

CONTENTS

	<i>Page</i>
SECTION 1 SCOPE AND GENERAL	
1.1 SCOPE	5
1.2 APPLICATION	5
1.3 REFERENCED DOCUMENTS	5
1.4 DEFINITIONS	6
1.5 ACRONYMS AND ABBREVIATIONS	7
SECTION 2 POLYETHYLENE INSULATION	
2.1 GENERAL	8
2.2 COMPOUND	8
2.3 INSULATION	9
SECTION 3 POLYETHYLENE SHEATH AND POLYETHYLENE JACKET	
3.1 GENERAL	13
3.2 COMPOUND	13
3.3 SHEATH OR JACKET	14
SECTION 4 POLYAMIDE 12 JACKET	
4.1 GENERAL	17
4.2 COMPOUND	17
4.3 JACKET	17
SECTION 5 INTEGRALLY BONDED POLYETHYLENE SHEATH AND POLYAMIDE 12 JACKET	
5.1 GENERAL	19
5.2 COMPOUND	19
5.3 INTEGRALLY BONDED SHEATH AND JACKET	19
APPENDICES	
A DETERMINATION OF DENSITY	21
B DETERMINATION OF MELT FLOW INDEX	22
C DETERMINATION OF DIELECTRIC DISSIPATION FACTOR AND RELATIVE PERMITTIVITY	26
D DETERMINATION OF STABILIZER TYPE AND CONCENTRATION	30
E DETERMINATION OF TENSILE STRESS AT YIELD, AND ELONGATION AT BREAK	39
F DETERMINATION OF COLOUR	43
G DETERMINATION OF BLOOMING AND MIGRATION OF COLOURS	44
H DETERMINATION OF COLOURFASTNESS TO DAYLIGHT	45
I DETERMINATION OF COLOURFASTNESS TO WATER	50
J DETERMINATION OF COMPATIBILITY OF POLYETHYLENE INSULATION WITH FILLING COMPOUND	51
K DETERMINATION OF SHRINKBACK	56
L DETERMINATION OF ENVIRONMENTAL STRESS-CRACKING	57
M DETERMINATION OF CARBON BLACK CONCENTRATION	63
N DETERMINATION OF CARBON BLACK DISPERSION	65
