

AS 2900.11—1986

Australian Standard[®]

QUANTITIES, UNITS, AND SYMBOLS

**Part 11—MATHEMATICAL SIGNS
AND SYMBOLS FOR
USE IN THE PHYSICAL
SCIENCES AND
TECHNOLOGY**

This Australian standard was prepared by Committee MS/10, Quantities, Units and Conversions. It was approved on behalf of the Council of the Standards Association of Australia on 27 February 1986 and published on 7 April 1986.

The following interests are represented on Committee MS/10:

Australian Institute of Physics
Bureau of Steel Manufacturers of Australia
CSIRO, Division of Applied Physics
Department of Defence
Department of Science
Electricity Commission of New South Wales
Monash University
National Association of Testing Authorities Australia
National Standards Commission
University of New South Wales
University of Sydney

Review of Australian Standards. *To keep abreast of progress in industry, Australian Standards are subject to periodic review and are kept up to date by the issue of amendments or new editions as necessary. It is important therefore that Standards users ensure that they are in possession of the latest edition, and any amendments thereto.*

Full details of all Australian Standards and related publications will be found in the Standards Australia Catalogue of Publications; this information is supplemented each month by the magazine 'The Australian Standard', which subscribing members receive, and which gives details of new publications, new editions and amendments, and of withdrawn Standards.

Suggestions for improvements to Australian Standards, addressed to the head office of Standards Australia, are welcomed. Notification of any inaccuracy or ambiguity found in an Australian Standard should be made without delay in order that the matter may be investigated and appropriate action taken.

This standard was issued in draft form for comment as DR 85100.

PREFACE

This standard was prepared by the Association's Committee on Quantities, Units and Conversions. It is identical with and has been reproduced from International Standard ISO 31/11, Mathematical Signs and Symbols for Use in the Physical Sciences and Technology.

This standard is one of a series of 14 standards on quantities, units and symbols, and, where appropriate, conversion factors. The other standards in the series are as follows:

AS 2900.0	Quantities, Units, and Symbols, Part 0—General Principles Concerning Quantities, Units, and Symbols
AS 2900.1	Quantities, Units, and Symbols, Part 1—Quantities and Units of Space and Time
AS 2900.2	Quantities, Units, and Symbols, Part 2—Quantities and Units of Periodic and Related Phenomena
AS 2900.3	Quantities, Units, and Symbols, Part 3—Quantities and Units of Mechanics
AS 2900.4	Quantities, Units, and Symbols, Part 4—Quantities and Units of Heat
AS 2900.5	Quantities, Units, and Symbols, Part 5—Quantities and Units of Electricity and Magnetism
AS 2900.6	Quantities, Units, and Symbols, Part 6—Quantities and Units of Light and Related Electromagnetic Radiations
AS 2900.7	Quantities, Units, and Symbols, Part 7—Quantities and Units of Acoustics
AS 2900.8	Quantities, Units, and Symbols, Part 8—Quantities and Units of Physical Chemistry and Molecular Physics
AS 2900.9	Quantities, Units, and Symbols, Part 9—Quantities and Units of Atomic and Nuclear Physics
AS 2900.10	Quantities, Units, and Symbols, Part 10—Quantities and Units of Nuclear Reactions and Ionizing Radiations
AS 2900.12	Quantities, Units, and Symbols, Part 12—Dimensionless Parameters
AS 2900.13	Quantities, Units, and Symbols, Part 13—Quantities and Units of Solid State Physics

For the purpose of this Australian standard, the text of the ISO standard used herein should be modified as follows:

The references to International Standards should be replaced by references to Australian Standards as follows:

<i>Reference to International Standard</i>	<i>Appropriate Australian Standard</i>
ISO 31, Part 0: General principles concerning quantities, units and symbols	AS 2900.0, Quantities, Units and Symbols, Part 0—General Principles Concerning Quantities, Units and Symbols
ISO 31, Part 1: Quantities and units of space and time	AS 2900.1, Quantities, Units, and Symbols, Part 1—Quantities and Units of Space and Time
ISO 31, Part 2: Quantities and units of periodic and related phenomena	AS 2900.2, Quantities, Units, and Symbols, Part 2—Quantities and Units of Periodic and Related Phenomena
ISO 31, Part 3: Quantities and units of mechanics	AS 2900.3, Quantities, Units, and Symbols, Part 3—Quantities and Units of Mechanics
ISO 31, Part 4: Quantities and units of heat	AS 2900.4, Quantities, Units, and Symbols, Part 4—Quantities and Units of Heat
ISO 31, Part 5: Quantities and units of electricity and magnetism	AS 2900.5, Quantities, Units, and Symbols, Part 5—Quantities and Units of Electricity and Magnetism
ISO 31, Part 6: Quantities and units of light and related electromagnetic radiations	AS 2900.6, Quantities, Units, and Symbols, Part 6—Quantities and Units of Light and Related Electromagnetic Radiations

ISO 31, Part 7: Quantities and units of acoustics	AS 2900.7, Quantities, Units, and Symbols, Part 7—Quantities and Units of Acoustics
ISO 31, Part 8: Quantities and units of physical chemistry and molecular physics	AS 2900.8, Quantities, Units, and Symbols, Part 8—Quantities and Units of Physical Chemistry and Molecular Physics
ISO 31, Part 9: Quantities and units of atomic and nuclear physics	AS 2900.9, Quantities, Units, and Symbols, Part 9—Quantities and Units of Atomic and Nuclear Physics
ISO 31, Part 10: Quantities and units of nuclear reactions and ionizing radiations	AS 2900.10, Quantities, Units, and Symbols, Part 10—Quantities and Units of Nuclear Reactions and Ionizing Radiations
ISO 31, Part 11: Mathematical signs and symbols for use in physical sciences and technology	AS 2900.11, Quantities, Units, and Symbols, Part 11—Mathematical Signs and Symbols for Use in the Physical Sciences and Technology
ISO 31, Part 12: Dimensionless parameters	AS 2900.12, Quantities, Units, and Symbols, Part 12—Dimensionless Parameters
ISO 31, Part 13: Quantities and units of solid state physics	AS 2900.13, Quantities, Units, and Symbols, Part 13—Quantities and Units of Solid State Physics

© Copyright — STANDARDS AUSTRALIA

Users of Standards are reminded that copyright subsists in all Standards Australia publications and software. Except where the Copyright Act allows and except where provided for below no publications or software produced by Standards Australia may be reproduced, stored in a retrieval system in any form or transmitted by any means without prior permission in writing from Standards Australia. Permission may be conditional on an appropriate royalty payment. Requests for permission and information on commercial software royalties should be directed to the head office of Standards Australia.

Standards Australia will permit up to 10 percent of the technical content pages of a Standard to be copied for use exclusively in-house by purchasers of the Standard without payment of a royalty or advice to Standards Australia.

Standards Australia will also permit the inclusion of its copyright material in computer software programs for no royalty payment provided such programs are used exclusively in-house by the creators of the programs.

Care should be taken to ensure that material used is from the current edition of the Standard and that it is updated whenever the Standard is amended or revised. The number and date of the Standard should therefore be clearly identified.

The use of material in print form or in computer software programs to be used commercially, with or without payment, or in commercial contracts is subject to the payment of a royalty. This policy may be varied by Standards Australia at any time.
