Keeping Standards up-to-date

Australian Standards® are living documents that reflect progress in science, technology and systems. To maintain their currency, all Standards are periodically reviewed, and new editions are published. Between editions, amendments may be issued.

Standards may also be withdrawn. It is important that readers assure themselves they are using a current Standard, which should include any amendments that may have been published since the Standard was published.

PREFACE

This Standard was prepared by the Standards Australia Committee IT-005, Financial Transactions Systems to supersede AS 3523.2—1998.

The objective of this Standard is to align Australian IIN (Issuer Identification Numbers) numbering and procedures with international conventions. This part details application and registration procedures.

This Standard is identical with, and has been reproduced from ISO/IEC 7812-2:2007, *Identification cards—Identification of issuers, Part 2: Application and registration procedures*.

As this Standard is reproduced from an international standard, the following applies:

- (a) Its number appears on the cover and title page while the international standard number appears only on the cover.
- (b) In the source text ‘this part of ISO/IEC 7812’ should read ‘this Australian Standard’.
- (c) A full point substitutes for a comma when referring to a decimal marker.

References to International Standards should be replaced by references to Australian or Australian/New Zealand Standards, as follows:

<i>Reference to International Standard</i>		<i>Australian Standard</i>	
ISO		AS	
7812	Identification cards—Identification of issuers	3523	Identification cards—Identification of issuers
7812-1	Part 1: Numbering system	3523.1	Part 1: Numbering system

The term ‘informative’ has been used in this Standard to define the application of the annex to which it applies. An ‘informative’ annex is only for information and guidance.
