AS/NZS 4745:2012 (Incorporating Amdendment No. 1)

Australian/New Zealand Standard™

Code of practice for handling combustible dusts

AS/NZS 4745:2012

This Joint Australian/New Zealand Standard was prepared by Joint Technical Committee MS-011, Classification of Hazardous Areas. It was approved on behalf of the Council of Standards Australia on 19 September 2012 and on behalf of the Council of Standards New Zealand on 27 August 2012.

This Standard was published on 10 October 2012.

The following are represented on Committee MS-011:

Auckland Regional Chamber of Commerce

Australian Chamber of Commerce and Industry

Australian Industry Group

Australian Institute of Petroleum

Australian Paint Manufacturers Federation

Australian Petroleum Production and Exploration Association

Aviation and Marine Engineers Association

Bureau of Steel Manufacturers of Australia

Department of Labour, New Zealand

Department of Natural Resources and Mines, Qld

Electrical Contractors Association of New Zealand

Energy Networks Association

Engineers Australia

Environmental Protection Authority, New Zealand

Gas Association of New Zealand

Institute of Electrical Inspectors

Institute of Instrumentation, Control & Automation, Australia

LPG Australia

Ministry of Economic Development, New Zealand

National Electrical and Communications Association

New Zealand Oil Refining Companies

Responsible Care New Zealand

Royal Australian Chemical Institute

WorkCover New South Wales

WorkSafe Victoria

Keeping Standards up-to-date

Standards are living documents which reflect progress in science, technology and systems. To maintain their currency, all Standards are periodically reviewed, and new editions are published. Between editions, amendments may be issued. Standards may also be withdrawn. It is important that readers assure themselves they are using a current Standard, which should include any amendments which may have been published since the Standard was purchased.

Detailed information about joint Australian/New Zealand Standards can be found by visiting the Standards Web Shop at www.saiglobal.com.au or Standards New Zealand web site at www.standards.co.nz and looking up the relevant Standard in the on-line catalogue.

For more frequent listings or notification of revisions, amendments and withdrawals, Standards Australia and Standards New Zealand offer a number of update options. For information about these services, users should contact their respective national Standards organization.

We also welcome suggestions for improvement in our Standards, and especially encourage readers to notify us immediately of any apparent inaccuracies or ambiguities. Please address your comments to the Chief Executive of either Standards Australia or Standards New Zealand at the address shown on the back cover.

This Standard was issued in draft form for comment as DR AS/NZS 4745.

AS/NZS 4745:2012 (Incorporating Amendment No. 1)

Australian/New Zealand Standard™

Code of practice for handling combustible dusts

Originated as AS/NZS 4745:2004. Second edition 2012. Reissued incorporating Amendment No. 1 (June 2013).

PREFACE

This Standard was prepared by the Joint Standards Australia/Standards New Zealand Committee MS-011, Classification of Hazardous Areas, with the assistance of the Joint Subcommittee MS-011-01, Combustible Dusts, to supersede AS/NZS 4745:2004.

This Standard incorporates Amendment No. 1 (June 2013). The changes required by the Amendment are indicated in the text by a marginal bar and amendment number against the clause, note, table, figure or part thereof affected.

This Standard is intended to assist those industries which may have risks associated with the presence of combustible dusts as part of their process, in minimizing the risk of injury, death or loss of property to fire and/or explosion. It sets out good design and management principles and practices for the construction, operation and maintenance of manufacturing and processing plants and associated transportation and storage systems.

The objective of this revision is to update the referenced documents and bring the Standard into line with current editorial practices. This revision also modifies the classification for levels of protection in Section 7 to align with the classifications used in referenced Standards.

The technical content of this Standard is based on but not equivalent to EN 1127-1, Explosive Atmospheres—Explosion-prevention and Protection, Part 1: Basic Concepts and Methodology.

The term 'informative' has been used in this Standard to define the application of the appendix to which it applies. An 'informative' appendix is only for information and guidance.

CONTENTS

	Page
SECTION 1 SCOPE AND GENERAL	
1.1 SCOPE	5
1.2 APPLICATION	
1.3 REFERENCED DOCUMENTS	
1.4 DEFINITIONS	
SECTION 2 OHS AND RISK MANAGEMENT	
2.1 OCCUPATIONAL HEALTH AND SAFETY MANAGEMENT SYSTEM	7
2.2 RISK MANAGEMENT STANDARDS	
2.3 TRAINING	
2.4 RECORDS	
SECTION 3 HAZARD ASSESSMENT	
3.1 DUST CHARACTERIZATION	10
3.2 SAFETY CHARACTERISTICS OF DUSTS	11
3.3 COMBUSTION BEHAVIOUR	12
3.4 DETERMINATION OF DUST CHARACTERISTICS	
3.5 SAMPLING OF DUSTS FOR TESTING	20
3.6 HAZARDOUS PROCESSES	
3.7 RISK ASSESSMENT	
SECTION 4 SAFETY REQUIREMENTS	
4.1 GENERAL	28
4.2 TRAINING/AWARENESS	
4.3 PERSONNEL PROTECTIVE EQUIPMENT (PPE)	
4.4 SITE ENTRY CONDITIONS	
4.5 WORK PERMITS	
4.6 SAFETY OPERATING PROCEDURES	
4.7 MAINTENANCE AND HOUSEKEEPING	
.,, .,	
SECTION 5 DETERMINING THE PRESENCE OF EFFECTIVE IGNITION SOU	JRCES
5.1 GENERAL	31
5.2 HOT SURFACES	31
5.3 FLAMES, HOT GASES AND HOT PARTICLES	32
5.4 MECHANICALLY GENERATED SPARKS	
5.5 ELECTRICAL APPARATUS	33
5.6 STRAY ELECTRIC CURRENTS, INDUCED VOLTAGES AND CATHO	DIC
CORROSION PROTECTION	
5.7 STATIC ELECTRICITY	
5.8 LIGHTNING	
5.9 RADIOFREQUENCY (RF) ELECTROMAGNETIC WAVES FROM	
10^4 Hz × 21Hz TO 3 × 10^{12} Hz	34
5.10 ELECTROMAGNETIC WAVES FROM 3×10^{11} Hz TO 3×10^{15} Hz (Infra	ı-red
visible and ultraviolet light)	
5.11 IONIZING RADIATION	
5.12 ULTRASONIC RADIATION	
5.13 ADIABATIC COMPRESSION AND SHOCK WAVES	
5.14 EXOTHERMIC REACTIONS, INCLUDING SELF-IGNITION OF DUST
