

AS IEC 61131.3—2004  
IEC 61131-3:2003

AS IEC 61131.3

Australian Standard™

**Programmable controllers**

**Part 3: Programming languages**

This Australian Standard was prepared by Committee IT-006, Information Technology for Industrial Automation. It was approved on behalf of the Council of Standards Australia on 15 January 2004 and published on 22 March 2004.

---

The following are represented on Committee IT-006:

Association of Consulting Engineers Australia  
Australian Electrical and Electronic Manufacturers Association  
CSIRO Centre for Planning and Design  
CSIRO Manufacturing and Infrastructure Technology  
Department of Defence, Australia  
Institute of Instrumentation, Control and Automation, Australia  
Institution of Engineers Australia  
Monash University  
RMIT University  
University of Melbourne

---

### **Keeping Standards up-to-date**

Standards are living documents which reflect progress in science, technology and systems. To maintain their currency, all Standards are periodically reviewed, and new editions are published. Between editions, amendments may be issued. Standards may also be withdrawn. It is important that readers assure themselves they are using a current Standard, which should include any amendments which may have been published since the Standard was purchased.

Detailed information about Standards can be found by visiting the Standards Web Shop at [www.standards.com.au](http://www.standards.com.au) and looking up the relevant Standard in the on-line catalogue.

Alternatively, the printed Catalogue provides information current at 1 January each year, and the monthly magazine, *The Global Standard*, has a full listing of revisions and amendments published each month.

Australian Standards™ and other products and services developed by Standards Australia are published and distributed under contract by SAI Global, which operates the Standards Web Shop.

We also welcome suggestions for improvement in our Standards, and especially encourage readers to notify us immediately of any apparent inaccuracies or ambiguities. Contact us via email at [mail@standards.org.au](mailto:mail@standards.org.au), or write to the Chief Executive, Standards Australia International Ltd, GPO Box 5420, Sydney, NSW 2001.

---

*This Standard was issued in draft form for comment as DR 03589.*

## PREFACE

This Standard was prepared by the Standards Australia Committee IT-006, Information Technology for Industrial Automation to supersede AS 4163.3—1994, *Programmable controllers*, Part 3: *Programmable languages*.

This Standard is identical with, and has been reproduced from, IEC 61131-3:2003, *Programmable controllers—Part 3: Programming languages*.

The objective of this Standard is to specify syntax and semantics of programming languages for *programmable controllers* as defined in Part 1 of AS IEC 61131.

This Standard is Part 3 of AS IEC 61131 *Programmable controllers*, which consists of the following:

Part 1: General information

Part 2: Equipment requirements and tests

Part 3: Programming languages (this Standard)

Part 4: User guidelines

Part 5: Communications

Part 7: Fuzzy control programming

Part 8: Guidelines for the application and implementation of programming languages

AS IEC 61131 does not have a Part 6. A project to develop IEC 61131-6 *Programmable controller communications via field bus* was deleted in September 2000 by the IEC.

In this Standard, the following print types are used:

- requirements proper: in arial type;
- *test specifications: in italic type;*
- explanatory matter: in smaller arial type.

As this Standard is reproduced from an International Standard, the following applies:

- (a) Its number does not appear on each page of text and its identity is shown only on the cover and title page.
- (b) In the source text ‘this part of IEC 61131’ should read ‘this part of AS IEC 61131’.
- (c) A full point should be substituted for a comma when referring to a decimal marker.

# CONTENTS

	<i>Page</i>
1 General.....	1
1.1 Scope .....	1
1.2 Normative references.....	1
1.3 Definitions.....	2
1.4 Overview and general requirements.....	6
1.4.1 Software model .....	6
1.4.2 Communication model.....	8
1.4.3 Programming model .....	10
1.5 Compliance.....	12
1.5.1 System compliance .....	12
1.5.2 Program compliance .....	14
2 Common elements .....	14
2.1 Use of printed characters.....	14
2.1.1 Character set .....	14
2.1.2 Identifiers.....	15
2.1.3 Keywords .....	15
2.1.4 Use of white space.....	16
2.1.5 Comments.....	16
2.1.6 Pragmas .....	16
2.2 External representation of data .....	16
2.2.1 Numeric literals .....	17
2.2.2 Character string literals .....	17
2.2.3 Time literals .....	19
2.3 Data types .....	20
2.3.1 Elementary data types.....	21
2.3.2 Generic data types.....	22
2.3.3 Derived data types .....	22
2.4 Variables .....	26
2.4.1 Representation.....	26
2.4.2 Initialization.....	28
2.4.3 Declaration .....	29
2.5 Program organization units .....	34
2.5.1 Functions .....	34
2.5.2 Function blocks.....	53
2.5.3 Programs .....	68
2.6 Sequential Function Chart (SFC) elements .....	69
2.6.1 General.....	69
2.6.2 Steps .....	69
2.6.3 Transitions .....	71
2.6.4 Actions.....	73
2.6.5 Rules of evolution .....	82
2.6.6 Compatibility of SFC elements .....	89
2.6.7 SFC Compliance requirements.....	90
