**In-service safety inspection and testing
of electrical equipment**

S t a n d a r d s Australia

STANDARDS
NEW ZEALAND
Tekeuwa Aotearoa

AS/NZS 3760:2000

This Joint Australian/New Zealand Standard was prepared by Joint Technical Committee EL/36, In-service Testing of Electrical Equipment. It was approved on behalf of the Council of Standards Australia on 28 February 2000 and on behalf of the Council of Standards New Zealand on 15 February 2000. It was published on 28 February 2000.

The following interests are represented on Committee EL/36:

Australian Chamber of Commerce and Industry
Australian Electrical and Electronic Manufacturers Association
Building Service Contractors of New Zealand
Canterbury Manufacturers Association, New Zealand
Communications, Electrical Plumbing Union
Electrical Contractors Association of New Zealand
Electrical Workers Registration Board, New Zealand
Housing Industry Association
Ministry of Commerce, New Zealand
National Electrical and Communications Association
New Zealand Electrical Appliance Service Association
Regulatory authorities (electrical)
Workcover New South Wales

Keeping Standards up-to-date

Standards are living documents which reflect progress in science, technology and systems. To maintain their currency, all Standards are periodically reviewed, and new editions are published. Between editions, amendments may be issued. Standards may also be withdrawn. It is important that readers assure themselves they are using a current Standard, which should include any amendments which may have been published since the Standard was purchased.

Detailed information about joint Australian/New Zealand Standards can be found by visiting the Standards Australia web site at www.standards.com.au or Standards New Zealand web site at www.standard.co.nz and looking up the relevant Standard in the on-line catalogue.

Alternatively, both organizations publish an annual printed Catalogue with full details of all current Standards. For more frequent listings or notification of revisions, amendments and withdrawals, Standards Australia and Standards New Zealand offer a number of update options. For information about these services, users should contact their respective national Standards organization.

We also welcome suggestions for improvement in our Standards, and especially encourage readers to notify us immediately of any apparent inaccuracies or ambiguities. Please address your comments to the Chief Executive of either Standards Australia International or Standards New Zealand at the address shown on the back cover.

PREFACE

This Standard was prepared by the Joint Standards Australia/Standards New Zealand Committee EL/36, *In-service Testing of Electrical Equipment*, to supersede AS/NZS 3760:1996.

The in-service safety inspection and testing requirements in this Standard do not cover testing for design and approval of equipment (which is covered separately in the AS/NZS 3100, AS 3300/NZS 6200 and AS/NZS 3350 series of Standards).

Changes to AS/NZS 3760:1996 include the following:

- (a) Additions and changes to Table 2, Testing Intervals for Electrical Equipment.
- (b) Numerous minor text changes.

The terms 'normative' and 'informative' have been used in this Standard to define the application of the appendix to which they apply. A 'normative' appendix is an integral part of a Standard and subject to the same level of compliance as if it were in the body of the Standard, whereas an 'informative' appendix is provided for information and guidance, and may indicate good practice. Non-compliance with an informative appendix will not be seen as non-compliance with the Standard.

CONTENTS

	<i>Page</i>
FOREWORD	4
SECTION 1 SCOPE AND GENERAL	
1.1 SCOPE.....	6
1.2 APPLICATION.....	6
1.3 REFERENCED DOCUMENTS	6
1.4 DEFINITIONS	7
SECTION 2 INSPECTIONS AND TESTS	
2.1 SCOPE OF SECTION.....	10
2.2 FREQUENCY OF INSPECTION AND TESTS	10
2.3 PERSONNEL	10
2.4 INSPECTION AND TESTING.....	10
2.5 DOCUMENTATION	13
APPENDICES	
A TEST OF EARTHING.....	15
B INSULATION RESISTANCE TESTING.....	17
C INSULATION RESISTANCE TESTING OF PORTABLE ISOLATION TRANSFORMERS	20
D TEST FOR OPERATION OF PORTABLE RESIDUAL CURRENT DEVICES (RCDs)	23
E ADVISORY AUTHORITIES	24
